COVID-19 Vaccine Dashboard

Progress is based on the CDC data tracker, which includes MI residents vaccinated by providers not currently reporting to the state dashboard below: Veterans Affairs, Department of Defense, Bureau of Prisons, and most out-of-state providers. Data provided in the Michigan COVID-19 Dashboard below slightly undercounts the true number of doses administered to MI residents. See the "Learn More" tab below for details.

First-dose tracker above updated 3pm daily, except when CDC's data tracker updates later; then it is updated the following morning.

First-dose tracker above is for age 16+. Coverage maps below are for age 12+.

The Federal Long-Term Care Facility (LTCF) Pharmacy Partnership Program ended on 5/25/2021. There will no longer be updates to Federal Long-Term Care Facility (LTCF) Pharmacy Partnership Program Data. Some facilities were able to vaccinate all residents and staff by the second clinic and did not require a third clinic date.

Federal Long-Term Care Facility (LTCF) Pharmacy Partnership Program Data through of 5/23/21								
Pharmacy Phase	Activation Date	Facilities Assigned for Scheduling	Facilities with First Clinic Completed	First Dose Clinics Completed %	Second Dose Clinics Completed %	Facilities with Third Clinic Completed	Total Vaccines Administered (Residents & Staff)	Additional Clinics Scheduled Over Next 7 Days (includes today)
CVS Part A (Skilled Nursing Facilities)	12/28/2020	269	269	100%	100%	100.0%	68,675	0
CVS Part B (Other Long Term Care Facilities)	01/04/2021	717	717	100%	100%	100.0%	68,257	0

Totals		4067	4067	100%	100.0%	99.8%	289,206	0

Walgreens Data Source: <https://www.walgreens.com/topic/findcare/long-term-care-facility-covid-vaccine.jsp#stayinformed>

CVS Data Source: <https://cvshealth.com/sites/default/files/cvs-health-covid-19-vaccination-data.pdf> ***CVS data reported through 3/30/21.

Managed Health Care Associates Source: MHA [email report]

Walgreens Facilities Assigned for Scheduling decrease includes an estimated 1200 facilities transferring to Managed Health Care Associates pharmacies for administration, as well as facilities that have opted out.

Previous data posted for Managed Health Care Associates Part B was reported in error by MHA. The data posted today has been corrected by MHA to reflect the accurate numbers for Part B (Other Long Term Care Facilities).

At this time, Long Term Care vaccinations are not fully captured in the primary dashboard above. We are working on reconciliation and will update this note when complete.

CVS and Walgreens pharmacies plans to conduct three on-site clinics at each LTC facility to vaccinate as many residents and staff as possible. During the first clinic, the pharmacists will vaccinate all staff and residents on site. The second clinic will be held a minimum of 28 days later and the pharmacists will vaccinate staff/residents from the first clinic with their 2nd dose of COVID-19 vaccine and catch anyone they may have missed on first date with their first dose. The third clinic will occur 28 days after the 2nd clinic and pharmacies will vaccinate anyone from the second clinic that needs their 2nd dose.

Vaccination of detained individuals in Michigan Department of Corrections facilities through 6/25/21

Why does Michigan present two sets of information on vaccine coverage?

The Michigan Vacc to Normal Milestone Tracker provides the most complete estimate of the number of Michigan residents who have received their first doses of COVID-19 vaccine. The Vacc to Normal Tracker tracks the date when 55%, 60%, 65% and 70% of Michigan residents 16 years or older have received their first dose of vaccine and provides the date two weeks later when, if case rates are below 250 cases per million, the next steps to normalcy will move forward. This tracker uses data from the [CDC COVID Data Tracker](#) to provide most complete estimate of percent of Michigan residents with at least one dose of vaccine.

The Michigan COVID-19 Vaccine Dashboard provides detailed information on doses administered and coverage, including detail on time, county, age group, race/ethnicity and provider type. The Michigan COVID-19 Vaccine Dashboard uses detailed data from the Michigan Care Improvement Registry or MCIR. This registry collects doses from providers who have enrolled in the MCIR.

Why do statewide administration and coverage numbers not match what is on the CDC data tracker?

CDC has access to administration data from providers who are not currently reporting to the Michigan Care Improvement Registry including federal entities (i.e., providers at Veteran's Affairs hospitals, Department of Defense facilities, and Federal Bureau of Prisons) and out-of-state providers who administered vaccine to Michigan residents. This means that Michigan COVID-19 Vaccine Dashboard undercounts the true number of doses administered to Michigan residents.

For coverage, the Michigan COVID-19 Vaccine Dashboard reports the proportion of Michigan residents in age groups eligible for vaccination who have received the vaccine (currently people age 16 or older). In contrast, the CDC Data Tracker reports coverage for ages 18 and older or for the entire population.

Why do the totals on the Coverage Page not match the numbers on the Mi Vacc to Normal Milestone Tracker?

The Mi Vacc to Normal Milestone tracker includes Michigan residents who had their first dose of vaccine in federal facilities (e.g., federal prison or Veterans Administration Hospital) or out of state. The Michigan Department of Health and Human Services does not yet have access to those records. The data here provide an estimate of coverage rates for each county by age groups.

Why did the number of doses distributed increase so sharply?

As of 4/15/2021 the dashboard now reports doses delivered directly to providers in federal programs, including the federal Retail and Long-Term Care Facility Pharmacy programs, HRSA, and Indian Health Services. These deliveries include 426,460 doses that were transferred into federal programs from the State of Michigan's allocation. The

Why did the number of doses distributed increase so sharply?

As of 4/15/2021 the dashboard now reports doses delivered directly to providers in federal programs, including the federal Retail and Long-Term Care Facility Pharmacy programs, HRSA, and Indian Health Services. These deliveries include 426,460 doses that were transferred into federal programs from the State of Michigan's allocation. The public will now be able to see the date, quantity and location of all doses delivered to both state- and federally-enrolled providers operating in Michigan and reporting to Michigan's immunization registry, MCIR. However, the state of Michigan *does not control* how much vaccine is allocated to or administered by federal programs.

Delivery data for a small number of federal entities will not be tracked, since they are not reporting administration of vaccination to MCIR (Veteran's Administration hospitals, the federal Bureau of Prisons, and Department of Defense).

Why do the data from past days change and how often are data updated?

Doses administered are reported by the date of vaccination. Previously reported numbers of administered vaccine doses may change as new data are received. Providers have 24 hours to report vaccination to MDHHS. MDHHS pulls the data each morning for cleaning and then posting to the website by 3 pm, Monday through Friday.

Where can I get more information about COVID-19 vaccine?

Members of the public, please visit the MDHHS [Frequently Asked Questions](#) related to COVID-19 vaccine.

Healthcare providers, please visit the MDHHS website [COVID-19 Vaccine Provider Guidance & Educational Resources](#)

Where does the vaccine data in the Michigan COVID-19 Vaccine dashboard come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Coverage is estimated by taking the number of vaccinated people within a geographical area or demographic group ("numerator") and dividing by the total number of people in that area or group ("denominator"). Numerators come from the number of COVID vaccine doses reported to the Michigan Care Improvement Registry (MCIR), and denominators come from the US Census counts for each county and demographic group in Michigan ([2019 single year estimate](#)). There are two versions of a coverage estimate:

Vaccine Delivered	Delivery Trend	Doses Administered	Doses by Vaccine	Doses Metrics	Coverage	Coverage Metrics	State Level Metrics	Enrolled Providers	Learn More
-------------------	----------------	--------------------	------------------	---------------	----------	------------------	---------------------	--------------------	------------

Where does the vaccine data in the Michigan COVID-19 Vaccine dashboard come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Coverage is estimated by taking the number of vaccinated people within a geographical area or demographic group ("numerator") and dividing by the total number of people in that area or group ("denominator"). Numerators come from the number of COVID vaccine doses reported to the Michigan Care Improvement Registry (MCIR), and denominators come from the US Census counts for each county and demographic group in Michigan ([2019 single year estimate](#)). There are two versions of a coverage estimate:

- 1) "Completion" = number of fully vaccinated people in a given area or group (i.e., 1 dose of J&J or 2 doses of Pfizer or Moderna) / total population of the area or group
- 2) "Initiation" = number of people who are **either** partially **or** fully vaccinated in a given area or group / total population of the area or group

Note: County-level coverage is based on the county where a person lives, not where they got vaccinated. If someone's county or group is unknown, they cannot be included.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

PUBLIC USE DATASETS

COVID-19 Vaccine Doses Administered

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

Contains two spreadsheets: COVID-19 Vaccine Doses Administered and Doses Administered Demographics.

COVID-19 VACCINE DOSES ADMINISTERED 2021-06-25

PUBLIC USE DATASETS

COVID-19 Vaccine Coverage

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINE COVERAGE BY COUNTY 2021-06-25

Week Ending Date	Person's Residence in Preparedness Region	Person's Residence in Local Health Department	Person's Residence in County	Sex	Age Group	Administration Level	2019 Census MI Population (12 years and Older)	Number of Doses	Coverage

PUBLIC USE DATASETS

COVID-19 Vaccine Coverage State Level Metrics

README

Where does the vaccination data come from?

This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?

Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.

MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).

There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)

County is based on the county of residence.

Is COVID vaccination administration required to be reported?

Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?

These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

IMPORTANT NOTE REGARDING COVERAGE DATA FOR ARAB INDIVIDUALS

Coverage for Arab individuals is listed as "NA" because the denominators for Arab ethnicity by gender and age group are not currently available.

Coverage will be calculated as soon as this information becomes available.
