# MIS-C Data and Reporting

## What is MIS-C?

Multisystem Inflammatory Syndrome in Children (MIS-C) is a condition in children and adolescents under 21 years of age where multiple organ systems become inflamed or dysfunctional which occurs in association with illness. Children with MIS-C may have a fever and various symptoms, including abdominal (gut) pain, vomiting, diarrhea, neck pain, rash, bloodshot eyes, or feeling extra tired. We do not yet know what causes MIS-C. However, many children with MIS-C were infected with the virus that causes COVID-19, or had been around someone with COVID-19.

Health care providers and local health departments are asked to maintain a high degree of suspicion for MIS-C in pediatric and adolescent patients presenting with symptoms similar to Kawasaki Disease or ill individuals who have been previously exposed to COVID-19 with signs and symptoms. Patients have presented with persistent fever\*, hypotension, multiorgan (cardiac, gastrointestinal, renal, hematologic, dermatologic, and neurologic) involvement, and elevated inflammatory markers. Respiratory symptoms have been present in some, but are not a common finding.

\*Persistent fever is a measured fever of 100.4°F (38.0°C) or greater for at least 24 hours, or report of subjective fever lasting at least 24 hours.

## Reported Cases of Multisystem Inflammatory Syndrome in Children (MIS-C)

Data will be updated on the first and third Thursdays of the month.

### Multisystem Inflammatory Syndrome in Children (MIS-C) Michigan Data Summary 4/7/2022

# Cases Confirmed and Reported to CDC*	287
MIS-C associated Deaths	5 or fewer
Cases admitted to ICU	188 (65.5%)
Onset Date Range	4/14/20 to 2/28/2022
Age Range	0-20 years

\*Meets CDC Case definition

<https://emergency.cdc.gov/han/2020/han00432.asp>

### DEMOGRAPHIC INFORMATION (N=287)

Age Group	Count	%	Race	Count	%
<1 yrs	10	3.5%	Black/African American	104	36.2%
1-4 yrs	66	23.0%	Caucasian	136	47.4%
5-11 yrs	141	49.1%	All Others / Unknown	47	16.4%
12-15 yrs	51	17.8%			
16-20 yrs	19	6.6%			
Gender	Counts	%	Ethnicity	Count	%
Male	178	62.0%	Not Hispanic or Latino	215	74.9%
Female	109	38.0%	Hispanic or Latino	23	8.0%
Unknown	0	0.0%	Unknown	49	17.1%

Red shading indicates the expected reporting lag for new cases. Cases with onset dates in this time period may not have been detected or reported yet.
