This Website is brought to you for free and open access by the Michigan COVID-19 State Data at ScholarWorks at WMU. It has been accepted for inclusion in Michigan COVID-19 Long Term Care Data by an authorized administrator of ScholarWorks at WMU. For more information, please contact wmuscholarworks@wmich.edu.

Coronavirus

CORONAVIRUS MICHIGAN DATA

LONG TERM CARE DATA

Data Validation Project

Ensuring accurate and timely reporting from nursing facilities has been a priority for the State of Michigan. The data is critical to guide state efforts and ensure sufficient support is provided where it is needed most, as well as to allow transparency for residents and families. MDHHS began collecting the data on April 23, and revised the reporting process to align with CDC/CMS requirements on May 22.

To address challenges in reporting, MDHHS initiated an individualized phone call campaign to validate and improve the accuracy of key data fields, clarify state and federal reporting expectations, verify facility staff access to the required systems, and address facilities' questions.

The campaign has improved adherence to reporting standards and has led many facilities to correct their reported data in EMResource.

- The number of facilities reporting in EMResource has increased by 6 percentage points, and almost all facilities have now reported with most reporting daily.
- 38 facilities reported cases for the first time in EMResource within days of the phone calls.
- More than 110 facilities reported an increased number of cases and/or deaths in EMResource to match the responses given over the phone.

Michigan's Long-Term Care data collection recently underwent a transition as MDHHS enhanced its data collection process to improve accuracy, timeliness, and to align with new guidance from the federal Center for Medicare & Medicaid Services.

Additional nursing facility data will be available once the it has been appropriately validated.

In the reporting period between June 23, 2020 - June 30, 2020, 99 percent of skilled nursing facilities (SNFs) in Michigan reported data to the Michigan Department of Health and Human Services (note: new facilities are included in the following tables but do not have reporting capabilities at this time). Facilities that have completed partial reports are included in this figure. Data will be updated daily, Monday- Friday.

As of June 30, the data below represents a cumulative total of confirmed COVID-19 resident cases, cumulative total of suspected and confirmed resident deaths, cumulative total of confirmed COVID-19 staff cases, and cumulative total of suspected and confirmed staff deaths reported by SNFs in Michigan since January 1, 2020. Case numbers are provisional and may change as facilities correct or add data. **The cumulative data under the new reporting system includes cases from January 1, 2020 through June 30, 2020.**

This information does not replace a thoughtful conversation with facility staff about their current infection control practices and mitigation strategies. Questions that families might ask a care facility include:

What are you doing currently to protect residents from COVID-19? What precautions do you take when you do identify a person who is symptomatic of COVID-19? How are families kept apprised of changes related to your infection control policies?

In addition, residents and family members should understand that the presence of COVID-19 at a facility is no way an indicator of a facility that isn't following proper procedures. Families should always feel free to ask questions of the facility where their loved one resides, and if not satisfied, contact their local ombudsman.

6/30/2020

Resident Confirmed Cases *	7303
Residents Recovered or Recovering	5516
Resident COVID-19 Deaths *	1998
Staff Confirmed Cases *	3296
Staff COVID-19 Deaths *	21
*Includes data that is undergoing additional validation	

Note: Some facilities have dedicated space to appropriately isolate and care for residents with COVID-19 and they may also be accepting individuals with COVID-19 that require nursing facility type care from the hospital. Additionally, some facilities are actively performing regular testing on all staff and residents, so counts may fluctuate as pending results become available.
