**Note on cumulative counts:** This report is provisional and subject to change. As public health investigations of individual cases continue, there will be corrections to the status and details of referred cases that result in changes to this report.

**Note on the deaths:** Deaths must be reported by health care providers, medical examiners/coroners, and recorded by local health departments in order to be counted.

**Note on county classification:** For consistency with previous outbreak reporting methodology, the Michigan Department of Corrections (MDOC) has been added as a separate jurisdiction under the "Other" category. This has resulted in the reclassification of some confirmed cases previously indicated among county case counts.

Cumulative Number of Specimens Tested for COVID-19 - Last Updated 3/27/2020 13:00			
Lab Type	Negative Tests	Positive Tests	Total Specimens Tested
Commercial	1167	66	1234
Hospital	6324	2348	8773
Public Health	3033	722	3762
Grand Total	10524	3136	13769

**Notes:**  
This is a new reporting system and additional laboratories will be included over time. Counts of specimens tested positive will not equal number of people with COVID-19. People may have more than one test or may have had their test from an out of state lab.  
Total samples tested includes test that were negative, positive, and inconclusive.  
Commercial labs only includes data from LabCorp.  
Public health labs include the Michigan Department of Health and Human Services Bureau of Laboratories.  
Counts represent the total specimens tested, not total patients tested. A patient can have more than one specimen tested, therefore the number of specimens tested may be more than the number of patients tested.
