Notes:

This is a new reporting system and additional laboratories will be included over time. Counts of specimens tested positive will not equal number of people with COVID-19. People may have more than one test or may have had their test from an out of state lab.

Total samples tested includes test that were negative, positive, and inconclusive.

Commercial labs only includes data from LabCorp.

Public health labs include the Michigan Department of Health and Human Services Bureau of Laboratories.

Counts represent the total specimens tested, not total patients tested. A patient can have more than one specimen tested, therefore the number of specimens tested may be more than the number of patients tested.
