School-Related Outbreak Reporting

The tables below provide information about school-related COVID-19 outbreaks, as reported by local health departments each week to the Michigan Department of Health and Human Services.

In accordance with the Council of State and Territorial Epidemiologists' [outbreak definition](#), schools that have been found by their local health department to have two (2) or more COVID-19 cases who may have shared exposure at the school grounds and are not from the same household (with the exception of dorms and off-campus housing) are included.

If your child's school is listed, your local health department and school are investigating and will contact you directly if you or your child was possibly exposed to coronavirus at school. Please note that students or staff who were exposed to COVID-19 outside of the school grounds AND are not thought to have spread the disease in the school grounds (due to quarantine, self-isolation, etc.) are not included in the data below.

Many factors, including the lack of ability to conduct effective contact tracing in certain settings, may result in underreporting of outbreaks. This information does not provide a complete picture of school outbreaks in Michigan and the absence of identified outbreaks in a school in no way provides evidence that, in fact, that school is not experiencing an outbreak.

Michigan schools are working hard to maintain a safe environment while also providing quality education. Should you have questions or concerns about this information, please contact your school.

Wearing a mask (covering mouth and nose), social distancing (maintaining a distance of 6 feet apart), frequent handwashing (using soap for 20 seconds or hand sanitizer with 60% alcohol), and following [capacity restrictions of social gatherings](#) are some of the most effective ways to slow the spread of COVID-19. If you, or someone close to you, are sick or have symptoms, you can [get tested](#).
