WMU ScholarWorks Citation

"Nowcasting and Forecasting with Big Data"

Domenico Giannone is Assistant Vice President at the Federal Reserve Bank of New York and Research Fellow of the Centre for European Policy Research (CEPR). His general fields of research are time series econometrics, forecasting, monetary policy, and business cycles. He has been Professor of Economics at the Université libre de Bruxelles and Assistant Professor of Econometrics at LUISS University of Rome. He has worked as Economist at the Monetary Policy Research Division of the European Central Bank and been Scientific Coordinator of the Euro Area Business Cycle Network. He is Associate Editor for the Journal of Business and Economic Statistics, the Journal of Applied Econometrics, the International Journal of Forecasting and Empirical Economics. He holds a PhD from the Université libre de Bruxelles, 2004.

"Using Text to Quantify Policy Uncertainty"

Steven J. Davis is the William H. Abbott Distinguished Service Professor of International Business and Economics at the University of Chicago Booth School of Business and a Senior Fellow at the Hoover Institution. He studies business dynamics, labor markets, economic fluctuations, and public policy. He is also a Senior Academic Fellow with the Asian Bureau of Finance and Economics Research, Research Associate with the National Bureau of Economic Research, advisor to the U.S. Congressional Budget Office, Elected Fellow of the Society of Labor Economists, consultant to the Federal Reserve Bank of Atlanta and past editor of the American Economic Journal: Macroeconomics. Davis is known for his influential work using longitudinal data on firms and establishments to explore job creation and destruction dynamics and their relationship to economic performance. He is a co-creator of the Economic Policy Uncertainty Indices and the DHI Hiring Indicators. He co-organizes the Asian Monetary Policy Forum, held annually in Singapore. In 2013, he received the Addington Prize in Measurement for his research on "Measuring Economic Policy Uncertainty.”

In addition to his scholarly work, Davis has written for the Atlantic, Bloomberg View, Financial Times, Forbes, Los Angeles Times, and Wall Street Journal and appeared on Bloomberg TV, Channel NewsAsia, CNBC, CNN, Fox News, NBC Network News and the U.S. Public Broadcasting System.

All Lectures will be held in: 2028 Brown Hall from 12 to 1:15

All the lectures are free and open to the public. A light lunch reception will be available following each lecture.

This series is named for longtime WMU economics professor and former department chair Dr. Werner Sichel, who retired in 2004.

The success and longevity of this series is a testament to his vision and guidance.

FREE AND OPEN TO THE PUBLIC
William A. Barnett is the Oswald Distinguished Professor of Macroeconomics at the University of Kansas. He is Director of the Center for Financial Stability in New York City and Director of the Institute for Nonlinear Dynamical Inference in Moscow. He is Editor of the Cambridge University Press journal, Macroeconomic Dynamics and the Emerald Press monograph series, International Symposia in Economic Theory and Econometrics. He is author of the book Getting It Wrong: How Faulty Monetary Statistics Undermine the Fed, the Financial System, and the Economy, MIT Press. The book won the American Publishers Award for Professional and Scholarly Excellence for the best book published in economics during 2012. With Nobel Laureate Paul Samuelson, he also coauthored the book, Inside the Economist’s Mind, translated into seven languages. He is founder and President of the Society for Economic Measurement. He has published over 200 articles in professional journals and 45 books as either author or editor. His research has been published in 7 languages. He has received over 45 different awards and honors, including being a Fellow of the American Statistical Association, Fellow of the World Innovation Foundation, Fellow of the IC2 Institute at the University of Texas, Fellow of the Johns Hopkins Institute for Applied Economics, Honorary Professor at Henan University in China, and Charter Fellow of the Journal of Econometrics. He ranks in RePEc/IDEAS in the top 1% of the world’s economists in Impact Weighted Publications and in Average Rank Score.

Scott A. Brave is a policy economist in the economic research department of the Federal Reserve Bank of Chicago. His chief responsibilities include the releases for the Chicago Fed’s National Activity, Midwest Economy and Financial Conditions Indexes and its Survey of Business Conditions. Brave received a B.A. in economics with honors from the University of Chicago and an M.B.A. with concentrations in economics, statistics and finance from the University of Chicago Booth School of Business.

Chiarra Scotti is an assistant director in the Division of Financial Stability of the Board of Governors of the Federal Reserve System. Her policy responsibilities have evolved through the years, from issues related to international finance and unconventional monetary policies across the major central banks, to financial stability related issues, like the assessment of vulnerabilities in financial markets and institutions. Her research spans a variety of topics in applied macro and finance, like real-time data, real-time measurement of business conditions, macroeconomic surprises, and uncertainty, as well as the impact of unconventional monetary policy.
