Preliminary Announcement

Sixth Annual Summer Term
1909

Western State Normal School

Kalamazoo, Michigan

Six Weeks

June 28th - Aug. 6th
THE sixth annual summer term of the Western State Normal School will open Monday morning, June 28 and continue six weeks, closing Friday noon, August 6. Students will be enrolled and classified on Monday, June 28, and recitations will begin Tuesday morning, June 29. Nearly all of the regular instructors of the Normal School will remain in residence and will be assisted by a number of additional teachers, selected for their efficiency in special lines of work.

In continuation of the plan pursued by the department of Public Instruction in the summer sessions of 1907 and 1908, the counties adjacent to Kalamazoo will be affiliated with the Western Normal during the summer term of 1909. Ten or more counties will join in the affiliation. A large attendance of high school graduates, rural school, village and city teachers, commissioners and superintendents is assured and careful preparations are being made to afford the most efficient teaching service in all departments.

BUILDINGS.

All classes in the regular certificate courses and review courses will meet in the Normal buildings. In addition to the buildings in use in the summer session of 1908 the new training school which will be completed by June 15th will be occupied by review classes. All classes in domestic science and domestic art have been transferred to the new rooms at the Normal. Classes in manual training for men will meet at the manual training building.

The training school is a splendid structure with two stories and basement 118 feet in length by 100 feet in width.

The Normal railway cars will be in operation every morning and afternoon of the summer term.
All work in physical training will be conducted in the new gymnasium and all students will have the privileges of floor work, shower baths and practice in the large swimming pool.

THE NEW RAILROAD.

Students having recitations at the Normal building will be afforded free transportation on the new two track railway belonging to the Normal School. Two cars will be in operation daily during the entire summer, thus removing all objections on the part of those who find hill climbing irksome.

NEW EQUIPMENT.

The gymnasium, which is the best building of its kind among the normal schools and colleges of the state, has been provided with a splendid equipment of up-to-date apparatus for physical training.

In the department of physics and chemistry additions of apparatus have been made during the year and the facilities for effective work in biology have been largely increased. The working equipment in the department of geography has also been greatly enlarged.

Extensive additions of stereopticon slides have been made for the departments of biology and geography.

The library has been materially strengthened during the past year and the total of more than 6000 volumes constitutes one of the best selected student libraries in the state.

New machinery has been added to the manual training equipment and the departments of domestic art and science have been materially strengthened.

COURSES.

(a) REGULAR CERTIFICATE COURSES.

A large number of classes will be formed in the branches included in the regular certificate courses. Several of these classes in the Life Certificate and Graded Certificate groups

New training building ready June 28.
will meet twice daily, thus enabling a student to cover the work of two twelve-week studies during the summer term. Classes will be formed in ninety subjects in the departments of Psychology and Education, English Language and Literature, Geography, Science, Mathematics, History and Civics, German and Latin, Drawing, Music, Manual Training, Domestic Art and Domestic Science, Physical Training, Oral Expression and Library Methods.

(b) REVIEW COURSES.

Review classes will be formed in all of the common school branches. These classes will be of special benefit to students and teachers who are preparing for the county examinations to be held in August. Opportunity will be offered for reviewing subjects included in the first, second, and third grade examinations. There will be no summer schools or institutes this year in the counties of Western Michigan adjacent to Kalamazoo, and all teachers are urged to take advantage of the unusual privileges offered at the Western Normal. Credits earned during the six weeks’ term are recorded, and in many subjects apply on certificate courses. There will be thorough reviews, and, in addition, courses will be so arranged in some subjects that students attending two or more summer terms may pursue work in a given study without duplicating subject matter. For example, a rural school teacher may study geography through three summer terms, the work constituting a continuous course, with no duplications.

As it is the intention of the instructors of the Normal to offer the highest possible grade of instruction, a sufficient number of sections will be formed in Arithmetic, Grammar, Physiology, Civics, United States History and the other common branches to reduce the number of students in each class to thirty, or thereabouts.

Tuition free in the rural school course; in all other courses, $3.00 for the term.
(c) LECTURE COURSES.

As heretofore the Normal will offer unusual privileges this summer in the way of lecture courses by distinguished educators. One prominent lecturer will be at the school during each week of the term, and the discussions will be along the lines that are of interest to progressive teachers.

It has been decided to limit the number of lecture days each week to two, thereby leaving three or four afternoons open for field work and recreation, including tennis and baseball. The following persons have already been engaged to lecture. Additional announcements will be made in the final bulletin which will be issued April 25.

1. Dr. Charles H. Judd of Yale University who has recently been elected to the headship of the School of Education of the University of Chicago, will deliver two lectures on Wednesday, July 14. His topics are (1) Organization of the Nervous System, and (2) Transfer of Training.

Dr. Judd’s recent appointment is regarded as one of the most important of recent happenings in the educational world.

2. Dr. Robert J. Aley, for many years at the head of the department of mathematics at the University of Indiana, and who has recently been elected Superintendent of Public Instruction in Indiana has been engaged to lecture during the summer term. Dr. Aley is one of the most forceful and attractive lecturers in the west. His subjects and dates will be announced in the final bulletin to be issued April 25.

3. Mr. Nat M. Brigham, a class-mate of President Roosevelt at Harvard, will deliver two stereopticon lectures on Wednesday and Thursday, June 30 and July 1. His topics are (1) The Grand Canon of Arizona, and (2) From Coronada to Kit Carson.

Credits earned in summer term apply on certificate courses.
4. On July 26 and 27 Dr. Charles A. Eastman (Ohiyesa), the most gifted and cultured Indian in America, will deliver two addresses descriptive of Indian boyhood and girlhood. The topics will be announced in the final bulletin.

(d) NORMAL EXTENSION COURSE.

The Western Normal offers an Extension Course for experienced teachers who are unable to attend the institution during the regular school year. This course has been in operation during the past three years, and is open to selected teachers who have taught successfully for a term of six years or more and who have previously graduated from an approved twelve-grade school. For teachers planning to secure the Extension Certificate, residence will be required at the Normal during three summer terms. The course also includes work to be done in absentia under direction of members of the Normal School faculty, during a minimum period of two years. The Extension Course is open to a limited number of mature persons, and, as we are assured, has proved of great service in promoting the growth of the teachers for whom it is intended.

RURAL SCHOOL DEPARTMENT.

As heretofore, all possible care will be exercised to give wise direction to the work of rural teachers. The teaching force in this department will include a number of skillful instructors experienced in the problems and needs of the country teacher. Classes will be formed in all of the subjects of the third grade, second grade, and first grade certificate groups. These classes will be divided into sections numbering about thirty students each. If there is a demand, classes will be formed in the Elements of Agriculture, the Course of Study outlined in the State Manual, School Law, and Management of Country Schools. From the

Kindergarten and grades of training school in session during first four weeks.
beginning, the Western Normal has emphasized the importance of meeting the real needs of teachers in the rural schools.

It is expected that the number of Rural School teachers will exceed the large attendance during the summer term, 1908, and most careful plans are being made to provide the highest possible degree of teaching efficiency in all classes made up of country teachers. The hearty co-operation of the county commissioners of Western Michigan during the summer session of the past three years has been a source of inspiration and gratification and the cordial support of these officials in the future is assured.

COURSE IN LIBRARY METHODS.
The course in Library Methods arranged by the Board of Library Commissioners, which proved so successful last summer, will be conducted by Miss Braley, the librarian of the Normal. This course will include discussions on book selection for school libraries, children’s reading, the use of reference books and practice work by the students in such methods of library administration as are necessary for the most effectual use of the materials the school library should afford. Additional lectures by specialists in the various branches of library work are to be arranged.

TRAINING SCHOOL AND KINDERGARTEN.
The Training School will be in session during the summer term. The regular critic teachers of the training department will have charge of the classes which will meet for morning sessions. Students in attendance during the summer term are urged to avail themselves of the opportunity to observe efficient grade teaching in the Training School. All of the classes for observation work will be held in the forenoon, the session continuing from nine

Library of 6000 volumes is one of the best selected in Michigan.
until eleven daily, during the first four weeks of the term.

Instruction in kindergarten principles and methods will be offered to those desiring to take the regular kindergarten course and special courses formed for teachers in the lower grades who desire additional knowledge of kindergarten work and methods. In the morning the kindergarten will be open for observation the same as the grades in the training school.

CREDITS.

Credits earned during the summer term in subjects which are included in any of the regular courses offered by the Normal will apply toward the certificates granted by the school. The studies are so arranged that the work of two summer terms is equivalent to the work of one term of twelve weeks, and students carrying summer work are thereby enabled to shorten the term of residence required during the regular teaching year.

FEES AND LIVING EXPENSES.

No fee will be charged those students whose work consists entirely of Rural School subjects.

Students and teachers in the Graded School Course, Life Certificate Course and all Special Courses, will pay a fee of $3.00 for the term. This fee admits to all classes. There is also a fee of twenty-five cents due from all students for the support of athletics.

No charge is made for the special lecture courses offered during the summer term.

Board in clubs costs $2.50 per week, and rooms conveniently located and suitably furnished may be obtained at a cost ranging in price from $.50 to $1.00 per week for each student. The total expense for the summer term should not exceed $25.00.

1000 students can be located in homes near the Normal on opening day of summer term.
RECREATION AND SOCIAL LIFE.

Due attention will be given to recreation, physical and social. During the summer term the physical training director will have charge of outdoor and indoor athletics for men. A strong base-ball team is assured and games will be played each week.

The physical training director for women will have charge of all other physical education including outdoor athletics. Five tennis courts have been completed and will be used daily throughout the term. All indoor work will be given in the new gymnasium.

In continuation of the policy of preceding summers a social committee will provide special features of entertainment with a view to securing a variety of interests and affording opportunities for extending acquaintanceship among the students.

THE NEW GYMNASIUM.

The new gymnasium, is one of the best planned and best equipped structures of its kind to be found among the normal schools and colleges of the Northwest Territory. The main room is 119 feet long and 68 feet wide, the floor being entirely clear of posts or obstructions of any kind. The running track, 12 feet above the main floor, is suspended from the structural steel supporting the roof. The track is 9½ feet in width and has sloping sides and ends as well as raised corners. In the basement are shower baths for both men and women and a swimming pool 52 feet long. It has also a baseball cage for use in cold and stormy weather. All classes in public school gymnastics will meet in the gymnasium.

ADVANTAGES IN SUMMER TERM AT THE WESTERN NORMAL.

1. Thoroughly efficient instructors selected with a view to meeting special needs of the summer school students.

2. Splendid buildings with excellent equip-

Instructors of highest efficiency; no over-
crowded classes.
ments in all departments. The Training School, one of the best buildings of its kind in the country, will be used during the summer term.

3. All summer term classes divided into sections of working size.

4. A series of scholarly lectures on subjects of value and interest to all teachers.

5. Emphasis laid upon the importance of recreation and social gatherings.

6. Kalamazoo affords unusual advantages as an attractive city. It is noted for its manufactures, its homes, its churches and libraries, its schools and general attractiveness as a residence city.

7. Expenses are reasonable. Living accommodations are good.

8. There are many opportunities for remunerative labor in Kalamazoo. Many of the young men and young women of the Normal School are enabled to pay their expenses in part or in whole. The demand for student labor constantly exceeds the supply.
