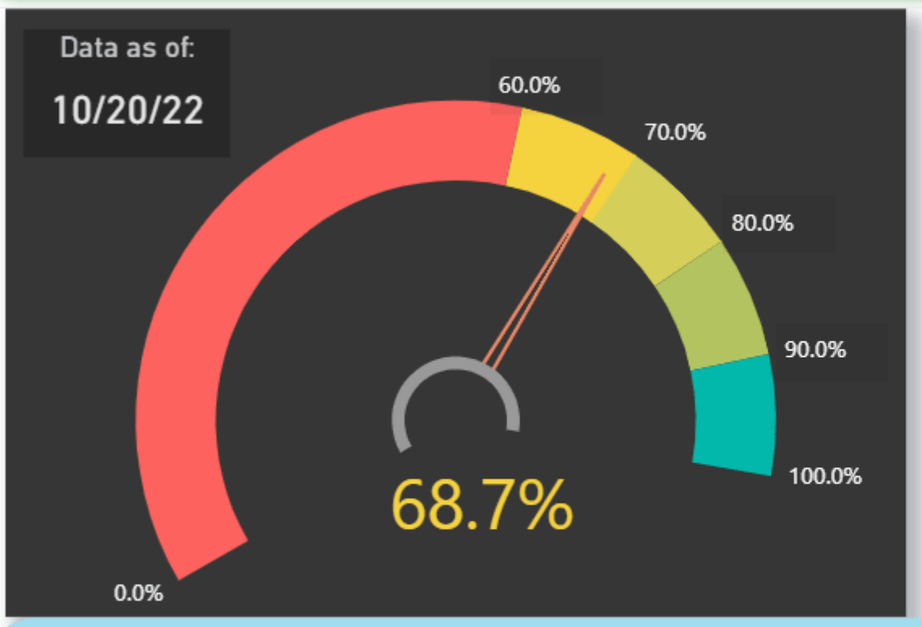
Coronavirus

COVID-19 Vaccine Dashboard

Michigan First-Dose Tracker



6,855,905 MI Residents with 1+ dose

÷

9,984,503 Total MI Population

=

68.7%

For Reference, 70% is equal to 6,989,152 Michigan Residents
80% is equal to 7,987,602 Michigan Residents
90% is equal to 8,986,053 Michigan Residents

Looking for COVID-19 Case Data? Click here.

Progress is based on the CDC data tracker, which includes MI residents vaccinated by providers not currently reporting to the state dashboard below: Veterans Affairs, Department of Defense, Bureau of Prisons, and most out-of-state providers. Data provided in the Michigan COVID-19 Dashboard below slightly undercounts the true number of doses administered to MI residents. See the "Learn More" tab below for details.

The first dose tracker, public use files and data reported in the dashboard below will be updated once per week on Wednesdays.

We have updated the Additional/Booster Doses Administered, this page previously counted the number of third doses administered to individuals who had completed an mRNA series, or second doses administered to individuals who had completed a Janssen primary series. The update counts doses administered after completion of a primary series to account for the fact that multiple additional and/or booster doses may be administered to certain populations

The Federal Long-Term Care Facility (LTCF) Pharmacy Partnership Program ended on 5/25/2021. There will no longer be updates to Federal Long-Term Care Facility (LTCF) Pharmacy Partnership Program Data. Some facilities were able to vaccinate all residents and staff by the second clinic and did not require a third clinic date.

Walgreens Data Source: https://www.walgreens.com/topic/findcare/long-term-care-facility-covid-vaccine.jsp#stayinformed

CVS Data Source: https://cvshealth.com/sites/default/files/cvs-health-covid-19-vaccination-data.pdf ***CVS data reported through 3/30/21.**

Managed Health Care Associates Source: MHA [email report]

Walgreens Facilities Assigned for Scheduling decrease includes an estimated 1200 facilities transferring to Managed Health Care Associates pharmacies for administration, as well as facilities that have opted out.

Previous data posted for Managed Health Care Associates Part B was reported in error by MHA.
The data posted today has been corrected by MHA to reflect the accurate numbers for Part B (Other Long Term Care Facilities).

At this time, Long Term Care vaccinations are not fully captured in the primary dashboard above. We are working on reconciliation and will update this note when complete.

CVS and Walgreens pharmacies plans to conduct three on-site clinics at each LTC facility to vaccinate as many residents and staff as possible. During the first clinic, the pharmacists will vaccinate all staff and residents on site. The second clinic will be held a minimum of 28 days later and the pharmacists will vaccinate staff/residents from the first clinic with their 2nd dose of COVID-19 vaccine and catch anyone they may have missed on first date with their first dose. The third clinic will occur 28 days after the 2nd clinic and pharmacies will vaccinate anyone from the second clinic that needs their 2nd dose.

Recent Facility Resident and Staff Vaccination Rates and Other Data, as reported for week ending 10/16/22

Federal Provider Number	Provider Name	Provider City	County	Submitted Data	Recent Percentage of Residents with Completed Primary Vaccination[1]	Recent Percentage of Residents Up to Date with Vaccines[2]	Recent Percentage of Staff with Completed Primary Vaccination[3]	Recent Percentage of Staff Up to Date with Vaccines[4]	Recent Percentage of Staff with Completed OR Partial Primary Vaccination[5]
STATEWIDE AVERAGE Note: The "Statewide Average" values show the average percentage among facilities who have reported vaccination data in the current or prior week.					86.9	34.6	82.2	16.0	83.2

Additional/Booster Doses given to eligible prisoners based on current CDC recommendations.

Note: The format of this chart was updated on 8/16/2021 due to the fluctuation of the detained population.

Age Group provides the number of individuals vaccinated that week within each age group. Data are provided each Friday to the Michigan Department of Health and Human Services by the Michigan Department of Corrections.

Age group column are cumulative number of doses by age.

Number in the medically vulnerable vaccinated group will overlap with age group information.

Additional/Booster Dose Administrations
We are currently tracking MI residents who have received additional and/or booster doses after the completion of their primary series (1 dose of J&J or 2 doses of mRNA vaccine). Doses following completion of the primary series are ordered by date of receipt, and do not account for eligibility based on age or whether a person is immunocompromised.

First additional/booster dose:
- We count doses administered at least 24 days (4 weeks ± 4 days) following primary series completion on or after August 13, 2021. This includes people who received a first booster dose and people who received an additional primary series dose.

Second additional/booster dose:
- We count doses administered at least 80 days (4 months ± 4 days) following a first additional/booster doses on or after August 13, 2021. This includes people who received two booster doses and people who received one additional dose and one booster dose.

Third additional/booster dose:
- We count doses administered at least 108 days (5 months ± 4 days) following a second additional/booster doses on or after August 13, 2021. This includes people who received people received one additional dose and two booster doses.

Why does Michigan present two sets of information on vaccine coverage?
The Michigan First-Dose Tracker provides the most complete estimate of the number of Michigan residents(entire Population) who have received their first doses of COVID-19 vaccine. This tracker uses data from the CDC COVID Data Tracker to provide most complete estimate of percent of Michigan residents with at least one dose of vaccine. The Michigan Vacc to normal tracker was modified to Michigan First-Dose tracker as the COVID vaccination milestones once set earlier in the year 2021 were based on outdated estimates of transmissibility and the vaccine eligible populations are being expanded.

The Michigan COVID-19 Vaccine Dashboard provides detailed information on doses administered and coverage, including detail on time, county, age group, race/ethnicity and provider type. The Michigan COVID-19 Vaccine Dashboard uses detailed data from the Michigan Care Improvement Registry or MCIR. This registry collects doses from providers who have enrolled in the MCIR.

Why do statewide administration and coverage numbers not match what is on the CDC data tracker?
CDC has access to administration data from providers who are not currently reporting to the Michigan Care Improvement Registry including federal entities (i.e.

Learn More...

Why do statewide administration and coverage numbers not match what is on the CDC data tracker?
CDC has access to administration data from providers who are not currently reporting to the Michigan Care Improvement Registry including federal entities (i.e., providers at Veteran's Affairs hospitals, Department of Defense facilities, and Federal Bureau of Prisons) and out-of-state providers who administered vaccine to Michigan residents. This means that Michigan COVID-19 Vaccine Dashboard undercounts the true number of doses administered to Michigan residents.

For coverage, the Michigan COVID-19 Vaccine Dashboard reports the proportion of Michigan residents in age groups eligible for vaccination who have received the vaccine (currently people age 5 or older). The CDC Data Tracker reports coverage for ages 5 and older or for the entire population.

Why do the totals on the Coverage Page not match the numbers on the MI First-Dose Tracker?
The MI First-Dose tracker includes Michigan residents who had their first dose of vaccine in federal facilities (e.g., federal prison or Veterans Administration Hospital) or out of state. The Michigan Department of Health and Human Services does not yet have access to those records. The data here provide an estimate of coverage rates for each county by age groups.

What does "Primary Series" mean?
We call it "Primary Series"if any person received one dose of J&J or two doses of Pfizer/ Moderna (this does not include Additional/ Booster doses).

What is Additional/ Booster dose?
Effective August 13, 2021, CDC recommends that people who are moderately to severely immunocompromised receive an additional dose of an mRNA COVID-19 Vaccine (Pfizer-BioNTech or Moderna) at least 28 days after the completion of the initial mRNA COVID-19 vaccine series. Effective October 21, 2021, CDC started **recommending** Moderna and J&J boosters in addition to Pfizer for specific populations.

What are the two different maps in the Booster coverage tab?
For both maps we calculate the number of individuals 12+, by county that have received at least one booster dose. We define a booster dose as any dose of COVID-19 vaccine administered to individuals who are fully vaccinated (at least 5 months after completion of an mRNA primary series or 2 months after receipt of J&J primary series). The coverage map on the left shows the proportion of the total county population (aged 12+ years) that have received at least one booster dose. The coverage map on the right shows the proportion of those fully vaccinated (and at least 12 years of age) that have received at least one booster dose.

Learn More...

Why do the data from past days change and how often are data updated?
Doses administered are reported by the date of vaccination. Previously reported numbers of administered vaccine doses may change as new data are received. Providers have 24 hours to report vaccination to MDHHS. MDHHS pulls the data each morning for cleaning and then posting to the website by 3 pm, Monday through Friday.

Where can I get more information about COVID-19 vaccine?
Members of the public, please visit the MDHHS Frequently Asked Questions related to COVID-19 vaccine.
Healthcare providers, please visit the MDHHS website COVID-19 Vaccine Provider Guidance & Educational Resources

Where does the vaccine data in the Michigan COVID-19 Vaccine dashboard come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?
Coverage is estimated by taking the number of vaccinated people within a geographical area or demographic group ("numerator") and dividing by the total number of people in that area or group ("denominator"). Numerators come from the number of COVID vaccine doses reported to the Michigan Care Improvement Registry (MCIR), and denominators come from the US Census counts for each county and demographic group in Michigan (2019 single year estimate). There are two versions of a coverage estimate:

1) "Completion" = number of fully vaccinated people in a given area or group (i.e., 1 dose of J&J or 2 doses of Pfizer or Moderna) / total population of the area or group
2) "Initiation" = number of people who are **either** partially **or** fully vaccinated in a given area or group / total population of the area or group

Note: County-level coverage is based on the county where a person lives, not where they got vaccinated. If someone's county or group is unknown, they cannot be included.

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

Why is the data suppressed in State / County Level Metrics?

Learn More...

1) "Completion" = number of fully vaccinated people in a given area or group (i.e., 1 dose of J&J or 2 doses of Pfizer or Moderna) / total population of the area or group
2) "Initiation" = number of people who are **either** partially **or** fully vaccinated in a given area or group / total population of the area or group

Note: County-level coverage is based on the county where a person lives, not where they got vaccinated. If someone's county or group is unknown, they cannot be included.

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

Why is the data suppressed in State / County Level Metrics?
The State / County level Metrics page has Demographic data at the County level. There would be a risk of exposing protected health information (phi) and identifiable information of individuals residing in low dense population areas unless appropriate data suppression methods were applied. With data suppression, we are able to release insightful statistics at a granular level but also by protecting Individual Identifiable information.

How are data suppression ranges chosen in State / County Level Metrics?
If the Population and the Resident Vaccinated are less than 50 and less than or equal to 10 respectively, then the Coverage numbers will be hidden for the selected slicers in the State / County Level Metrics page. These suppression ranges were chosen based on previous best practices of Immunization data reporting to the public.

PUBLIC USE DATASETS
COVID-19 Vaccine Booster Coverage

README

For privacy considerations, data is suppressed for any group with 10 or fewer doses administered.

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated every Tuesday and Friday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

PUBLIC USE DATASETS
COVID-19 Vaccine Additional Doses

README

For privacy considerations, data is suppressed for any group with 10 or fewer doses administered.

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated every Tuesday and Friday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINE ADDITIONAL DOSES ADMINISTERED 2022-10-26

Week Ending Date	County	EP Region	Sex	Race/Ethnicity	Age Group	Vaccine Type	Dose Number	Number of Doses

PUBLIC USE DATASETS
COVID-19 Vaccines Shipped to Providers

README

As of 4/15/2021 the dashboard now reports doses delivered directly to providers in federal programs, including the federal Retail and Long-Term Care Facility Pharmacy programs, HRSA, and Indian Health Services. These deliveries include 426,460 doses that were transferred into federal programs from the State of Michigan's allocation. The public will now be able to see the date, quantity and location of all doses delivered to both state- and federally-enrolled providers operating in Michigan and reporting to Michigan's immunization registry, MCIR. However, the state of Michigan does not control how much vaccine is allocated to or administered by federal programs.

Delivery data for a small number of federal entities will not be tracked, since they are not reporting administration of vaccination to MCIR (Veteran's Administration hospitals, the federal Bureau of Prisons, and Department of Defense).

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated every Tuesday and Friday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINE DOSES DELIVERED TO PROVIDER 2022-10-26

Week Ending Date	Data as of	Provider County	Provider Local Health Department Jurisdiction	Provider Empergency Preparedness Region	Facility Type	Vaccine Type	Vaccines Delivered
10/29/2022	24OCT2022	Alcona	District Health Department 2	Region 3	Federally Qualified Health Center	Moderna	100

PUBLIC USE DATASETS
COVID-19 Vaccine Doses Administered

README

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated every Tuesday and Friday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

Contains two spreadsheets: COVID-19 Vaccine Doses Administered and Doses Administered Demographics.

COVID-19 VACCINE DOSES ADMINISTERED 2022-10-26

Week Ending Date	Data as of	Person's Residence in Preparedness Region	Person's Residence in Local Health Department Jurisdiction	Person's Residence in County	Vaccine Type	Facility Type	Dose Number	Number of Doses
10/29/2022	10/23/2022	Region 5	Allegan County Health Department	Allegan	Moderna	Pharmacy	First Dose	3
10/29/2022	10/23/2022	Region 5	Allegan County Health Department	Allegan	Pfizer	Pharmacy	First Dose	2
10/29/2022	10/23/2022	Region 5	Allegan County Health Department	Allegan	Pfizer	Pharmacy	Second Dose	1

PUBLIC USE DATASETS
COVID-19 Vaccine Coverage by County

README

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?
Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.
MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).
There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)
County is based on the county of residence.

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated every Tuesday and Friday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINE COVERAGE BY COUNTY 2022-10-26

Week Ending Date	Person's Residence in Preparedness Region	Person's Residence in Local Health Department	Person's Residence in County	Sex	Age Group	Administration Level	2019 Census MI Population (12 years and Older)	Number of Doses	Coverage

PUBLIC USE DATASETS
COVID-19 Vaccine Ethnicity and Race Coverage by County

README

Coverage cannot be calculated for 'Unknown' and 'Other' Race/Ethnicity categories. These coverage rates therefore UNDERESTIMATE THE TRUE COVERAGE RATE among all race/ethnicity categories. For privacy considerations, data is suppressed for any group with 10 or fewer doses administered. For accuracy considerations, data is suppressed for any sub-population with fewer than 50 people.

Where does the vaccination data come from?
This report is created by the Michigan Department of Health and Human Services Division of Immunization from data reported to the Michigan Care Improvement Registry (MCIR).

How is COVID vaccination coverage calculated?
Vaccination coverage is an estimated percentage of people within a specified geographical area or age group who have received the COVID vaccine.
MCIR data are used for the numerator (i.e., number of COVID vaccine doses reported) and US Census estimates are used for the population denominator (i.e., total number of persons living in Michigan).
There are two vaccination coverage estimates. The percentage of individuals who have received one dose and the percentage who have received two doses (separated by the recommended number of days.)
County is based on the county of residence.

Is COVID vaccination administration required to be reported?
Michigan's immunization providers are required to report COVID vaccination to the MCIR within 24 hours of administration.

How often are these data updated?
These data will be updated Monday through Saturday. Previously reported numbers of administered vaccine doses may change as new data are received. A possible lag in reporting vaccine doses will result in increases in numbers previously reported.

COVID-19 VACCINE ETHNICITY-RACE COVERAGE BY COUNTY 2022-10-26
