Where can I get more information about COVID-19 vaccine?
For healthcare provider information about COVID-19 vaccine, visit the MDHHS website [COVID-19 Vaccine Provider Guidance & Educational Resources](#)
For frequently asked questions (FAQs) related to COVID-19 vaccine, visit the MDHHS [Frequently Asked Questions for the Public](#)

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?
Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.
MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).
There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)
County is based on the county of residence.

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.
MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).
There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)
County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.
