“The Image of Muslims in Medieval South Italy”

Luigi Berto, 2015 Emerging Scholar

John Allen Jellies has been a faculty member since 1995 and is a professor of biological sciences. He uses experimental approaches with model systems to answer questions related to brain function, and more specifically, how the nervous system controls behavior. Jellies’ career-long work has generated nearly $4 million in grant funding from national funding agencies. His nominators noted that he is a world-renowned researcher with remarkable ingenuity who has made cutting-edge discoveries. They also praised him as an inspired teacher, advisor, and mentor for his students, as well as someone who has provided exemplary service to WMU, his discipline and academia.

That service has included leading the WMU Faculty Senate and the Michigan Chapter of the Society for Neuroscience, in addition to being a grant reviewer for the National Science Foundation and an editorial board member or manuscript reviewer for several leading journals.

Luigi Berto is an associate professor of history. He is a medieval Latin historian who has carved out an international reputation for his body of new scholarship. In the past seven years, he has produced two books or original historical interpretation and scholarly editions and translations of medieval Latin texts, among other scholarly writings. Berto’s nominators cited him for the remarkable quantity and quality of his research. They also noted that leading authorities praise the rigor of his scholarship and say it is helping to shape his field of study.

Identifying and Communicating your Projects Intellectual Merit and Broader Impacts: Setting the Stage for Continued Funding  Lori Wingate, 2020 Fetzer Center

Intellectual Merit and Broader Impacts statements go beyond describing what a project did, to what difference it made. This session will demystify what the National Science Foundation (NSF) and other funding agencies mean by terms such as “Intellectual Merit” and “Broader Impact,” present strategies for identify and communicating project achievements and evidence of them, and review guidelines and tips for writing “Results from Prior Support” sections of proposals. Although this session will use NSF projects as examples, the advice and guidance are relevant to any researcher looking to effectively communicate the importance and impact of their research.
