# **MIS-C** Data and Reporting

#### What is MIS-C?

Multisystem Inflammatory Syndrome in Children (MIS-C) is a condition in children and adolescents under 21 years of age where multiple organ systems become inflamed or dysfunctional which occurs in association with illness. Children with MIS-C may have a fever and various symptoms, including abdominal (gut) pain, vomiting, diarrhea, neck pain, rash, bloodshot eyes, or feeling extra tired. We do not yet know what causes MIS-C. However, many children with MIS-C were infected with the virus that causes COVID-19, or had been around someone with COVID-19.

Health care providers and local health departments are asked to maintain a high degree of suspicion for MIS-C in pediatric and adolescent patients presenting with symptoms similar to Kawasaki Disease or ill individuals who have been previously exposed to COVID-19 with signs and symptoms. Patients have presented with persistent fever\*, hypotension, multiorgan (cardiac, gastrointestinal, renal, hematologic, dermatologic, and neurologic) involvement, and elevated inflammatory markers. Respiratory symptoms have been present in some, but are not a common finding.

\*Persistent fever is a measured fever of 100.4°F (38.0°C) or greater for at least 24 hours, or report of subjective fever lasting at least 24 hours.

#### Reported Cases of Multisystem Inflammatory Syndrome in Children (MIS-C)

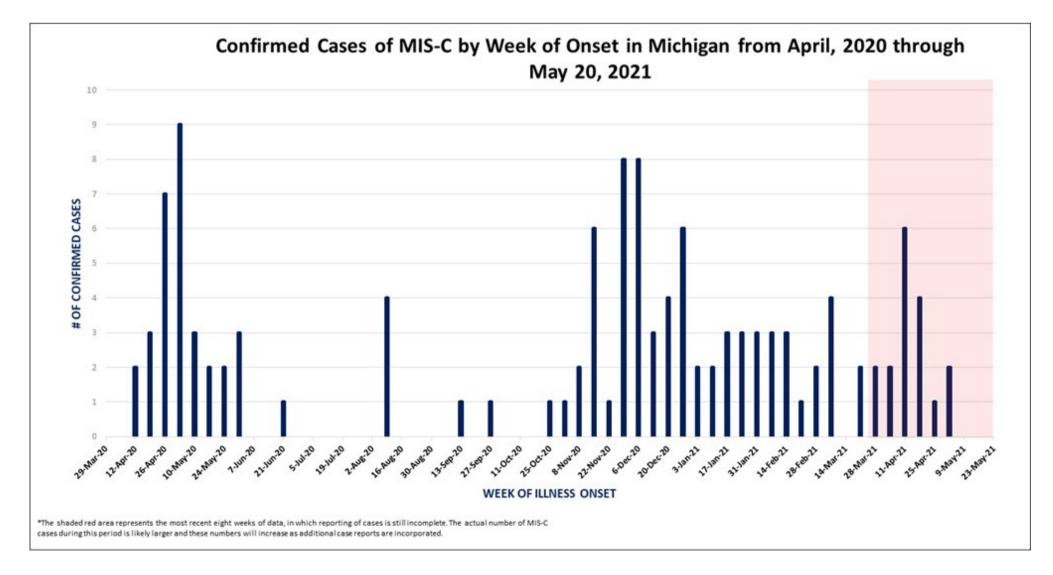

Data will be updated on the first and third Thursdays of the month.

Multisystem Inflammatory Syndrome in Children (MIS-C) Michigan Data Summary 5/20/2021				
# Cases Confirmed and Reported to CDC*	123			
MIS-C associated Deaths	5 or fewer			
Cases admitted to ICU	86 (69.9%)			
Onset Date Range	04/14/20 to 5/5/2021			
Age Range	0-20 years			

#### \*Meets CDC Case definition https://emergency.cdc.gov/han/2020/han00432.asp

#### **DEMOGRAPHIC INFORMATION (N=123)**

Age Group	Count	%	Race	Count	%
0-4 yrs	34	27.6%	Black/African American	49	39.8%
5-10 yrs	52	42.3%	Caucasian	55	44.7%
>10 yrs	37	30.1%	All Others / Unknown	19	15.5%
Gender	Counts	%	Ethnicity	Count	%
Male	72	58.5%	Not Hispanic or Latino	84	68.3%
Female	51	41.5%	Hispanic or Latino	12	9.8%
Unknown	0	0.0%	Unknown	27	21.9%

Red shading indicates the expected reporting lag for new cases. Cases with onset dates in this time period may not have been detected or reported yet.
