Dybek book is toast of Chicago

WMU’s Stuart Dybek can claim a string of the nation’s top literary awards for his writing, but he calls the one announced last March in Chicago “the best” accolade he could receive.

Dybek’s book, “The Coast of Chicago,” was selected as the featured book of “One Book, One Chicago,” a citywide reading initiative that has spawned similar reading programs in communities around the nation. The book then became the focus of book club discussions, readings and lectures across Chicago during National Library Week April 18-24.

Dybek, a Chicago native who teaches creative writing at WMU, first published the acclaimed book in 1990. The work, which Dybek has called a “love letter” to Chicago, is a collection of 14 short stories inspired by the author’s childhood in the Little Village and Pilsen areas of Chicago.

During a March news conference, Chicago Mayor Richard Daley and Library Commissioner Mary Dempsey announced that Dybek’s book was the choice for Round Six of “One Book, One Chicago.” Earlier books selected for the initiative include Lorraine Hansberry’s “A Raisin in the Sun,” Harper Lee’s “To Kill a Mockingbird” and Elie Wiesel’s “Night.”

“Anybody who would have a book chosen for this knows they’ve just gotten so lucky,” says Dybek of the honor.

Intel ranks WMU eighth in the nation for wireless computing on a college campus

WMU ranks eighth in the nation in the use of wireless computing technology on a university campus according to a study conducted by Intel and released earlier this year.

Intel ranked the 100 “Most Unwired College Campuses” based on several factors, including number of hotspots, which are places where wireless computers will work; percentage of the campus covered by wireless technology; number of undergraduate students; number of computers; and the computer-to-student ratio.

WMU is the only Michigan University in the list’s top 50, and only one other Michigan school made the top 100.

No detours—MDOT, WMU pool resources for research, teaching

A laboratory that was dedicated this fall signals the launch of a new collaboration between the Michigan Department of Transportation and the University that will focus on teaching and professional practice as well as research on the materials used to build Michigan roadways.

MDOT Director Gloria Jeff and WMU President Judith Bailey joined forces Sept. 1 to snip the wires across the entry to the new lab, which will serve the needs of both organizations. WMU students will have the opportunity to become better-qualified road engineers, and MDOT researchers will perfect solutions for pavement design issues.

The Construction Materials Laboratory is in the College of Engineering and Applied Sciences building on the University’s Parkview Campus. The laboratory is the result of a partnership between WMU and MDOT formed to establish a state-of-the-art construction materials laboratory, which will be used to expose undergraduate and graduate students to construction and pavement design material and will serve as the material certification laboratory for MDOT. Materials testing and research that can be conducted in the laboratory includes work on structural reinforced concrete, reinforced concrete pavements, bituminous pavements and foundation materials.

Teacher preparation program earns national association’s top honor

The School/University Partnership Team, known as SUPT, won the Association of Teacher Educators’ 2004 Distinguished Program in Teacher Education award.

The honor, announced earlier this year in Dallas, underscores ATE’s efforts to highlight effective models of teacher preparation and recognizes programs that are innovative models of collaboration between local educational agencies and institutions of higher education.

Among the factors that set SUPT apart are the program’s broad reach and the high level of communication and support it provides to its educational partners as well as student interns.

Now in its 10th year, SUPT is based on “cluster sites,” a system that offers emerging educators a chance to complete their field experiences in diverse and supportive settings. Each cluster is comprised of five to 12 interns per semester, plus their mentor teachers, mentor coaches and a University coordinator.

Siena Heights University in Adrian was ranked 58th.

After more than a year of concentrated effort, “Wireless Western” officially became a reality in 2002. The Wireless Western initiative involved placing more than 600 wireless access ports in campus buildings and some 30 outdoor units to carpet the campus with wireless capability that allows faculty, staff and students to access University networks and the Internet from virtually every corner of the campus.

Keeping Score
Classical enthusiasts tune in to celebrated WMU professor and composer C. Curtis-Smith

When students take a seat at the imposing and weathered Steinway in Curtis Curtis-Smith’s studio, the most memorable classics aren’t always on the music stand. Instead, a simple conversation with the internationally respected composer may offer a lesson that will be remembered for life.

The composer, who came to WMU in 1968 as an assistant professor of music at age 26, recalls one such moment.

“In the 1970s, a student and I got into a discussion about the parallels between good cooking and good music making. His idea of good cooking was frying a steak,” says Curtis-Smith. “His perspective was ‘Well, how much can you do with beef? You just heat it up.’ My response was if that’s all you do, then yes, steak is indeed just heated meat. But you should go further and do something special with it—add a creative sauce or use an interesting technique to prepare it.

“Just as in interpreting a piece of music, you don’t just play the notes on the page or imitate the playing of another pianist. You must be inventive and create your own interpretation; you have to go above and beyond the literal.”

The music man

Going “above and beyond” in the 39 years since he graduated from Northwestern University has landed him at the forefront of America’s contemporary composers.

Over the years, Curtis-Smith has pushed the limits of instrumentation and pushed listeners to think creatively about classical music. With more than 100 compositions to his credit, Curtis-Smith has heard his work performed throughout the world. His career path is strewn with countless honors. Playbills, programs from sold-out performances, and stacks of newspaper and magazine articles praising his talents attest to his renown.

While at WMU, Curtis-Smith has landed more than 100 grants, awards and commissions, including a Guggenheim Fellowship, the Koussevitzky Prize at Tanglewood, and honors from the American Academy and Institute of Arts and Letters. Among the many organizations that have awarded him grants are the Fromm Foundation at Harvard, the National Endowment for the Arts and the Arts Foundation of Michigan. He also has received 26 consecutive awards from the American Society of Composers, Authors and Publishers.

A gift for music

“The work is fulfilling, but it doesn’t come easily,” he says. “As a composer, the general challenge is to not write the same piece over and over...the
irony is that the more successful the
last piece is, the harder it is to write
the composition after that.”

Over the years, his music has
garnered praise from musicians,
composers, reviewers and everyday
listeners. In 1980, Curtis-Smith
learned that a prominent local
businessman was among them.

“At the time, I’d discovered a 9-foot
rebuilt, antique Steinway that was
available for purchase,” he says,
“but interest rates at that time were
very high. I was looking for a low-
interest loan of $10,000 to help
with the purchase.”

He mentioned it to a friend who
knew Irving S. Gilmore, a successful
department store owner and local
arts patron who had heard Curtis-
Smith perform. At best, the WMU
professor hoped the mutual friend
might approach Gilmore for help.

“During a phone conversation of
theirs, the possibility of a loan came
up,” says Curtis-Smith, “but Mr.
Gilmore’s response was, ‘Is he too
proud to take a gift? I’ll just give
him the money. How much does he
want?’

“My friend was taken aback and
asked, ‘Well, don’t you want to at
least hear him play? Mr. Gilmore
said, ‘No, I’ve heard him play. He’s
a fine pianist. Just let me write out
the check.’”

Two days later, a check for $10,000
arrived in a perfectly ordinary
envelope.

Within a few weeks, Gilmore had
lunch at Curtis-Smith’s house and
played a little Gershwin and Cole
Porter on “his” piano. Gilmore
died in 1986, but his legacy lives
on in Kalamazoo’s biennial Irving
S. Gilmore International Keyboard
Festival, which is named for him
and at which Curtis-Smith’s work
is often featured. The 108-year-old
piano remains in Curtis-Smith’s
home—a more personal legacy from
the man who loved piano music.

**Fine tunes**

Gilmore was but one of the classical
music enthusiasts counted as fans
of Curtis-Smith’s work. New York
Times reviewer Bernard Holland has
twice lauded Curtis-Smith’s widely
acclaimed “12 Etudes for Piano.”

WMU piano professor Lori Sims, an
accomplished and internationally
known musician, premiered seven
of the well-received etudes during
her debut performance at the
Lincoln Center in September 2000.

“Several people have played them,
but she’s definitely the best,” Curtis-
Smith says of Sims. “The music is
the music, but the performance
makes the difference.”

The newspaper offered a glowing
review of Sims’ program and
poured on the praise for the etudes.

“Mr. Curtis-Smith is a careful
student of past innovators of the
piano,” Holland wrote. “The textures
and movement recall Chopin and
Debussy and yet the language is
at a distance from their diatonic
moorings. This contemporary
composer likes dense, brittle
chords, chiming ornamentation and
is happy to use popular music and
jazz as undercurrents. These are
interesting pieces.”

Sims, who joined Curtis-Smith
on the WMU College of Fine Arts
faculty in 1996, agrees.

“What I find interesting and
attractive about his compositions
is that he writes so well for the
piano, with interesting uses of
the piano and the colors of the
piano,” she says. “His music
can be rhythmically tricky and
texturally dense but always, there
is something similar in that his
compositions are very approachable
and rewarding.”

The same goes for their composer-
performer relationship.

“Curtis is so encouraging, and one
great thing about working with
him is that he isn’t an autocrat,” she
says. “If you’re playing, you may
come up with something aspect of the
music that he hadn’t even thought
of. He sometimes enjoys having his
music at the hands of other people,
and that is great.”

Robotic arm helps children develop handwriting skills

An interdisciplinary team of WMU professors and students has designed a robotic device to help children develop crucial handwriting skills.

The design team is comprised of professors and students from the College of Health and Human Services and College of Engineering and Applied Sciences. Members have been studying the uses of a robotic arm joined with a computer, known as a robotic haptic interface, to improve eye-hand coordination and handwriting skills in children.

The arm of the robotic device is held and then moved to follow trajectories on a screen. The device offers resistance and simulates the effort required to, for example, write with a pencil. Team members are Dr. Sandra Edwards, professor of occupational therapy; Dr. Norali Pernalete, assistant professor of electrical and computer engineering; Erin McCann, occupational therapy graduate student; and Ramakrishna Gottipati, an electrical and computer engineering doctoral student.

WMU/Kimberly-Clark research to result in new consumer products

Patented technology that could turn paper-mill sludge into viable consumer products and boost the usefulness of recycled paper will be developed by WMU, thanks to technology transferred to WMU’s Paper Technology Foundation by consumer giant Kimberly-Clark.

The firm presented a series of four technologies related to fiber and by-product processing to WMU’s Paper Technology Foundation over the past spring and summer. The technology, which includes several patents, will spark four separate research initiatives on campus, as faculty researchers develop and commercialize the technology. Kimberly-Clark’s gift also includes funds and equipment to support the research projects.

Dr. Said AbuBakr, chairperson of the Department of Paper Engineering, Chemical Engineering and Imaging, describes the gift and the opportunities it represents as a major step forward in enhancing departmental research resources and supporting graduate students.

“We’ll be able to recruit and support promising graduate students, and our faculty will have an opportunity to take on a new line of cutting-edge research,” says AbuBakr. “We expect it to lead to technical advances for the industry and the development of additional patents. With the success we expect, the industry could enjoy the opportunity to add a portfolio of value-added products to its list of possibilities.”

Grand entrance

The spot where generations of students once stopped to quaff a beer at the Knollwood Tavern is now part of a spectacular new entrance to the west side of the main WMU campus. It has put an attractive end to vehicle gridlock and the problem of pedestrians risking life and limb to cross busy streets.

In a span of less than six months, the entrance to main campus at West Michigan Avenue and Howard Street was completely transformed with new roads, the first “roundabout” on a Michigan university campus and new walkways, including a pedestrian underpass at Knollwood Avenue. Completed over the spring and summer of 2004, the entrance is the most striking change to the appearance of West Campus since the early 1990s, when seven major buildings were completely renovated or added.
WMU-led statewide water trail system makes a splash

A grand opening in August let loose the floodgates of a University-led effort that could ultimately create a statewide system of water trails linking the Great Lakes shoreline and navigable rivers throughout Michigan.

The Michigan Heritage Water Trails Program is being spearheaded by WMU’s Great Lakes Center for Maritime Studies in cooperation with state and local agencies. During grand opening ceremonies Aug. 21-22, canoeists and kayakers paddled away on the first phase of the River Country Heritage Water Trails in St. Joseph County.

WMU has partnered with the Michigan 4-H Youth Conservation Council and the Michigan Department of History, Arts and Libraries to get the project flowing, says Dr. Dave Lemberg, a WMU associate professor of geography and water trails program director.

St. Joseph County emerged as a logical place to start because it is close to Kalamazoo and has many miles of navigable waterways. Plans call for the River Country Heritage Water Trails to be expanded in the next three years to cover all navigable streams in the county and for water trails to be established elsewhere in the state. Other pilot projects include the South Fork of the Black River from Bangor to South Haven in Van Buren County and on the coast of Lake Huron in Huron and Tuscola Counties.

There has been interest from local water trail enthusiasts around the state to develop new Heritage Water Trails from Wayne County to the Upper Peninsula. Local communities would create their own water trail plans with WMU’s assistance, using a self-funding planning model.

Establishing water trails is seen as much more than offering aquatic recreation. Water trail travelers will learn about the area’s historical events, cultural heritage and natural history along the way. Markers at bridge crossings refer to the paddlers’ interpretive guidebooks where the travelers read about each point of interest. The water trails also are designed to be an economic development tool by promoting heritage tourism.

Multicultural Center opens on main campus

A Sept. 8 grand opening ceremony for WMU’s new Multicultural Center drew dozens of students, faculty and staff to the facility’s suite of four rooms in the Adrian Trimpe Building.

The center, or MCC as it’s called, was established primarily to meet the needs of ethnic minority and international students but will be available to all other WMU students and various faculty as well.

Dr. Martha Warfield, assistant vice president of the Division of Multicultural Affairs and director of the Presidential Initiative on Diversity and Multiculturalism, says the facility evolved with input from students, and students will help determine how it will be used and managed.

“Over the years, multicultural students saw a need to have a comfortable and versatile space where they can gather for meetings, films, social events and other activities or just hang out together,” Warfield says. “It’s also envisioned that faculty will use the space when they would like an informal setting in which to hold seminars, discussions and talks on topics relative to diversity and multiculturalism.”

The MCC was financed through the use of unrestricted donor funds. It features two enclosed rooms that can accommodate small group meetings, another small room with computer carrels and a large area that can simultaneously accommodate multiple activities.

Alumni are listed under their preferred class years. Names preceded by a circle denote membership in the WMU Alumni Association.

Don’t hesitate to contact us when you have news to share in our classnotes or obituaries sections. For classnotes, make sure to include your name (first, middle, last, maiden), address, degree(s), year(s) graduated and phone number. We will publish your photo as space permits.

---1940 to 1973---

• Jack Sterni. BS ’42, was inducted into the National High School Athletic Coaches Association Hall of Fame. He is a retired teacher, coach and athletic director from Plainwell (MI) High School.

• Delia M. DeMaso. BA ’54, TC ’60, MA ’61, received the 2002 Senior Citizen of the Year Award for Leadership at the Michigan State Fair in Detroit.

• Margaret McComish Shaw. BS ’59, was recently elected to the Board of Trustees of Union Seminary, Presbyterian School of Christian Education, in Richmond, VA.

Shirley Gary Dunkin, BS ’61, MA ’65, recently retired as principal of the American School in Brasilia, Brazil. She previously retired as principal of Woods Lake School in Kalamazoo.

Frances F. Fishe. MA., ’62, received a Women of Accomplishment Award from Muskegon (MI) Community College. She is a retired guidance counselor who worked for 25 years at Muskegon High School.

• Mary Magdalene (Przybylski) Roberts. BS ’63, is teaching special education in the Bronx and recently completed a two-year New York City Teaching Fellows program.

Louis G. Hanacek. BBA ’64, is vice president of commercial lending at Great Lakes Bank in Matteson, IL.

David M. Hayes. BA ’64, was inducted into the American College of Trial Lawyers in Montreal, Canada. He is an attorney specializing in commercial and construction litigation with Clark Hill PLC in Detroit.

Carl Latora. BS ’64, MA ’68, was named athletic director of the year by the Michigan Interscholastic Athletic Coaches Association. He is the athletic director at Portage Northern High School.

• James J. Leisenring. MBA ’64, is a 2003 Accounting Hall of Fame Inductee at Ohio State University’s Fisher College of Business. He is a member of the International Accounting Standards Board.

Bob Walker. BA ’64, MA ’70, recently retired from Portage (MI) Central High School after 40 years of teaching.

• Kathleen P. (Morrison) Constange. BA ’65, MA ’75, received the Excellence in Education Award from the Van Buren (MI) Intermediate School District in 2003. She has retired from her position as a speech pathologist and administrator of special education.

• Robert MacEachran. BA ’65, MA ’70, EdS ’76, recently retired from his position as superintendent of Suttons Bay (MI) schools.

• Gordon D. Nederveid. BS ’65, recently retired as president of Nederveid Associates Inc., the engineering firm he founded. He is chairman of the board, providing strategic planning and vision.

Michael R. Sutter. BA ’65, is the administrator/controller for Wexford (MI) County. He is also president and chief executive officer of Michiana Laminated Products in Howe, IN.

• Mary L. (Sheehan) Avery. BA ’65, won the 2003 Benjamin Franklin Award from the West Michigan Chapter of the Association of Fundraising Professionals.

Terry A. Dykstra. BS ’66, MA ’67, received the first Making an International Difference Award from the International Student Exchange Program. He is a counselor at Jenison (MI) High School.

• Ko Miyataki. MA ’66, is the president of the Rehabilitation Hospital of the Pacific Foundation in Hawaii.

• David M. Randall. BA ’67, MA ’71, EdS ’96, is the superintendent for the Metropolitan School District of Warren Township in Indianapolis.

Richard L. Allington. BA ’68, MA ’69, was elected vice president of the International Reading Association and will serve as president during 2005.

Patricia A. (Whisman) Clees. BA ’68, was recently named Student of the Decade by WMU. She teaches forensics at Andover High School.

Norman P. Gottlieb. BBA ’68, was inducted into WMU’s Army Reserve Officer Training Corps Hall of Fame. He recently retired from the United States Army.

Gary A. Horstmanhos. BS ’69, MA ’73, recently retired from Battle Creek (MI) Public Schools after 35 years of teaching.

Vernon Saper. BBA ’68, is president of the Board of Trustees of Goodwill Industries of Grand Rapids, MI. He is a partner at the law firm Warner Norcross & Judd LLP.

• Richard T. Cole. BA ’69, is executive vice president and chief administrative officer of the Detroit Medical Center.

• Richard F. Corona Jr. MA ’69, is a project manager at Skanska USA Building’s Michigan division in Farmington Hills, MI.

Mike Lilly. BA ’69, a project of the University of Michigan Flint Fine Arts Gallery.

James C. Orris. BBA ’69, is the superintendent for the Bay County (MI) Road Commission.

• Earl J. Seaver III. BS ’69, MA ’70, is vice provost at Northern Illinois University in DeKalb, IL.

Sally J. (Mullet) Drake. BS ’70, TC ’70, recently joined Crownings Touch Institute in Kalamazoo as a skin analysis instructor. She provides training to groups all over North America.

Robert C. Forburger. BS ’70, MA ’71, is the assistant principal at Fowlerville (MI) High School.

David D. Pendergast. BA ’70, is executive vice president and chief operating officer of Transkyotic Therapies (in city, state??). He is responsible for TKT’s research, product development, manufacturing and quality functions.

Terry Pruitt. BBA ’70, is assistant superintendent of business services for the Pontiac (MI) School District.

Vinod Thomas. BA ’70, MA ’71, is the World Bank Brazil country director in Washington, D.C.

Donna R. (Brinthal) Crosby. BS ’71, recently retired from her position as life management teacher at Cadillac (MI) Public Schools.

Ronald J. Fabian. BA ’71, was elected president of the Jackson County MI Bar Association for 2003-04.

Tom S. Johnson. MBA ’71, is president of Fleming & Company Pharmaceuticals.

John A. Kriekard. MA ’71, is superintendent of the Paradise Valley Unified School District in Scottsdale, AZ.

• Michael W. Lewis. BBA ’71, was promoted to president of Hurris Bank’s city region. He is responsible for the community development and consumer loans and service sectors throughout the city of Chicago.

Michael E. McCloughan. MA ’71, recently retired from Portage (MI) Central High School, where he was a teacher and spent more than 30 years as the head wrestling coach.

Bauer ’70

Steven G. McNitt. BS ’71, is retired from his position as principal of Roscommon (MI) Middle School.

Joseph W. Schoren. BA ’71, received the 2004 Gerstarker Teacher Proficiency Award. He teaches English and social studies at Northeast Middle School in Midland, MI.

Donna Allgaier-Lamberti. BA ’72, is the artist/owner of White Oak Studio & Gallery located in Pullman, MI. She features the work of 15 Midwest artists as well as her handmade production papers.

Brian M. Connolly. BBA ’72, is the president and chief executive officer of both Port Huron (MI) Hospital and the Blue Water Health Services.

• Barbara Eisner Mieras. BS ’72, MA ’74, MA ’84, is the recipient of the 2004 Distinguished Woman in Higher Education Leadership Award by the executive board of the Michigan American Council of Education Network. She is the executive vice president for advancement and president of the Foundation for Downtown University, which is based in Grand Rapids, MI.
Pamela J. Olheiser, BS '72, MBA '82, a sculptor, recently had “The Benefactress” selected for the 2003 National Juried Art Show at the Farmington Museum in New Mexico.

Carol L. Stark, BS '72, MA '79, is the assistant superintendent of academic services for Grand Ledge (MI) Public Schools.

Nancy L. (Winchester) Roar, BA '73, was named leader in long-term care sales for the Stein Group of Northwestern Mutual Financial Network located in Troy, MI.

William J. Clark BBA '73, has been appointed vice president, DaimlerChrysler and affiliates, sales and marketing in Troy, MI.

Christine K. Ervin, BA '73, is Comcast Cable’s director of communications and public affairs for the western Michigan district.

Bruce R. Grubb, BS '73, has joined Varnum, Rickerding, Schmidt & Howlett LLP in Kalamazoo as a corporate attorney. He is focusing on commercial law and bankruptcy.

David L. Kliber, BA '73, recently acquired S-F Analytical Laboratories Inc., providing analytical chemistry and microbiology services for environmental and food industries in Milwaukee.

VanSlambrouck 77
Zaporozhetz 74

Don Ver Heul, MBA '74, has joined H & S Companies in Muskegon, MI, as a certified public accountant.

Lauren E. Zaporozhetz, MLS '74, is the dean of libraries at Murray State University in Murray, KY.

Rebecca M. Dodd, MA '75, has joined Norman & Paulsen PC in Three Rivers, MI, as a certified public accountant. She specializes in auditing and tax services.

Frank A. Geib, BSE '75, received a Superior Airmanship Award from the Air Line Pilots Association for helping to prevent a potentially catastrophic aircraft accident and saving hundreds of lives.

Dennis Martin, BS '75, is vice president of sales for Fairfield Broadcasting Co. in Kalamazoo.

Patrick M. Dutkiewicz, BS '76, is the owner of Pack N Ship in Muskegon, MI.

Kathryn Geib, BS '76, has been inducted by WMU’s College of Arts and Sciences with its 2003 Alumni Achievement Award in American Studies. She is the principal and senior consultant for Stony Point Communications in Haskel, MI.

Bruce C. Jackson, BA '76, MA ’79, MSA ’84, has earned the designation enrolled agent, which allows him to practice before the Internal Revenue Service. He provides accounting and business services in Fort Myers, FL.

Robert W. Janson, BBA '76, has joined Smith-Peabody-Stiles Insurance Agency in Benton, MI, specializing in commercial sales.

Lynn C. (Biasell) Kellogg, BS '75, is vice president of operations for PHNS, a provider of information technology, analytical chemistry and microbiology services to the health care industry.

Gregory S. Gay, BBA '74, has been named a fellow of the American Society for Quality. He is an engineer at Welch & Associates in Kalamazoo.

Jose A. Infante, BA '74, was nominated for the 2003 West Michigan Ernst & Young Entrepreneur of the Year award. He is chairman, president, and chief executive officer of Community Shores Bank of the western Michigan district.

James L. Lawrence, BM '74, recently retired from Muskegon (MI) Public Schools, where he had received many awards as a music teacher and band director.

John F. Palmer, MLS '74, recently wrote “South Bend: Crossroads of Commerce,” published by Arcadia Publishing of Charleston, SC.

Jon R. Robinson, BA '74, has been appointed vice president of utility law and regulation in the legal department of Consumers Energy. He is in charge of all legal issues related to public utility law and regulation before the Michigan Public Service Commission, the Federal Energy Regulatory Commission and the appellate courts.

Kirk W.M. Tyson, BBA '74, received the 2003 Alpha Kappa Psi Alumnus of the Year Award.

—1974 to 1977—

David Ansel, BS '74, is the technical marketing manager at Wacker Chemical Corp. in Adrian, MI.

Diane Makas-Weber, BS '74, MA '80, has been inducted by the WMU dance department into the Outstanding Alumni Academy. She is the dance department chairperson at the Academy for the Performing Arts in Huntington Beach, CA.

Luis A. Garza, BSW '74, has been appointed director for human resources at Lewis University in Romeoville, IL.

Marc A. Gautheir, BA '74, is sales director for PHNS, a provider of information technology, medical records, transcription, coding and accounts receivable outsourcing services to the health care industry.

Gregory S. Gay, BBA '74, has been named a fellow of the American Society for Quality. He is an engineer at Welch & Associates in Kalamazoo.

Jose A. Infante, BA '74, was nominated for the 2003 West Michigan Ernst & Young Entrepreneur of the Year award. He is chairman, president, and chief executive officer of Community Shores Bank of the western Michigan district.

Willie O. Smith, BS ’79, is prison warden at the Ionia (MI) Maximum Correctional Facility.
Taking academic training to regal heights

As the newly crowned Miss Michigan, Kelli Talicska, who earned both undergraduate and master’s degrees in speech pathology at WMU, is taking the cause of communication disorders across the state. She completed her master’s in fall 2003 and was crowned Miss Michigan on June 19.

“My main job as Miss Michigan is to advocate for the rights of people who have communication or related disorders,” Talicska says, “and also to advocate for linguistic human rights, ensuring that everyone has the right to communicate.”

Such disorders are widespread; she says. One in every six people has a communication disorder. Though they may not be restored to normal, with the right help they still can maintain a high quality of life that greatly reduces the loss they have suffered.

Talicska, who graduated with highest honors, says treating speech, language and hearing disorders is of the utmost importance.

“It’s about quality of life,” says the outgoing 25-year-old. “When people experience a communication disorder, whether from birth or from a stroke, that’s extremely devastating.”

Talicska plans to use the $12,000 Miss Michigan scholarship money to someday earn a doctorate in communication disorders. For now, she’ll work in her field for a few years before tackling a Ph.D.

The Auburn, Mich.-raised Talicska looks back fondly at her time at WMU, where she was involved in a litany of extra-curricular activities and was even elected Homecoming Queen. She stays in close contact with about 20 friends from college and several former instructors.

“I loved every minute of my time in Kalamazoo and my college experience,” she says. “This is my second home. I have so many wonderful memories of my time here.”
Frederick P. Mainka, BBA ’84, is an attorney with Miller, Shipee & Tischler PC in Southfield, MI.

Melody L. Moore, MA ’84, was named to “Who’s Who Among America’s Teachers” for 2004. She is the dean of extended learning and distance education at John Tyler Community College in Chester, VA.

Sara E. Hays, BS ’99, is assistant director of residence life at the University of Puget Sound in Tacoma, WA.

Sara E. Hays, BS ’99, is assistant director of residence life at the University of Puget Sound in Tacoma, WA.
**Principal is at the top of her class in Michigan**

Award-winning principal Suzanne Antonazzo got the most from her WMU education: a start on her career and a partner for life.

Antonazzo, who graduated in 1969 with a degree in elementary education, recently was named the 2004 Outstanding Practicing Principal of the Year by the Michigan Elementary and Middle School Principals Association. She is principal of Haviland Elementary School in Waterford, Mich., part of the Waterford School District.

The honor, presented in October at a banquet in Lansing, Mich., is just the latest bestowed on the WMU alum. She was presented the Celebrate Literacy Award from both the Oakland County Reading Council and the Michigan Reading Association and the Oakland Press/Oakland University Medallion Award for Excellence in Education.

Her most-recent accolade came as a bit of a shock. Antonazzo was told she hadn’t won, then was presented the award at the banquet. She goes on to national competition next fall in Washington, D.C.

On hand for the presentation were her husband, Sam, Waterford Schools Superintendent Tom Tattan and her school’s staff. All had kept her winning a secret.

Antonazzo with Waterford Superintendent Tattan

“I’m thrilled,” she says, “and I think the best part is, it was such a surprise.”

Antonazzo’s family has strong ties to WMU. She and her husband, a physical education and business teacher, met at WMU, where he was a member of the 1966 MAC championship football team. Their son, Torre is a WMU senior majoring in business. They also have a daughter, Sarah, who works as a packaging engineer for Nokia in Dallas.

Antonazzo credits her education at WMU with helping to shape her philosophy as an educator.

“I think a lot of the beliefs that I have about how all children can be successful came from my undergraduate degree,” she says.

Gold-on-gold printed silk necktie, WMU 1903-2003 logo, gold with black outline, gold field.

was $25 each now $18 each

**BROWN AND GOLDEN MEMORIES BY LARRY B. MASSIE**

A publication commemorating WMU's first 100 years

In celebration of WMU's centennial anniversary, author Larry B. Massie shares an engaging collection of stories, memories, traditions and historical facts. "Brown and Golden Memories" chronicles, decade by decade, the 100-year journey of what started as Western State Normal School—the teachers' college on the hill—and became an internationally recognized student-centered research institution. More than 250 historical photos are included to help illustrate the highlights of that journey.

was $35 each now $18 each

Nanotech work attracts prestigious funding

California’s W.M. Keck Foundation has awarded $500,000 to a $1 million research project at WMU aimed at unlocking the secrets of the mechanism that allows the penetration of cells by everything from harmful agents like viruses and pollutants to beneficial new drug discoveries.

The Keck Foundation has notified the University that one of its prestigious medical research awards will go to WMU’s Nanotechnology Research and Computation Center for a two-year basic research effort that is expected to make a fundamental contribution to a wide range of scientific disciplines. The research team is led by Dr. Subra Muralidharan, associate professor of chemistry and director of the center.

WMU’s research team, which will include four students, will delve into the mechanisms that allow the transport of materials across a cell membrane. Such transport is poorly understood but critical for carefully targeting drug delivery as well as understanding how viruses, pollutants and toxins disrupt cell functions, says Muralidharan.

Distinguished Alumni Award winners honored during Homecoming

Three prominent leaders in education, government and business were selected by the WMU Alumni Association to receive the 2004 Distinguished Alumni Award.

This year’s recipients are: Dr. Robert Bruininks, president of the University of Minnesota; Richard G. Haworth, chairman of the board of the Holland, Mich., office furniture maker Haworth Inc., and Carolyn Cheeks Kilpatrick, a veteran member of the U.S. House of Representatives from Detroit.

The Distinguished Alumni Award was initiated in 1963 and is the alumni association’s most prestigious honor. It recognizes graduates who have achieved a high level of success in their respective professions. Only 122 men and women have won one of these awards.

Bruininks earned a bachelor of science degree from WMU in 1964. He became the University of Minnesota’s 15th president in November 2002, just months after his selection as interim president. He came to Minnesota in 1968 as an assistant professor of educational psychology and has served in several posts, including executive vice president and provost.

Haworth, a former chairperson of the WMU Board of Trustees and a board member from 1991-2001, earned a bachelor of business administration degree from WMU in 1964. He has led Haworth Inc. through its evolution from a small company with a single-product line to a global corporation that has $1.23 billion in annual sales and employs 8,500 people in 120 countries.

Kilpatrick earned a bachelor of science degree from WMU in 1972. A former business teacher in the Detroit Public Schools, she served 18 years in the Michigan House of Representatives. For the past eight years, she has been representing Michigan’s 13th Congressional District in the U.S. House of Representatives, where she serves on the powerful House Appropriations Committee.

Three prominent leaders in education, government and business were selected by the WMU Alumni Association to receive the 2004 Distinguished Alumni Award.

This year’s recipients are: Dr. Robert Bruininks, president of the University of Minnesota; Richard G. Haworth, chairman of the board of the Holland, Mich., office furniture maker Haworth Inc., and Carolyn Cheeks Kilpatrick, a veteran member of the U.S. House of Representatives from Detroit.

The Distinguished Alumni Award was initiated in 1963 and is the alumni association’s most prestigious honor. It recognizes graduates who have achieved a high level of success in their respective professions. Only 122 men and women have won one of these awards.

Bruininks earned a bachelor of science degree from WMU in 1964. He became the University of Minnesota’s 15th president in November 2002, just months after his selection as interim president. He came to Minnesota in 1968 as an assistant professor of educational psychology and has served in several posts, including executive vice president and provost.

Haworth, a former chairperson of the WMU Board of Trustees and a board member from 1991-2001, earned a bachelor of business administration degree from WMU in 1964. He has led Haworth Inc. through its evolution from a small company with a single-product line to a global corporation that has $1.23 billion in annual sales and employs 8,500 people in 120 countries.

Kilpatrick earned a bachelor of science degree from WMU in 1972. A former business teacher in the Detroit Public Schools, she served 18 years in the Michigan House of Representatives. For the past eight years, she has been representing Michigan’s 13th Congressional District in the U.S. House of Representatives, where she serves on the powerful House Appropriations Committee.

College of Arts and Sciences
Two students receive Fulbright Fellowships

A recent graduate abandoned as an infant in Korea has returned to the land of her birth, and a doctoral student is studying Muslim-Christian interaction in the medieval Mediterranean, both as Fulbright Fellows for 2004-05.

Aimee Jachym, an April 2004 graduate in English and business, and Travis Bruce, a doctoral candidate in history, have been awarded Fulbright Grants for Graduate Study Abroad. The awards bring to 17 the number of Fulbright Fellowships won by WMU students over the years.

Jachym headed to Korea in July to participate in the Fulbright English Teaching Assistant Program. The Medallion Scholar and Lee Honors College member was adopted at age 2 by American teachers after being abandoned as an infant. Bruce who has language skills in Latin, Arabic, Spanish, Catalan, French and Italian—all essential to his research—traveled to Spain in September and will spend the full academic year there studying the 11th century Hispano-Muslim kingdom of Denia.

College of Education
College honors 100th graduating class

The College of Education, which boasts WMU’s oldest academic tradition, celebrated the success of its 100th graduating class following commencement ceremonies in June.

College faculty and alumni, including this year’s graduates and their families, gathered for an old-fashioned ice cream social on the East Campus on the Prospect Hill side of East Hall June 26. Those attending witnessed the passing of the College of Education Key from members of the Class of 2004 to the Class of 2005, a moment reminiscent of the ceremony staged June 22, 1905, when the first WMU graduation exercise was held. Eight women and one man received teaching degrees in that long-ago ceremony.

College of Aviation
Women aviators fly to best-ever finish in historic Air Race Classic

WMU pilots Amanda J. Gruden and Sarah Tower finished 10th out of 33 teams entered in the 2004 Air Race Classic, an all-women’s event that took competitors on a 2,400-mile journey through eight states.

This year’s finish was the highest for a WMU team in five annual Air Race Classic competitions. Gruden and Tower also finished second among four collegiate teams entered. Ohio University finished one place ahead of WMU at ninth, Purdue University was 11th and Kansas State University came in 29th.

“We are extremely happy with our results and how we finished,” says Tower, who was competing for the first time and is slated to be the senior member of WMU’s two-woman team in 2005. Tower, ’03, and Gruden, ’00, are flight instructors in the College of Aviation.

Haworth College of Business
Professor selected as Michigan’s Accounting Educator of the Year

The Michigan Association of Certified Public Accountants has selected WMU’s David L. Rozelle as the association’s 2004 Accounting Educator of the Year.

The award to Rozelle, who is WMU’s Beulah I. Kendall Associate Professor of Accountancy, was presented at the MACPA’s awards reception and dinner Sept. 8 in Dearborn, Mich. A panel from the association selected Rozelle from among 12 nominees based on recommendations from colleagues, students, former students, and professional leaders in both education and accounting.
Lee Honors College
Fourth LHC student named Udall Scholar

WMU senior Tristan Brown is the school’s fourth recipient of a prestigious scholarship for environmental studies from the Morris K. Udall Foundation. Brown, of Franklin, Mich., is one of 80 Udall Scholars from around the nation who are receiving $5,000 for tuition, fees, books, and room and board for the 2004-05 academic year. A member of the Lee Honors College, Brown is majoring in environmental studies, as well as creating a Student Planned Major, which includes a curriculum of hard sciences, social sciences and humanities.

Other WMU students have won Udall Scholarships in 2000, 2001 and 2002. All four students were nominated for the award by Dr. John E. Martell, assistant dean of the Lee Honors College. Dr. Lynne Heasley, assistant professor of environmental studies, also assisted Brown in the application process.

College of Health and Human Services
HHS college ranks sixth in NIH research funding

A prominent federal agency has ranked the University’s College of Health and Human Services as No. 6 on its list of 50 allied health professions schools receiving awards from the agency.

The National Institutes of Health, part of the U.S. Department of Health and Human Services, announced the rankings recently. The college moved up three spots from a No. 9 ranking in fiscal year 2002. For fiscal year 2003, the college held three NIH grants for a total of $1,535,974.

The new ranking puts NIH funding for the WMU College of Health and Human Services ahead of 44 other institutions, including the University of Pittsburgh, the University of Kansas, the University of Cincinnati, the University of Missouri Columbia, and the University of Massachusetts Amherst. All but one of the universities ahead of WMU on the list have either medical schools or colleges.

College of Fine Arts
Music students snag more Down Beat honors

And the beat goes on.

For the 12th straight year, WMU music students have racked up multiple awards in Down Beat magazine’s annual Student Awards Competition.

And in a related bit of news, Gold Company, the University’s vocal jazz ensemble, continues to win accolades from a jazz music journal for its releases, this time for its most recent compact disc “25,” named in honor of the group’s 25th anniversary.

WMU students tallied seven Down Beat awards this year, while Dr. Thomas Knific, chairperson of the Jazz Studies Program, was given an Achievement Award for Jazz Education.

“Norah Jones, a key influence on the College of Fine Arts music program, was honored in Down Beat’s world-renowned Student Awards Competition,” Dr. Knific says. “For the past decade, we have been in the top three schools for award winners.”

College of Engineering and Applied Sciences
Senior nabs top scholarship

Amy J. Conine, a WMU mechanical engineering senior, is one of only 40 students from around the country to be awarded a scholarship from one of the nation’s leading engineering honor societies.

Conine of Lima, Ohio, was named a Tau Beta Pi Scholar by that organization’s fellowship board. As part of her designation, she received a $2,000 cash award for her senior year of study. The scholarship Conine received is funded by and named for General Motors Corp.

The 40 students honored were selected from among 643 applicants for the award, which is based on scholarship, campus leadership and service. Tau Beta Pi, founded in 1885, represents the entire engineering profession and has chapters on 228 U.S. college campuses as well as a membership of nearly 470,000.

College of Health and Human Services
HHS college ranks sixth in NIH research funding

WMU students tallied seven Down Beat awards this year, while Dr. Thomas Knific, chairperson of the Jazz Studies Program, was given an Achievement Award for Jazz Education.

“This is the second greatest number of student awards for any institution in North America this year,” Knific says. “For the past decade, we remain in the top three schools for award winners.”
U.S. Paralympic goalball teams have strong WMU ties

Both the U.S. men’s and women’s goalball squads that competed in the recent Paralympic Games in Athens, Greece, have strong connections to WMU.

In all, nine of the 16 visually impaired athletes on the two teams have Bronco ties. In addition, John Bakos, U.S. men’s goalball coach, is a recent graduate of the WMU Department of Blindness and Low Vision Studies.

The women’s team, which won the silver medal, has the strongest ties. Team members include Robin Theryoung, a WMU graduate student; Nikki Buck, who attended WMU sports camps; Jennifer Armbruster, a project manager in blindness and low vision studies; Asya Miller, a WMU graduate and member of the track team; and Jessie Lorenz, who lives in California, but learned the sport at WMU sports camps.

Rounding out the team were alternates Lindsay Sloan and Jackie Barnes of Illinois, who also learned goalball at WMU sports camps.

The bronze medal-winning men’s team includes WMU sophomore and former sports camper Tyler Merren and team alternate Joe Hamilton, a former sports camper and recent WMU graduate.

Goalball is a team sport played by blind and visually impaired athletes around the world. Three players on each side of the court launch a ball at speeds of more than 30 mph at the opposing side’s goal on an indoor, volleyball-sized court. All athletes are blindfolded, and nine bells encased in the basketball-sized ball help competitors track its location.

Theatre students win praise at Scottish festival

Summer was a magical time for theatre students who traveled to Edinburgh, Scotland, where they staged a well-received production at the 2004 Fringe Festival, Scotland’s internationally known gathering for the arts.

The trip marked the University Theatre’s first appearance at the famous festival. Students made the most of it by staging a critically acclaimed production of “Women of Troy: Women of War” Aug. 7-14.

“Every once in a while, you leave a theatre feeling completely drained,” wrote a reviewer in the festival newspaper Three Weeks. “A case in point is Western Michigan University’s immaculate ensemble production, which seamlessly fuses the classic Greek tragedy with personal accounts of 20th century war victims. Their relentless energy and faultless timing make their performances … deeply affecting.”

Three Weeks gave the play a grade of four out of five stars.

Pianist Lori Sims named Bernhard Professor of Music

Internationally known pianist Lori Sims has a new accolade to add to her growing list of accomplishments. She is now the John T. Bernhard Professor of Music.

The appointment was announced by President Judith Bailey earlier this year during her State of the University address. Bailey expects several similar appointments to be made each academic year. Outstanding faculty members will be named to a professorship that bears the name of a significant member of the University community. Sims’ professorship bears the name of WMU’s fourth president, a lifelong supporter of the arts who died in January.

Sims, an associate professor of music and a faculty member since 1997, has been turning heads in the classical music world. Her 2000 Lincoln Center debut came two years after she won first prize in the prestigious Gina Bachauer Piano Competition in Salt Lake City, Utah. Sims also won best performance of a work by Brahms at that international competition.

It’s awesome

The new College of Engineering and Applied Sciences campus is already a magnet for engineering students, high-tech firms, research partners and exclamations of praise.

“Awesome!”

That was the near unanimous exclamation of engineering students who poured through the doors last fall of WMU’s new home for the College of Engineering and Applied Sciences.

The $72.5 million building is 343,000 square feet of efficient, highly flexible space designed to promote communication, contact and collaboration. The facility, part of a $99 million project, is WMU’s largest academic building and was constructed with a blend of private/public funding that included more than $20 million in private cash and in-kind gifts. A fall 2003 opening ceremony marked the end of a decade of planning and two years of construction.

The two-story brick and glass building features two, 600-foot-long wings radiating from a glass hub. Classrooms, departmental offices, labs, small-group breakout rooms and student living rooms occupy the two wings, and behind each wing is a parking ramp. The glass hub includes college offices, large and small lecture halls, more classrooms, a faculty lounge and a cafeteria.

The engineering complex is the heart and architectural focus of the University’s new Parkview Campus and the main attraction for WMU’s Business Technology and Research Park. By late this fall, more than two dozen private firms, including advanced engineering, life science and information technology companies, had committed to the park. Fall semester saw some 3,000 engineering students, faculty and staff sharing the Parkview Campus with more than 400 employees of those corporate partners.

The new college provides a visible WMU presence for motorists passing on nearby U.S. 131. Putting a focal point on that presence is a 120-foot stainless steel icon that marks the campus location.
WMU expert has banner year for media appearances

Mel Gibson’s “The Passion,” the bestselling novel “The Da Vinci Code” and a popular set of books known as the “Left Behind” series have made it a banner year to be the go-to guy for news outlets around the nation examining all things Christian.

Dr. Paul Maier, the Russell H. Seibert Professor of Ancient History, has become something of a mainstay in the popular press with appearances in recent months on two ABC News primetime specials and a raft of interviews with print media that includes the Christian Science Monitor, Newsday, the Arizona Republic and the Minneapolis Star Tribune.

Maier, the co-author of “The Da Vinci Code—Fact or Fiction?,” appeared last April as a major historical source for the three-hour primetime special “Peter Jennings Reporting: Jesus and Paul—The Word and the Witness,” which focused on early Christianity.

“When I did ‘Jesus and Paul’ with them, they filmed about two-and-a-half hours of our interviews and really liked them,” Maier says. “When ‘20/20’ wanted a fresh look for its ‘Jesus, Mary and Da Vinci,’ special airing in August, they took some of my interviews back up from the cutting room floor to examine some of the controversial theories about Christianity expounded in Dan Brown’s book.”

To see what other WMU experts have been doing with national media, go to <www.wmich.edu/wmu/news/2004/09/057.html>.

Students hammer home housing message

A year after pounding in the first nail, WMU students dedicated a two-story, 1,100-square-foot house near campus that not only increases Kalamazoo’s stock of affordable housing, but also honors the University’s 2003 centennial.

Student volunteers began “raising the roof” in September 2003 after the WMU Student Centennial Committee sponsored the construction project with help from Kalamazoo Valley Habitat for Humanity, says committee chairperson and WMU staff member Lynn Kelly-Albertson.

“Our students historically have been service-oriented,” Kelly-Albertson says, “and their decision to commemorate the centennial by doing a volunteer project is a reflection of their longstanding involvement with the larger community, especially organizations such as KVHH.”

The Student Centennial Committee raised $25,000 in monetary gifts and in-kind donations of materials and services to support the project. This figure includes gifts from the Alpha Tau Omega fraternity, which brought in nearly $16,000; the student chapter of Habitat for Humanity; and the Centennial Steering Committee.

Some 200 campus and community volunteers contributed more than 2,000 hours of their time and talents to building the University’s centennial home. About one-quarter of these volunteers were WMU students, faculty and staff.

New research center capitalizes on Kalamazoo’s drug heritage

Life sciences research and commercialization are in Southwest Michigan’s DNA.

From W.E. Upjohn to Homer Stryker, the community’s forebears established a legacy that has been carried forward for more than a century. Now the new Biosciences Research and Commercialization Center at WMU is leading the community into a new era of life science discovery.

Established in late 2003, the BRCC was conceived in response to pharmaceutical giant Pfizer’s 2003 announcement that it would lay off hundreds of researchers in Kalamazoo. Concerned about keeping this intellectual capital in Southwest Michigan, legislators, University officials and community leaders put their heads together to develop a plan that would enrich the academic and intellectual life of the region—and stem the brain drain.

With $10 million in funding from the state of Michigan, the BRCC was established, and in a few short months, a governing board was recruited and the first $2 million distributed to promising life sciences startup companies. This fall, a yearlong national search resulted in the selection of Dr. Charles Nawrot, a life sciences executive with more than 25 years of industry experience, as the BRCC’s executive director.

Already the nine firms that received funding from the BRCC have attracted additional support from such federal agencies as the National Institutes of Health and the National Institute of Standards and Technology. The University has even been able to begin repaying the state’s investment in the BRCC and this fall, an initial check for $1,200 was cut, reflecting 10 percent of the center’s first earnings.

The early success validates the model and the community’s expertise that led WMU to launch the center.

“I've lived in Southwest Michigan for about 20 years, and over that time I've developed a very deep and sincere respect for the talent in this community, particularly the scientific talent,” says Dr. Jack Luderer, WMU vice president for research and a former scientist with Pfizer predecessors Pharmacia Corp. and the Upjohn Co. He served as interim BRCC director while the nationwide search for Nawrot was under way.

“When I first moved to Portage, I learned that the mayor was a chemist, and as a science guy, I thought that was pretty neat. But as I look back, I think that wasn't an aberrancy, but rather it speaks to the rich scientific fabric of this community. We are one of the few cities on the planet with this talent base, and we're uniquely poised to make this center a success.

“Bioscience is a research area the University plans to emphasize and we saw the potential to retain some fairly rare talent in Michigan,” Luderer adds. “So it all just meshed.”

www.wmich.edu/brcc
WMU NEWS

‘Where to? WMU.’

Chicago's “Cows on Parade” has inspired similar community art projects in many cities, including Cincinnati’s “Big Pig Gig” and now, “Hail Kalamazoo.”

Chicago has cows; Kalamazoo has cabs—identically cast, four-foot replicas of the Checker Marathon taxicab, an American icon manufactured in Kalamazoo until 1982, when Checker Motors stopped making cars. Dozens of local artists have applied their talents to create more than 30 unique works of art—beautifully, curiously and hilariously adorned Checkers—which are displayed in public spaces throughout downtown.

Among the first cabs completed was one purchased by the WMU Alumni Association, painted by two artists with close ties to the university and displayed this fall at the Union, a WMU-theme restaurant and cabaret on the Kalamazoo Mall. Graduate art student Kathy Murphy and Kim Nelson, a graphic designer in the Office of University Relations, shared in the creation of WMU’s cab, titled “Where to? WMU.”

Like most similar projects, “Hail Kalamazoo” is intended to make art more visible and accessible to the public, help familiarize the community with local artists and raise money for local charities. Kalamazoo’s United Way and the Kalamazoo Institute of Arts will share in the proceeds from the sale of the art cabs, about 30 of which have already been purchased for public display.

WMU and historically black colleges form aviation consortium

Five historically black colleges from around the nation are joining with WMU’s College of Aviation to form an Aviation Education Consortium that will work to diversify the aviation industry work force and expand opportunities for minority students and women.

Delaware State University, Florida Memorial College, Hampton University, Tennessee State University, Texas Southern University and WMU are the charter collegiate members of the organization that was announced March 31 in Nashville on the campus of Tennessee State. Other consortium members are the Organization of Black Airline Pilots Inc. of Silver Springs, Md., and Tuskegee Airmen Inc. of Arlington, Va., which will both serve the consortium in an advisory capacity.

The aim of the new organization is to use the resources and expertise of all consortium members to identify and support minority individuals who have an interest in pursuing an aviation career and to establish a strategy and process for taking such individuals seamlessly “from ninth grade to the airline industry door.” To accomplish its goals, the consortium will use a variety of tools, including faculty and student mentoring, exchange programs between consortium members, establishment of aviation student fellowships and coordination among members’ academic program resources and delivery systems.

“This is a demonstration of our commitment to achieving real diversity in the aviation industry,” says WMU’s Capt. Rick Maloney, dean of the College of Aviation. “We’re excited about expanding our relationships with the colleges and with OBAP and the Tuskegee Airmen.”
