Stevenson estate provides $300,000 for short-term loans

The estate of a former Western faculty member, Elaine L. Stevenson, has provided more than $300,000 to be used for short term loans to WMU students. Miss Stevenson, an assistant professor of art from 1917 to 1960, died last August at age 91.

The Elaine L. Stevenson Short Term Loan Fund is expected to almost double Western's capacity to make short term loans, according to Dr. Edward W. Harkenrider, director of student financial aid and scholarships.

This largess and generous individual devoted her life to the education of students. Because of her magnificent gift, future generations of WMU students will be able to complete their education, said Paul Knudstrup, director of planned giving services. He explained that Miss Stevenson established a trust some years ago with the American National Bank and Trust Co. for management of her assets during her lifetime.

The short term loan in recent years has become a mechanism whereby a student with insufficient funds for one lump sum payment of tuition costs is able to spread out such payments, said Harkenrider. "The loan is then repaid during the semester of enrollment with dollars earned or borrowed under a long term program. I'm quite certain that a number of students would not be enrolled each semester had they not received such a short term loan."

Harkenrider noted that more than 3,000 short term loans were made during 1981-82. "Students who ordinarily do not qualify for regular student aid programs, are assisted through the short term loan programs," he added. "Since the maximum period of these loans is six months, these loan funds are used over and over again, benefiting many, many WMU students throughout the years with emergency assistance in paying tuition and other educational expenses."

Stevenson received her A.B. degree from Western in 1913, B.A.E. degree in 1929 from the Chicago Art Institute, and M.A. in 1936 from Ohio State University. She also attended the Emma M. Church School of Art in Chicago for two years. She taught in the Kalamazoo Public Schools for two years before joining the WMU faculty in 1917.

Homecoming to recognize Western’s birthday.

"Recapture 80 Yesteryears" has been selected as the theme for Western's 1983 Homecoming celebration from Sunday, October 9, to Saturday, October 15. Proposed by the Student Homecoming Committee, the theme acknowledges Western's eightieth birthday.

This year's homecoming logo was designed by WMU senior Diane Zwingenberg, an interior design major from Grand Rapids. Diane is a member of the Student Homecoming Committee and co-chairs its promotion committee.

While Homecoming is normally nostalgic in nature, the '83 celebration will especially highlight the past and the University's history.

The Alumni office is working with a number of groups, providing organizational assistance for special reunions during this Homecoming birthday celebration. The Student Homecoming Committee is planning a week-long series of events for students. Alumni

Planned giving totals $10 million since 1974

Since 1974, Western has received more than $10 million in planned giving commitments from more than 300 individuals, according to a report made recently to the board of directors of the WMU Foundation.

"This remarkable achievement represents a major investment in the future of the University and its students," said Paul M. C. Knudstrup, director of planned giving services in the Office of Alumni Affairs and Development, who made the report. Persons participating in planned giving at Western have used a variety of techniques, Knudstrup said, including bequest clauses in their wills, life income trusts, and pooled income funds, as well as gifts of life insurance, real estate, and stocks and bonds.

"In many cases, the donor and his or her family have received financial benefits at the same time that they have helped future generations of WMU students," Knudstrup told WMU Foundation board members.

Planned gifts over the past nine years have assisted such diverse purposes as endowed scholarships, travel and study abroad for language students, program offerings in the John E. Fetzer Business Development Center, visiting scholar and lecture (Continued on page 11)

Medallion awards created

Western Michigan University has established the WMU Medallion Scholarships, which will be awarded to freshmen who demonstrate superior intellectual achievement. Each scholarship is valued at $20,000-$5,000 a year for four years.

The scholarships are to be funded by private donations through the WMU Foundation.

"These Medallion Scholarships are the most prestigious scholarships the University can award to freshman students," said J. Michael Kemp, trustee emeritus of the University at a recent meeting of the WMU Foundation board of directors. "They signify Western's commitment to encourage and recognize superior intellectual achievement."

Two WMU Medallion Scholarships already have been funded, one by Guido and Elizabeth Binda of Battle Creek and the other by Dr. Merze Tate of Washington, D.C.

Guido Binda is a noted architect in Battle Creek who has been recognized for his design of school buildings. His wife, Elizabeth, is a well-known civic leader whose memberships include the boards of Kellogg Community College, the Greater Battle Creek Foundation, and the American National Bank.

Merze Tate, a 1927 alumna of WMU, is a retired faculty member of Howard University.

Medallion Scholars will be selected by a committee appointed by President (Continued on page 11)
Denenfeld named vice president. Moskovis becomes associate

The promotion of Philip S. Denenfeld, associate vice president, to vice president for academic affairs was approved by the Board of Trustees, effective June 1. He replaces Dr. Elwood B. Erf, who resigned as vice president and was granted a leave of absence through June 30, 1984, as a professor of biology.

"WMU is indeed fortunate to have someone of Denenfeld's quality fill the leadership role in Academic Affairs," said President John T. Bernhard. "He is an astute, experienced, and highly regarded academic leader. In addition, he is a wise and trusted colleague. Thus I am confident that Dr. Denenfeld will enjoy the full support of the University community."

"I hate to be such a known quality," Denenfeld, who has been at Western since 1956, said. "There is no alluring mystery, no secret charisma, and I won't even be riding in to slay the fiscal dragons. In the immortal words of that great American, Popeye, 'I can't even ride a horse."

He is an astute, experienced, and distinguished public servant,'" Denenfeld said. "He is an astute, experienced, and distinguished public servant." Denenfeld said he would bring to his job "a very deep personal affection for and loyalty to Western. I expect to make many mistakes, but none of them from ignorance of the University or lack of commitment to it."

"I give you good intentions," he told the Board, "and, I hope, a great deal more."

A native of Highland Park, MI, Denenfeld served from 1956 to 1968 as a faculty member in the Department of English. He was associate dean for humanities in the College of Arts and Sciences from 1968-72 and associate vice president for academic affairs from 1972 to the present.

He received his B.A. degree in English composition and history in 1950 from Wayne State University, and M.A. in 1951 and Ph.D. in 1957 in English literature from Northwestern University, where he also taught from 1951 to 1954. He taught at Wilson Junior College in Chicago from 1954-56.

At Western, Denenfeld was the first person to serve two terms as president of the Faculty Senate, 1961-63, chaired the All-University Committee on Undergraduate Education, which conducted a comprehensive study of undergraduate education at Western, 1970-71, and chaired the Committee on University Communications, 1982. He has been a member of the Michigan board of the American Civil Liberties Union since 1963.

Dr. Julius Franks, Jr., a Grand Rapids dentist, was granted the honorary title of Trustee Emeritus by Western's Board of Trustees June 17 for his "dedicated and distinguished public service" as a member of the Board from its beginning in 1964 until his retirement earlier this year. The Board's resolution cited Franks for "conscientiously and diligently expressing "a deep and sincere interest in the welfare of the University, for his commitment to providing student scholarships, for his support of their health care and the costs to students for tuition and room and board." Franks also was recognized for his willingness "to accept special assignments and give generously of his time and talents to the University."

The promotion was approved by the Board of Trustees.

Dr. Moskovis was an excellent faculty member and department chairman, and for almost six years now has rendered outstanding service to the Office of Academic Affairs in a variety of demanding roles: as administrator of a number of units, budget officer; planner; problem-solver; and advocate of quality education. He has earned widespread acceptance and respect, is thoroughly familiar with the University, and is sensitive, reliable, and personable."

Moskovis earned his Ph.D. degree at Michigan State University. He previously was chairman of what is now the Department of Business Information Systems, a post he held between 1971 and 1977. Between 1969 and 1971 he was an associate professor at California State University, after serving as an associate professor in the WMU College of Business between 1962 and 1969.

Between 1955 and 1961, Moskovis was a teacher in the Akron, OH, public schools. He received his master's degree from New York University and completed a bachelor's degree at Miami University of Ohio.

Continuation budget approved with deficit

Western's Board of Trustees has authorized the University's administration to revise the 1982-83 General Fund budget, and to temporarily continue normal operations into 1983-84 under the authority of the 1982-83 budget.

The revised General Fund budget of $76,159,400 carries with it a deficit of $1,116,100. The original budget approved by the Board was for $74.2 million.

"This is the first time I've recommended to the Board that it approve a budget revision that included a deficit," said Robert W. Wetnight, vice president for finance. "We simply were unable to absorb the most recent executive order budget cut of $1.8 million that came this April."

Of that $1.8 million, 75 percent or $1.35 million affected the budget for the University's current fiscal year. The rest will have to come out of next year's budget. In addition, the University will earn about $250,000 less in investment income than planned due to the state not paying the appropriation on schedule.

A deferred-payment plan announced in April by the state is to return only 85 percent of that amount to Western by June 30, with the balance provided by September 30. "That plan is on schedule," Wetnight said. "We expect to receive all of our deferred funds by the end of the state's fiscal year on September 30, but there simply is no guarantee that will happen."

Emeritus status granted to two former trustees

Dr. Julius Franks, Jr., a Grand Rapids dentist, was granted the honorary title of Trustee Emeritus by Western's Board of Trustees June 17 for his "dedicated and distinguished public service" as a member of the Board from its beginning in 1964 until his retirement earlier this year. The Board's resolution cited Franks for "conscientiously and diligently expressing "a deep and sincere interest in the welfare of the University, for his commitment to providing student scholarships, for his support of their health care and the costs to students for tuition and room and board." Franks also was recognized for his willingness "to accept special assignments and give generously of his time and talents to the University."

Dr. Michael Kemp of Kalamazoo, center, has been awarded emeritus status by a Board of Trustees resolution that cited his "dynamic leadership and wise counsel." With him here are Dr. Alfred L. Edwards of Ann Arbor, chairman of the Board, left, and President John T. Bernhard. Kemp, who had been chairman of the Board, December after serving eight years on the University's governing board. The resolution recognized Kemp for his "particular concern and support for academic excellence," for his significant contributions to the WMU Foundation, and for his service as a volunteer leader of the University's "Partners in Progress" capital campaign.
Sky Broncos win at national air meet

The Sky Broncos Flying Club of the Department of Transportation Technology won the national championship of the National Intercollegiate Flying Association (NIFA) during the 35th annual meet May 5-7 at the W. K. Kellogg Regional Airport in Battle Creek.

About 300 competitors from thirty universities in the United States competed in events such as precision landing, cross country navigation, computer accuracy, aircraft recognition, and a message-drop event.

In addition to the national championship trophy, the Sky Broncos won the top award in the flying competition and received the Bendix Flying Team Championship award. WMU also was the top team in ground events and received the championship award.

The team also won the Leong Perpetual Trophy, the premier award of NIFA. It is presented annually to the school that, during the past year, has been outstanding as a team in competition performance and air safety, as well as in total aviation activity on campus and in the community.

Gravure printing capital campaign launched in June

Western has launched a special capital campaign within printing and allied industries for $800,000 to "expand gravure-flexography printing facilities and opportunities" in the Department of Industrial Technology and Education.

The campaign already has received several major in-kind gifts. The major gifts include a four-color Champlain gravure press, valued at $110,000 from the American Can Co.; an H-193 Helio-Klischograph, an electronic cylinder engraver valued at $200,000 from the Carton and Container Division of the General Foods Corp. in Battle Creek; a two-color Zerand flexographic press valued at $75,000, from the International Paper Co.; and a single-color ATF gravure press valued at $10,000.

The Gravure Technical Association (GTA), through its foundation, has awarded Western a $25,000 challenge grant that includes $5,000 for 1982-83 and $5,000 for every $100,000 contributed to the campaign, up to the maximum of $25,000.

The campaign goal includes $150,000 for operating endowment. The new emphasis on gravure-flexographic printing builds on the department's program in printing management and marketing, now in its twenty-fifth year.

The University has made available a building, valued at $350,000, as the location for the program in gravure-flexography printing. In addition, substantial funds for planning and implementation already are committed, and teaching and support staff have been designated specifically for the program.

 Participating in the presentation of a Helio-Klischograph electronic gravure cylinder-making machine are, from left, Dr. James Mathews, dean of the College of Engineering and Applied Sciences; President John T. Bernhard; Homer C. Scopi, cox, general manager of the Carton and Container Division of the General Foods Corp.; Michael Villaire, Grosse Pointe Woods; James T. Jones, Detroit; James T. Jones, Grosse Pointe Woods; and Kevin Miller, Portage.

Hockey band at Cedar Point

"The Real Hockey Band," a group of five WMU instrumental music majors who perform at home hockey games, was selected to perform daily at the Red Garter Saloon at Cedar Point in Sandusky, Ohio this summer. The band, which calls itself "The Hot Time Band" while at Cedar Point, performs five to six times a day. It was selected after applying and auditioning in January. Music played by the band includes familiar and well-loved older tunes as originally written, and others arranged by band members.

Emeriti write book

Two retired WMU faculty members have written a book on libraries as family institutions, titled "Library Service for Families." The authors are Margarette Bachthold and Eleanor R. McKinney, who were associate professors in the School of Library and Information Science from 1967 to 1981. The book contains chapters on family development, influences and pressures, the implications for libraries, and the needs and rights of families.

Western Herald editors receive awards

Four editors of the WMU student newspaper, the Western Herald, have been recognized by the Detroit Press Club Foundation as recipients of the Thomas E. Groehn Memorial Award. The Herald also received three of six other awards in the college division. The Thomas E. Groehn prize of $750 was given to Herald staff members for a series of articles concerning the alleged discriminatory admission practices of a Kalamazoo night club. The series resulted in the closing of the club, which later re-opened under new admissions policies and a new name.

Students honored for their work in the series were Daniel J. Klepp, Rochester; James T. Jones, IV, Detroit; Michael Villare, Grosse Pointe Woods; and Kevin Miller, Portage.

New Cistercian Studies publications

Four new volumes were recently published by Cistercian Publications, Inc., a sponsor of the Institute of Cistercian Studies at WMU. The volumes consist of papers, homilies, symposium summaries, and historical documents.

Honor and Memorial Funds

The following Honor Fund recognizes a Western faculty emeritus: Delilah M. Herman Debate Loan Fund

Anyone wishing to make contributions to honor an alumnus or faculty member, memorialize a friend, or commemorate an important occasion, may do so by sending a check to the WMU Foundation.
The clinic, which Van Riper founded in 1936, now provides diagnostic and therapy services to more than 500 clients each year. The department offers a pre-professional program at the undergraduate level, and accredited master's degree programs in speech and language pathology and in audiology.

Under Van Riper's leadership, the Department of Speech Pathology and Audiology was established officially as an independent department in 1965, and 15 years later became one of the first academic programs to be accredited by the Board of Examiners in Speech Pathology and Audiology. A severe stutterer himself until the age of 26, Van Riper is the author of nearly thirty books, including the major introductory text in communication disorders and two definitive works in stuttering.

Born in 1905 in Champion, MI, one of three children of an Upper Peninsula physician, Van Riper maintains a large part of the north woods. He has written a series of reminiscences of his early years, Tales of the Northwoods, now in three volumes illustrated by his daughter, Susan, one of three children.

An ardent fisherman and gardener, Van Riper maintains an eight-acre farm southwest of Kalamazoo and spends summers on Van Riper Lake, located near Champion and the state park that bears his father's name. His biography of his father, Paul, has just been published by the Marquette Historical Association.

Van Riper, known as "Van" or "Dr. Van," spent two years at Northern Michigan University before going to the University of Michigan in 1926, where he received a master's degree in physics and English, and a master's degree in English. He completed a Ph.D. degree in psychology at the University of Iowa, where he had gone for help with his own speech problem, and worked there with many other pioneers in the field.

In 1936, the same year he came to Western, he married Catharine Jane Van, the daughter of an Iowa physician and the first undergraduate speech-pathology major to graduate from Iowa. Their other two children are Catharine and John; Catharine has also become a speech therapist.

My sixties were to help me become wise and during this decade I soon found that it meant saying "No" very frequently. This was very difficult to do. I failed far too often and had some heart attacks as a consequence before I began to make a little headway. It's sure hard to become wise. One needs some leisure, some time for mulling over the relative importance of cabbages and kings and one's own ego needs.

I am now in my late seventies, the period I had designed for resignation and contemplation. I had thought it would be difficult to give up my very active life in therapy, research, and teaching, but it's been easy. I thought that I would be bored, but I don't think I've had a single moment of ennui. The minutes, days, and years pass by swiftly and each night as I first lie abed, I review the good things that counts in each stanza (and there are many of them) as they will into yours, but somehow one manages to muddle through and survive. Once I was a bad stutterer, I aspired to be a researcher in the mushy stacks of a university library specializing in Anglo-Saxon literature. I got fired from that job because I couldn't talk well enough, but I still retain some bits of wisdom from those ancient bard's. Duer's Lament is the oldest poem in the English language that had a refrain. It was composed by a troubadour who re-counts in each stanza (and there are many of them) one of the terrible misfortunes that had happened to him. But the refrain for each of the stanzas is the same: "That was o'errased; this shall be also. As my Grandpa Gage shouted, as he fell off a bridge into a pool and came up smiling, "Enjoy! Enjoy! Enjoy!"

I never did make any plans for my eighties. Do you have a suggestion?
Alum who overcame speech disorder is now with CNN

During her years in school, Rosalyn M. Abrams would have had trouble pronouncing "super station WTBS," but today she is an employee with the Atlanta television station. "Roz," as she is better known, received her bachelor of science degree in sociology and speech from Western in 1970 and was a member of the Delta Sigma Theta Sorority.

Because of a speech problem which plagued Abrams as a child, she had difficulty pronouncing the letter "s." In elementary school she attended speech therapy classes to correct the problem. In 1971 the Lansing native went to the University of Michigan for her master's degree in speech and, even though she received the degree, there was no job to be found. During her speech classes, Abrams became increasingly interested in public speaking and she eventually began working as an intern at WJIM-TV in Lansing while working full-time for Lansing's Model Cities program.

Tourism and travel—a growing industry

Despite recent economic difficulties, the field of travel and tourism appears only representative of higher education in the field of travel and tourism, including many in the growing field of retail travel, including those in travel agencies and with the airlines, cruise-ship companies, the railroad, and recreation-tourism-planning.

Western is a pioneer in travel and tourism education. Quandt established the first course in the field at Western in 1974, with one student. In 1981 the program became official and now more than fifty students are enrolled.

When asked why she decided to go into radio work Abrams says, "I simply decided to try it as an intern and it was a classic story. I got a lot of lucky breaks.

"That internship gave me a foundation. When I moved to Atlanta two years later, I got on a radio station here and was able to really start to learn journalism... and get paid for it."

When Abrams moved to Atlanta in 1974 she had no job. After two radio station jobs in news, she was hired at WXIA-TV in Atlanta. That presented another kind of "problem" for Abrams who says, "When I left radio, I had to deal with my ample body. I have lost a lot of weight over the course of my career. I don't know if it made a difference—I know it certainly didn't hurt."

About two years ago the owner of Cable News Network, Ted Turner, added an hour-long newscast on "super station WTBS" and he selected Abrams as the co-anchor. Now Abrams anchors newscasts on CNN and works on the WTBS program "Week in Review," which is broadcast on Sunday nights.

Can a gift to W.M.U. actually increase your income?

Yes. A gift to the WMU Pooled Income Fund:

• provides you with income for life, often at a rate higher than you could obtain from certificates of deposit, stocks and bonds, or other investments

• offers income and estate tax savings that can further increase the yield on your investment

• permits you to shift investments for greater income, without capital gains tax penalties

• provides a hedge against inflation through expert investment management

• saves time and money by relieving you of daily investment responsibilities and financial management expenses

A gift to the WMU Pooled Income Fund is designed to give twice.

1. It gives income to you (and to another person, if desired) for life.
2. It gives principal to Western Michigan University.

If you would like to see how a tax-deductible investment in the WMU Pooled Income Fund could work for you, please fill in the information coupon and return it to us. Naturally, this imposes no obligation on you. All information will be kept confidential.

Please print or type.

□ Please send more information on the Pooled Income Fund

'You and the 1981 Tax Act'

Copies of this informative booklet are still available and will be sent to you upon request.

Some of the more significant features of the '81 Tax Act include:

• Unlimited marital deduction

• Phased-in cuts in estate tax rates

• Increased "exemption equivalent" for estate transfers

• Increased gift tax exclusions

• Individual Retirement Account exemptions

• All-Savers Certificate exemptions

• Income tax rate reductions

• Capital gains tax rate reductions

For more information, please write Paul Knudstrup at the WMU Foundation.

When was the bill signed which provided for the establishment of Western?

What Michigan governor signed the bill?

What governor signed the bill making Western a university?
Kemper designs live on at Western

The Western seal, dinner programs, book jackets, and brochure covers are among the 370 designs that have come from the drawing board of John G. Kemper, retired professor emeritus of art.

Kemper taught art history, commercial art, and various other art courses at Western for twenty-eight years, retiring in 1970. He then continued designing items for the University for another seven years. He still designs his own Christmas cards each year.

Kemper’s work was the subject of a show last fall in Sangren Hall called “Design for Western.” It featured work he did for the University. The University Archives has a collection of 370 graphic art designs Kemper created during his thirty-five year association with Western.

Kemper was asked to design the University seal in 1957 and says the project was “challenging.” He was given a basic idea of what should be included in the seal and the symbolism was left to him. Kemper says he spent about fifteen hours designing the seal and the only change made from his original proposal was in the number of stars. He had drawn six stars as a symbol of aspiration, but that was changed to five—one for each college within the University at that time.

Another design by Kemper for the University was the dinner program in recognition of former president James W. Miller. Kemper used an oak tree on the cover, with thirteen leaves and thirteen acorns to symbolize Miller’s thirteen years as President of WMU and his life in “The Oaklands,” which was his official residence while at Western.

Kemper designed this official University seal to replace the seal of Western Michigan College. The tree symbolizes the growth of the University; the stone arch to the right of the tree symbolizes a gateway to knowledge, with the unfinished keystone indicating that the growth of WMU is not yet complete; the pyramid indicates the building of knowledge and the flame signifies enlightenment; the stars stand for each of the five original colleges of the University.
80TH ANNIVERSARY PHONE-A-THON—In an effort to increase the percentage of alumni donors, an eight-week phone-a-thon was held during May and June. Donna E. Mortimore, right, alumni relations, says the phone-a-thon is part of the observance of Western's 80th anniversary. She is shown here with one of the callers, Claudia King, a senior from Detroit. According to Mortimore, after six weeks more than $55,000 was pledged and there were more than 2,000 new alumni contributors. Another phone-a-thon is scheduled to begin the first week of September.

Business trends continue upswing

Business conditions in Southwestern Michigan continue to strengthen, according to the results of a monthly survey of members of the Southwestern Michigan Association of Purchasing Management.

The survey is conducted by Dr. Brian G. Long, associate professor of marketing, who said data gathered in late April resulted in an "excellent" report for May.

"Even though economic recovery has started," Long said, "all sectors of the economy, especially capital equipment, have yet to feel the upturn." He added that several capital equipment firms probably waited until June before things started to move for them.

In general, Long said, he expects "the economy to improve at a steady pace for the next few months, providing purchasers are able to continue to hold the line on prices and interest rates behave." 

Dunnigan named to Foundation board

Joseph J. Dunnigan, who retired last August as executive director of the Greater Kalamazoo United Way, has been named to the board of directors of the Western Michigan University Foundation.

"We welcome Joe Dunnigan to the board with enthusiasm and appreciation," said Russell L. Gabier, assistant vice president for alumni affairs and development and executive secretary of the Foundation board. "His unique perspective on our community will bring special insight to the work of the board."

Dunnigan was named to the Foundation board during its regular spring meeting June 15. The Foundation, which has nearly thirty members on its board, was established in 1976 to provide and encourage private support to the University.

Amoco funds geology fellowship

The board of directors of the Amoco Foundation of Chicago has approved an Amoco Foundation masters degree fellowship in geophysics at Western for the 1983-84 academic year.

The fellowship will be funded with a grant of $4,000 and supplemental funds for research; it may be used as a stipend for tuition, fees, and other costs for the recipient.

The award will go to a student who will pursue a master's degree in geophysics during the 1983-84 academic year. The winner will be selected on the basis of academic achievement and interest in geophysics.

Mott grant totals $170,000

The Evaluation Center in the College of Education recently received a $170,000 grant from the Charles Stewart Mott Foundation of Flint. It will be used for evaluating the Foundation's program to strengthen historically and predominately black colleges and universities. The evaluation will help the Foundation, and these colleges and universities, increase their efforts to improve educational opportunities for minority students.

The project is under the direction of Dr. Daniel L. Stufflebeam, professor of education and director of the Evaluation Center. Dr. Ronald A. Crowell, associate professor of education and professional development will direct part of the project.

Under the Mott Foundation grant, the program has been approved by thirty colleges and universities, which likely will pursue a master's degree in geophysics during the 1983-84 academic year. The winner will be selected on the basis of academic achievement and interest in geophysics.

It will be used for evaluating the Foundation's program to strengthen historically and predominately black colleges and universities. The evaluation will help the Foundation, and these colleges and universities, increase their efforts to improve educational opportunities for minority students.

The project is under the direction of Dr. Daniel L. Stufflebeam, professor of education and director of the Evaluation Center. Dr. Ronald A. Crowell, associate professor of education and professional development will direct part of the project.

Under the Mott Foundation grant, the program has been approved by thirty colleges and universities, which likely will pursue a master's degree in geophysics during the 1983-84 academic year. The winner will be selected on the basis of academic achievement and interest in geophysics.

Dunnigan named to Foundation board

Joseph J. Dunnigan, who retired last August as executive director of the Greater Kalamazoo United Way, has been named to the board of directors of the Western Michigan University Foundation.

"We welcome Joe Dunnigan to the board with enthusiasm and appreciation," said Russell L. Gabier, assistant vice president for alumni affairs and development and executive secretary of the Foundation board. "His unique perspective on our community will bring special insight to the work of the board."

Dunnigan was named to the Foundation board during its regular spring meeting June 15. The Foundation, which has nearly thirty members on its board, was established in 1976 to provide and encourage private support to the University.
1920
Ruth Berka Cassin, TC '20, has been married more than sixty years. She lives in Barrington, IL.

1923
Homer Arnett, TC '23, BA '25, has received the Distinguished Service Award of the Kalamazoo Parent-Teacher-Student Association for "extraordinary contributions to children and youth." Arnett is a Kalamazoo attorney and was a Michigan legislator for ten years.

Oscar E. Johnson, TC '23, BA '25, and Leo Redmond, TC '23, MA '38, are two of five WMU alumni named in April in the Hall of Fame of the Michigan High School Football Coaches Association.

Margaret Nicholson Maynard, TC '23, BA '26, was honored in April by the National Federation of Republican Women in a "Michigan Tribute to Women" program held in Grand Rapids. She was the first woman to chair the Kalamazoo County Republicans and headed the Kalamazoo County Republican Women's Club for three terms.

1928
The late Guy Houston, BS '28, was one of five WMU high school coaches to be inducted last month into the upper Peninsula Sports Hall of Fame. In 1932 he was named to the All-Michigan College Football Coaches Association.

1933
Stan Bilski, BS '33, onetime Bronco football star, was inducted last month into the upper Peninsula Sports Hall of Fame. In 1932 he was named to the All-Michigan College Football Coaches Association.

Class of '58 to celebrate Silver Anniversary
Twenty-five years have passed since the class of 1958 received degrees from Western Michigan University. The WMU Alumni Association will host a reunion to commemorate this occasion on Homecoming weekend, October 14 and 15.

A reunion committee comprised of Larry Harding, Don Brems, Hazel Beckwith Carpenter, Aaron Middleton, Charlie Miller, John and Fae (Neildinger) Milnes, Alan and Arlene (Ramsey) Quick, Fred Strong, Ray Vandersteen, Bill Wain, Charlie Weir, and Janet Clapp Wilson are working with the WMU Alumni Office to make the reunion a special weekend for all class members.

A reunion dinner will be held Friday, October 14 at the Kalamazoo Center Hilton. This dinner program will provide '58 classmates with an opportunity to get re-acquainted, to reminisce, and to learn how Western has grown and developed since graduation.

Saturday, October 15, the class will join other WMU alumni in the many Homecoming activities. Special tables and seats have been reserved at the alumni luncheon, football game, and Afterglow dance.

The reunion committee hopes all class members will plan to reunite in Kalamazoo October 14 and 15. Details will be mailed in late August.

Alumni Association new life members

Charles F. Ake, BBA '53, and Nancie siland Ake, BS '55, Middletown, R1
G. Avery Aten, BA '54, and Grace Appleyard Aten, BS '58, Battle Creek
Thomas Reed, BS '53, and Nancy Bulland Berald, BBA '80, Kalamazoo
Gary E. Brown, BA '70, Columbus, OH
Elizabeth Butler, BA '81, Bowling Green, OH
Douglas G. Charnley, BBA '78, and Kelly Flynn Charnley, BBA '78, Kalamazoo
Marilyn R. Conrad, BS '57, St. Joseph
Keith R. Darr, BBA '74, and Sheryl Douglas Darr, BS '72, Coldwater
Larry Dillon, BS '67, MA '74, and Joan Snyder Dillon, BS '66, Battle Creek
Elizabeth A. Doran, MAA '70, Fox Lake, IL
Anne C. Snyder Dunlap, BA '46, MA '67, Battle Creek
Catherine Makin Dunn, BS '34, Laguna Hills, CA
Evelyn Smith English, BS '37, Auburn Heights
Michael Pracker, BS '73, Comstock
Kimberly S. Frankel, BA '90, Oak Park
Betty Clark Frenkenhuis, BS '57, Battle Creek
Bruce G. Gregory, BS '89, Coldwater
Robert J. Handel, BBA '79, San Antonio, TX

Pamela Borie Williams, BA '71, Bloomfield Hills
William H. Wint, BS '63, Clarkston
Robert J. Winger, BS '73, MA '79, Kalamazoo
Emily Bronswaugh Wood, BS '77, MA '90, Battle Creek
Naomi Yamada, BA '64, Shiki, Japan

AEB Corner
Delta chapter hosts a birthday party for WMU
Delta chapter's spring banquet was a birthday party for Western Michigan University, which is celebrating its eightieth this year. Maxine Vanderberg was toastmistress, and her words and sentiments are worth sharing with all alumni: "The real guest of honor at our party tonight is our alma mater which is celebrating her eightieth year. We all have fond memories of years we spent with her.

Although each of her years were important to her growth and development, some of them were real milestones, such as the day she was born—May 27, 1903—and named Western State Normal School." The evening closed with Delta members standing to sing "Happy Birthday" to their alma mater.

had formerly been a group vice president in Minneapolis. He lives in Greenwich, CT.

1961
James C. Leighty, BS '61, MA '62, is now regional marketing manager for Federated Insurance Cos. He lives in Grand Ledge.

Jerry A. Male, BS '61, has been named vice president for personnel of Clausing Corp., Kalamazoo. He had been general manager of Claussing's Fitcher St. plant.

William A. Miller, BS '61, is the new principal of the River Road Elementary school, Oscoda. He has been in Oscoda for seven years.

Contributions for either purpose, or both, may be made through the WMU Foundation. The memorial fund will be administered by a committee of two computer science faculty members and two Computer Club members. Com- mittee members will not be eligible for the award while they serve on the committee.

Memorial fund honors Jim Sleep
A memorial fund has been established at Western in memory of the late James Sleep. He was a student and instructor in the Department of Computer Science. Sleep, who was a founder of the WMU Computer Club, was the creator of numerous works of computer art and the author of a library-search system for WMU libraries. The fund will be used for two purposes, one for a short term loan fund for computer science students, and the other for an award fund for computer-related projects. Contributions for either purpose, or both, may be made through the WMU Foundation. The memorial fund will be administered by a committee of two computer science faculty members and two Computer Club members. Committee members will not be eligible for the award while they serve on the committee.

Medallion awards (Continued from page 1)
John T. Bernhard and the executive committee of the WMU Foundation Each Medallion Scholar will be provid- ed with a faculty scholar-mentor to en- courage, assist, and advise the student in his or her academic program. The application deadline for the first Medallion Scholarship is Feb. 15, 1984. They will be awarded to graduating high school seniors based on superior academic achievement. Preference will be given to Michigan residents or to students from a specific location in- dicated by the sponsor. Recipients must be U.S. citizens and financial need is not a criteria for selection. Medallion Scholarships may be given in memory of a loved one, to honor a teacher, relative or friend, in the donor's own name, or in the name of an organization, said Russell L. Gabler, executive secretary of the Foundation.

They may be used to support higher education, to reward or encourage a student in the donor's field of interest, or to stimulate interest in an aspect of a company's operation.

Planned giving (Continued from page 1)
Union, Korea, Canada, and many other countries.

This was supposed to have been a Spring review... rebuilding year for Western's baseball team, according to Coach Rob Buck. "Jackie has all the physical tools needed to be an outstanding volleyball player," says Buck who has been 66-17 with Backus on the court. "She will represent Western Michigan University and the U.S. well at the World Games." Backus is the third Bronco female athlete to earn a spot on a U.S. team for the World University Games. The others were basketball players Phyllis Charity, who did so in 1973 and 1977 respectively.

Stassen, Decker are top scholar-athletes

Tennis player Jeff Stassen and distance runner Melanie Decker have been selected as Western's outstanding senior scholar-athletes for 1983. These awards are presented annually at all ten Mid-American Conference schools. Stassen, from Dearborn, carries a 3.48 (4.0 scale) academic average in secondary physical education. As a member of Coach Jack Vredevelt's tennis squad, he won 120 career singles and doubles matches to rank No. 6 among all-time Broncos. In MAC tournaments, he was a No. 5 singles semi-finalist and No. 3 doubles finalist in 1981, a semi-finalist at No. 6 singles and No. 2 doubles the following year, and a No. 2 doubles semi-finalist in 1983.

Vicksburg native Decker has a 3.67 GPA and tied for 14th in the 10,000-meter varsity record holder. She ran the women's track 10,000-meter varsity record holder (35:59.07) and won this race at the 1982 MAC championships. At the 1983 meet for Coach Debbie Hunt's team, she was fourth in the 10,000 and third in the 5,000-meter race. Decker also earned All-MAC cross country honors with a sixth place finish in 1982, improving her junior year finish by seven spots.

Spring review...

Baseball

This was supposed to have been a rebuilding year for Western's baseball team, but Coach Fred Decker's squad won a second straight Mid-American Conference West Division crown with a 26-21 overall mark. Along the way, second baseman Joe Ghema (.415), shortstop Tim Gourlay (.371), and pitcher Brian Dunkle (28-5) won individual loop titles at No. 1 and No. 2 singles respectively. Dunkle and Mike Woody (29-3) took league honors at No. 1 doubles, while Dave Sommerville and Jeff Stassen (13-5) were finalists at No. 2. Vredevelt is now WMU's all-time coaching win leader with a 173-71 mark over his ten-year tenure.

Golf

The Western golf top spring showings were a fifth at the Wolverine Invitational and a sixth at the Illini Invitational, held at Michigan and Illinois respectively. The Broncos were seventh in the Mid-American Conference as Steve Ellsworth shared twelfth place in individual standings. Brad Rosier led the team with a 173-71 mark over his ten-year tenure.

Women's track

Coach Debbie Hunt's team was second in the MAC and took title honors at the Murray State Invitational during its outdoor campaign. In the process, the team set new varsity records in nine of nineteen events.

In the MAC's, Western had wins from Kayla Skelly in the 5,000 and 5,000-meter runs, and Lisa Mowers, discus. Team "MVP" Maria Shoup was second in the 400 hurdles, and third in the 100 hurdles and long jump. Other Mid-Am second places were picked up by Maggie Lillie in the 10,000-meter and Monique Ozimowski in the 100 hurdles.

Women's tennis

Coach Fran Ebert's team had a 24-11 showing and was second in the Mid-American Conference championship tournament. Four Broncos earned all-league acclaim. They were pitcher Beth Belleville (.154, .333 ERA), third baseman Terri Sonon (.374, 23 RBI's), second sacker Linda "Louise" Berndt (.273), and shortstop Deb Albano (.246).

Belleville, who also hit .313, ended her career with school records for RBI's (67) and doubles (17). Other career marks were Sono's .333 batting norm, Berndt's 167 hits, and 181 games played for leftfielder Allison Cole.

Brons fourth in Reese standings

A first place West Division baseball championship, second in the tennis championship, and a third in track this spring enabled WMU to place fourth in 1983 Reese Cup standings for men's all-sport competition in the Mid-American Conference. This marks the ninth consecutive year in which the Broncos have recorded a first-division finish in the ten-member league, and the fifth straight year in which they have finished ahead of rivals Eastern and Central Michigan.

Besides the three strong spring showings, WMU received other key points with a second place during the 1982 football race.

Gary Fund ends

The 1983 goal for the Gary Athletic Fund was $32,000 and virtually all of that figure was realized during the annual five-week campaign, which ended with a $11,000 victory last Saturday.

Fund director Bill Doolittle reported that 1,846 contributors had pledged monies in the amount of $312,000, plus another $9,000 for gifts-in-kind. Included in these figures were pledges for $177 square yards of new artificial turf in Waldo Stadium.
