Federal Long-Term Care Facility (LTCF) Pharmacy Partnership Program Data as of 1/14/21							
Pharmacy Phase	Activation Date	Facilities Assigned for Scheduling	Facilities with First Clinic Completed	Facilities with Second Clinic Completed	Facilities with Third Clinic Completed	Total Vaccines Administered (Residents & Staff)	Additional Clinics Scheduled Over Next 7 Days (includes today)
CVS Part A (Skilled Nursing Facilities)	12/28/2020	269	244			21715	13
CVS Part B (Other Long Term Care Facilities)	1/4/2021	717	261			13504	224
Walgreens Part A (Skilled Nursing Facilities)	12/28/2020	146	122			11112	26
Walgreens Part B (Other Long Term Care Facilities)	1/4/2021	3852	177			6025	458
Totals		4984	804			52356	721

CVS Data Source: https://cvshealth.com/sites/default/files/cvs-health-covid-19-vaccination-data.pdf

Walgreens Data Source: Walgreens [email report]

Previous data posted for Walgreens Part A and Part B was reported in error by Walgreens.

The data posted today has been corrected by Walgreens to reflect the accurate numbers for Part A (Skilled Nursing Facilities) and Part B (Other Long Term Care Facilities).

At this time, Long Term Care vaccinations are not fully captured in the primary dashboard above. We are working on reconciliation and will update this note when complete.

CVS and Walgreens pharmacies plans to conduct three on-site clinics at each LTC facility to vaccinate as many residents and staff as possible. During the first clinic, the pharmacists will vaccinate all staff and residents on site. The second clinic will be held a minimum of 28 days later and the pharmacists will vaccinate staff/residents from the first clinic with their 2nd dose of COVID-19 vaccine and catch anyone they may have missed on first date with their first dose. The third clinic will occur 28 days after the 2nd clinic and pharmacies will vaccinate anyone from the second clinic that needs their 2nd dose.

### Why do the data from past days change and how often are data updated?

Doses administered are reported by the date of vaccination. Providers have 24 hours to report vaccination to MDHHS. MDHHS pulls the data each morning for cleaning and then posting to the website by 3 pm, Monday through Friday. Previously reported numbers of administered vaccine doses may change as new data are received.

### Where can I get more information about COVID-19 vaccine?

For healthcare provider information about COVID-19 vaccine, visit the MDHHS website [COVID-19 Vaccine Provider Guidance & Educational Resources](#)

For frequently asked questions (FAQs) related to COVID-19 vaccine, visit the MDHHS [Frequently Asked Questions for the Public](#)

### Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

### Why do the data from past days change and how often are data updated?

Doses administered are reported by the date the vaccination occurred. Previously reported numbers of administered vaccine doses may change as new data are received. Providers have 24 hours to report vaccinations to MCIR. MDHHS pulls the data each morning for cleaning and then posting to the website by 3 pm, Monday through Friday.

### How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan). There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.) County is based on the county of residence.

### Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

\*Status of 'complete' excludes 1-2% of facilities nationwide that either 1) have requested a later date due to COVID outbreak or other reason; 2) were rescheduled due to not confirming their initial date, or 3) facilities that had to be rescheduled to be added to program after initial start date

# PUBLIC USE DATASETS

## COVID-19 Vaccines Shipped to Providers

### README

#### **Where does the vaccination data come from?**

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

#### **How is COVID vaccination coverage calculated?**

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

#### **Is COVID vaccination administration required to be reported?**

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

#### **How often are these data updated?**

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

# PUBLIC USE DATASETS

## COVID-19 Vaccine Doses Administered

### README

#### **Where does the vaccination data come from?**

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

#### **How is COVID vaccination coverage calculated?**

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

#### **Is COVID vaccination administration required to be reported?**

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

#### **How often are these data updated?**

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

**\*\*\* Demographics Variables are not currently included in Public use Datasets due to small sample sizes. Additional data will be added as the amount of data increases. \*\*\***

**COVID-19 VACCINE DOSES ADMINISTERED 2021-01-18**

Data as of	Week	Activity	Person's Residence in Preparedness Region	Person's Residence in Local Health Department Jurisdiction	Person's Residence in County	Vaccine Type	Facility Type	Dose Number	Number of Doses
1/15/2021	2	2021-22	No Preparedness Region	No County	No Local Health Department	Moderna	Federally Qualified Health Center	First Dose	20
