Upjohn foundation pledges \$1 million for science project

The Upjohn Company Foundation of Kalamazoo has pledged \$1 million over three years to assist in equipping and furnishing the University's new science facilities.

The gift was announced during groundbreaking ceremonies Oct. 27 for the renovation of Wood Hall and for the construction of a new "Science Research Pavilion." The Upjohn gift will enable WMU to fill the facilities with state-of-the-art equipment to be used in science teaching and research, according to President Haenicke.

"Our students and faculty will have access to state-of-the-art science equipment, absolutely essential to teaching and research, because of this generous gift from the Upjohn Company Foundation," Haenicke said. "This leadership gift will profoundly benefit the sciences at WMU for many decades."

Donald R. Parfet, president of the Upjohn Company Foundation and a corporate executive vice president at the Upjohn Co., said, "We have seen a rekindled spirit and enthusiasm in the administration and science faculty, as evidenced by the renovation and construction of new state-of-the-art facilities. These new facilities will enable students and teachers to conduct important work in a suitable environment."

The \$45.3 million project will transform the center of campus into a mecca for science instruction and research. When finished, it will provide a total of 271,800 square feet to consolidate the undergraduate and research components of the science areas at the University. It includes a retrofit of Wood Hall, a new 94,800-square-foot Science Research Pavilion that will span the pedestrian mall between Wood and Everett Tower, and related scientific equipment and program support.

The work is being funded by \$38 million in state appropriations. The University also is seeking \$7.3 million through private gifts and government grants.

Work has already begun on getting Wood Hall ready for the retrofit. The building and the parking lot on its south side have been enclosed by a construction fence and many classrooms, offices and laboratories have been moved to other buildings.

Asbestos removal began in September and should be finished later this fall. Then

BREAKING GROUND — Officials broke ground for the \$45.3 million new Wood Hall and Science Research Pavilion in ceremonies Oct. 27 at the construction site. Participating were, from left: Lana L. Boldi of Kentwood, chairperson of the Board of Trustees; Richard G. Carlson, chairperson of the WMU Foundation; Donald R. Parfet, president of the Upjohn Company Foundation and a corporate executive vice president at the Upjohn Co.; and President Haenicke.

crews will begin demolishing the interior of Wood Hall. The retrofit is expected to be completed by June 1997 — in time for departments to move in and be ready for classes in fall 1997.

Work on the new Science Research Pavilion that will be linked to Wood Hall is scheduled to begin in spring 1996 and finished two years later. Occupancy of the

facility for laboratories is slated for fall 1998.

When completed, the new Wood Hall and the Science Research Pavilion will make up the "Science Quadrangle" along with Rood Hall and Everett Tower. The architect for the project is Holabird & Root of Chicago and the general contractor is the Austin Co. of Kalamazoo.

Board praises Haenicke for continued outstanding work

Citing his "innumerable achievements and accomplishments," the Board of Trustees Oct. 27 "enthusiastically and officially" expressed its "sincere appreciation and steadfast esteem for the continued outstanding performance of Dieter Haenicke as the University's chief executive and an exemplary national academic leader."

In a formal resolution, the board also publicly acknowledged "the invaluable assistance that Carol Haenicke continues to provide her husband and the University as she masterfully balances her dual role as our first lady and as a professional librarian."

The resolution expressed the board's "sincere appreciation" and indicated that the raise it recommended was "a token of appreciation for President Haenicke's innumerable achievements and accomplishments on behalf of the grateful faculty, staff, students, alumni and friends of the University for this past academic year as well as the 10 full years of his tenure to date at our helm. We are indeed very fortunate to have someone with his vision, compassion and high energy as our institutional leader."

The board authorized an annual salary increase of \$10,000 for him. Haenicke, while expressing his gratitude for the board's support and generosity, indicated that for the seventh time he was giving his raise to the University. With this gift, Haenicke's cash donations to WMU will exceed \$60,000, plus a \$100,000 deferred gift made jointly with his wife.

(Continued on page four)

Haenicke details enrollment figures at board meeting

President Haenicke praised faculty and staff members for their role in helping the University shatter enrollment records this fall during his remarks to the Board of Trustees at its Oct. 27 meeting.

"I'm extremely grateful to all the people who brought about these results," he said. "Much of the credit goes to the admissions office, where excellent recruitment is being done, and much goes to the faculty and staff who are involved in our retention programs. I really think we are on the way to good success if we can maintain these figures and if we are successful at our retention programs."

In addition to discussing enrollment, Haenicke covered Martin Luther King Jr. Day, the Indian Tuition Waiver Program, international education and an upcoming alumni dinner in Detroit.

He reiterated for the Board of Trustees statistics on enrollment that were released Sept. 19, including:

- that the institution has the largest class of beginning freshmen since 1989 with 3,249 students. It represents a 17.5 percent increase over last year — the largest percentage increase in beginning freshmen of any school in the state — and dramatically reverses a three-year trend of declining enrollments.

- that off-campus enrollment is up 28.8 percent, the second largest continuing education total ever at 3,809 students.

- that the University has 6,350 graduate students, including a record 497 doctoral students. The number of doctoral students is up 6.7 percent over last year and up significantly over a decade ago, Haenicke said. Graduate students represent 24 percent of WMU's total enrollment of 26,537.

Total enrollment has increased by 3.4 percent or 864 students over last year. In

particular, Haenicke credited a committee on retention and recruitment he set up and charged through the provost's office.

"Loads of faculty and staff members came in with excellent ideas," he said. "We implemented increased recruitment efforts of new students. We also reviewed carefully course scheduling so that the courses are spread better throughout the day and people can avail themselves of courses at the times that are convenient to them. We have begun with mandatory freshman advising, which we think is an important new step, with supplemental instruction and with more aggressive attempts to identify students with potential academic difficulty."

Haenicke also expanded upon the previously released enrollment figures, discussing minority and international enrollment.

"Enrollment numbers for minorities are particularly encouraging this year," he said. "I'm very pleased with that."

He noted that in the beginning freshman class the number of African Americans has jumped by 40 percent, the number of Hispanics by 34 percent and the number of Native Americans by 36 percent. Total minorities in the beginning freshman class are up by 32 percent to 359 students.

The total minority population on campus is now 2,680 students, Haenicke said, an increase of 12.5 percent over last year. That group represents 10 percent of the total student enrollment.

International students number 1,761 students, an increase of 6.5 percent over last year. They represent 90 countries and account for 6.6 percent of the total student body. Taken together, minority and international students are up 10.8 percent and represent 16.7 percent of the total fall enrollment.

Other figures released during the meeting included data on the beginning freshmen. Those students had a collective high school grade point average of 3.21 and an average ACT composite score of 22.3. They came from 77 Michigan counties, 20 other states and 24 foreign countries. The top five "feeder" counties were: Oakland, 450; Wayne, 431; Kalamazoo, 279; Kent, 211; and Macomb, 168.

Also during his remarks, Haenicke touched on several other items:

- He said he has accepted the recommendation of a Faculty Senate committee on scheduling for Martin Luther King Jr. Day Jan. 15. Classes will be canceled between 11 a.m. and 4 p.m. Staff members who wish to participate will be accommodated, he said.

- He announced that the University will continue the Michigan Indian Tuition Waiver Program through the winter semester for all eligible students.

- He told the trustees about a new "twinning program" with a university in Hong Kong (see related story on page two) and about another similar program pending in Indonesia. He also mentioned that the Haworth College of Business expects to soon offer its master of business administration degree at Sunway College in Malaysia. All of these programs will help the University reach the target Haenicke has set for international enrollment of 2,000 students in two to three years.

- He told the trustees he would be in Detroit Nov. 1 for a dinner with alumni and friends honoring his decade as president. The host committee is made up of a veritable "who's who" of alumni in Southeast Michigan, including Detroit Mayor Dennis W. Archer, who will speak during the event along with Haenicke.

Did you know?

- With 6,350 graduate students, WMU's percentage of students at the graduate level ranks third among the state's 15 public universities at 24 percent of total enrollment of 26,537 students.

- At 7.9 percent, WMU has more international students as a percentage of its on-campus enrollment than all but one other public university in Michigan, according to the most recent comparative data available. WMU ranks second among the nation's 52 Doctoral I universities in international enrollment.

- Women have an advantage over men as a percentage of total enrollment at WMU, with 55.1 percent women and 44.9 percent men. Michigan residents make up 88.3 percent of the total; other states represent 5.1 percent and other countries 6.6 percent.

Around the campus

Asthma researcher will discuss recent advances

One of the nation's leading asthma researchers will provide insight into recent developments in the field when he speaks here Wednesday, Nov. 8.

K. Frank Austen, professor of medicine at Harvard Medical School, will describe "Three Decades: From Primitive Beginning to Clinical Interventions" in a free public address at 4 p.m. in 2302 Sangren Hall. His speech will be the first Michael K. Bach Distinguished Visiting Lecture, a planned annual event named for a well-known Kalamazoo scientist who died last year.

Austen's address will focus on new thinking about the way asthma works and on the deeper understanding researchers now have about asthma, according to Leonard C. Ginsberg, chairperson of biological sciences.

Michael K. Bach was a scientist at the Upjohn Co. with research interests in immunology and cell biology. The visiting lecture program named for him, Ginsberg says, will bring an outstanding researcher in that field to campus each fall. It was established in Bach's memory by his widow, Shirley Bach, a WMU faculty member in philosophy, and by the College of Arts and Sciences.

World Bank official here

Tariq Husain, manager of the Learning and Leadership Center of the World Bank, will speak at 3 p.m. Friday, Nov. 3, in 2440 Dunbar Hall. His presentation, sponsored by the Department of Economics, is titled "The Changing Role of the Bank in World Economic Development."

Ethics talk planned on 'feminist insight'

Is the field of science influenced by biases of class, race and gender like many other aspects of society? A noted philosopher will argue that science is objective and not affected by such biases in a lecture Wednesday, Nov. 8.

Susan Haack, professor of philosophy at the University of Miami (Fla.), will present a free lecture titled "The 'Feminist Insight' that Science is Social: Yes and No" at 7:30 p.m. in 3750 Knauss Hall.

She will discuss recent criticism by feminists that scientific inquiry is skewed by social values and goals. Haack maintains that science is uniquely rational and objective.

Haack's work in philosophy of logic and language, epistemology, metaphysics, pragmatism and feminism is widely known and praised for its insight, clarity and rigor. She is the author of more than 60 articles and four books. She has served on the Fulbright Commission and on the advisory board of the Center for Advanced Studies at the University of Virginia. She also has taught at the University of Warwick in her native England and at Princeton, Guelph, Virginia and Australian National universities.

The lecture is being sponsored by the Center for the Study of Ethics in Society. For more information, persons may contact Joseph S. Ellin, philosophy, at 7-4386.

Parking permits expired

Employee parking permits issued during the last academic year expired Oct. 31. Those who have not renewed their permit by mail should stop by the public safety annex and present their employee ID card and vehicle registration form. Ticketing for expired permits will begin Wednesday, Nov. 8.

Senate meeting is tonight

The Faculty Senate will meet at 7 p.m. Thursday, Nov. 2, in the Fetzer Center. Agenda items include remarks by President Haenicke as well as a report on the freshman profile and quality issues by Stanley E. Henderson, enrollment management and admissions. Action items include a report and recommendations of the ad hoc Committee on a University Grading Policy and recommendations of the Graduate Studies Council regarding the final exam schedule.

Writers, illustrator lead children's book program

Two writers and an illustrator of children's books, all from Southwest Michigan, will speak about family and other influences on their work Friday, Nov. 10, in the Bernhard Center.

The program, titled "Many Voices, Many Visions: Three Women Writers/Artists," begins at 9 a.m. Aimed at librarians, teachers, parents and college students, the event is presented in celebration of Children's Book Week Nov. 12-18.

Registration begins at 8 a.m. The cost is \$25, which includes coffee and lunch for those who pre-register by calling 342-4859. On-site registration does not include lunch. College students pay \$5, which includes coffee.

Writers Miriam Bat-Ami of Mattawan and Ellen Howard of Kalamazoo and illustrator Wendy Halperin of South Haven will share their work, discuss the source of their ideas and reflect on their family background and other influences. Bat-Ami teaches children's literature in the WMU Department of English.

The program is sponsored by the Kalamazoo Public Library, Friends of the Kalamazoo Public Library, WMU and the Arts Council of Greater Kalamazoo through a program of the Michigan Council for Arts and Cultural Affairs.

Hsieh colloquium set

Philip Po-Fang Hsieh, mathematics and statistics, a winner of this year's Distinguished Faculty Scholar Award, will present the colloquium that is part of the award at 4 p.m. Monday, Nov. 6, in 1055 Fetzer Center. His presentation, which will be preceded by a reception at 3:30 p.m., is titled "How To Add Infinitely Many Numbers Together — The Development and Applications of Asymptotic Series."

Workshop to explore workings of HSIRB

The workings of the Human Subjects Institutional Review Board will be the subject of a free workshop for campus researchers from 1:30 to 3:30 p.m. Wednesday, Nov. 8, in 105-106 Bernhard Center.

The HSIRB is the panel responsible for reviewing research proposals to ensure protection of the rights, well-being and personal privacy of human subjects in research conducted under the auspices of the University.

Sponsored by the Office of the Vice President for Research, the workshop will explore the purpose and role of the HSIRB, makeup of the board, the levels of HSIRB review and tips for completing protocol. To register for the workshop, persons should call Kerrie Harvey in the Office of the Vice President for Research at 7-8298.

On campus

FOOD FOR THOUGHT

When Steven Darrell makes up his grocery list for the week, it might start something like this: 500 pounds of deli meat; 500 pounds of cheese; and 60 gallons of spaghetti sauce. A supervisor in the Bernhard Center dining service, Darrell is responsible for operation of the Bernhard Center commissary. That facility provides food for the Bigelow Hall cafeteria, Bernhard Center public cafeteria, catering and off-site operations like the Oliver Street Cafe, the Plaza Cafe and the Schneider Cafe. Darrell describes running the Bernhard Center operation as a real team effort involving several supervisors.

"One person couldn't do it all," he says. In addition to ordering the food each week, Darrell is responsible for scheduling employees. The unit has one full-time secretary, two part-time student secretaries, 28 full-time union employees and 150 part-time student employees. His job also entails making sure that the facilities and the equipment stay cleaned and maintained. A WMU employee for 10 years, Darrell began his tenure at WMU as an assistant supervisor in the Valley I dining service and has moved to several other locations throughout campus since then. "I like the pace here," he says of his current job. "It's busy and we have deadlines to meet. It's a pretty lively atmosphere to work in." He says he likes working in a university setting because of the resources available, such as the Student Recreation Center where he works out with weights. Darrell and his wife participate in a dozen triathlons each summer. They also enjoy cross country skiing and spending time with their three-and-a-half-year-old son.

Teleconference to feature Covey, Peters, Waitley

Three of the nation's leading professional development gurus will join forces for the first time to present a closed circuit teleconference that can be viewed at WMU Wednesday, Nov. 15.

"Eleven Lessons in Self-Leadership" is the title of the teleconference that will feature Stephen Covey, author of "The Seven Habits of Highly Effective People," Tom Peters, author of "Liberation Management" and "In Search of Excellence," and Denis Waitley, whose "The Psychology of Winning" is a best-selling audio program.

The teleconference will be presented from noon to 6:30 p.m. in the Bernhard Center — one of 100 locations around the nation selected as host sites for the event. Moderated by journalist and author Linda Ellerbee, the teleconference will feature presentations by all three experts plus a time set aside for the trio to field questions transmitted via the Internet from participants at the teleconference host sites.

Among the topics addressed will be refining work habits, balancing work and personal life, deriving the benefits from a diverse workforce, improving individual performance and getting things done by cutting cycle times. The trio will present examples from today's most successful companies as well as specific techniques for boosting personal and organizational effectiveness and credibility.

The cost of attending the event, sponsored by the Division of Continuing Education, is \$149 per person. A sliding scale of discounts is available. Handout materials and a light meal are included in the cost of the teleconference.

To register or for more information about the event, persons should contact WMU's Office of Conferences and Institutes at 7-4174. Those who register before Nov. 8 will receive an advance copy of the book, "Eleven Lessons in Self-Leadership," which is scheduled for release in January.

Jobs

The following list of vacancies is currently being posted through the Job Opportunity Program by employment services in the Department of Human Resources. Interested benefits-eligible employees can apply for any of these positions (bargaining or non-bargaining) by submitting a job opportunity transfer application during the posting period, or may contact an employment services staff member for assistance in identifying themselves as candidates for these openings.

S-01 and S-02 clerical positions are not required to be posted. For persons interested in faculty positions, there are openings in selected fields. A letter of application should be submitted to the appropriate dean or chairperson.

(R) **Associate Director, Administrative Information Systems**, X-09, University Computing Services, 95/96-235, 10/31-11/6/95.

Media

Richard A. Gershon, communication, discusses media mergers on "Focus," a five-minute interview produced by news services. "Focus" is scheduled to air Saturday, Nov. 4, at 6:10 a.m. on WKPR-AM (1420).

Exchange

FOR SALE — Three tickets to Monet exhibit at Chicago Art Institute. Good any date, any time. Fair price. Call 7-4386.

WANTED — Tickets for the 1996 Olympics in Atlanta. Call Judi Canaan at 375-4905 or e-mail judith.canaan@wmich.edu.

BANDING TOGETHER — Because of the large number of people participating in activities connected with Homecoming, the Bronco Marching Band had an opportunity to use some extra creativity in its halftime show during the Oct. 28 football game. Current and alumni band members marked the 75th anniversary of organized bands at WMU during the weekend with a number of activities, including an indoor concert and a banquet on Friday and a picnic and halftime performance on Saturday. A record 120 graduates returned to participate in the alumni band and this year were decked out in matching jackets. Their addition to the Bronco Marching Band put more than 360 people on the field during halftime to spell out “Western” in script.

Board approves ‘wish lists’ of funding requests to submit to state

Two “wish lists” of funding requests for programs and facilities for 1996-97 were approved Oct. 27 by the Board of Trustees.

The program revision requests and the capital outlay budget requests will be sent to the Michigan Department of Management and Budget for review and possible funding by the state Legislature. Such lists are compiled annually and help to identify University priorities, according to officials.

A request for \$4.8 million for state appropriation funding equity heads the list of five program revision requests totaling \$16.3 million. It would help the University to cover a projected budget shortfall and meet expected cost increases. Many years of chronic underfunding by the state and recent heavy cutbacks in federal financial aid and other programs have seriously re-

stricted WMU’s ability to assure student access to higher education and completion of coursework to graduation, officials said.

If funded, this program revision request would give the University the flexibility to invest in the support programs, including financial aid, that would both allow students access and support their completion of degrees.

The other four requests and their amounts are: School of Aviation Sciences, \$837,180; baccalaureate program in nursing, \$1.4 million; need-based minority financial aid, \$4 million; and strengthening research and instruction in science and technology, \$5.3 million.

The 10-item capital outlay budget request list totaling \$183 million is headed by a request for \$53 million for the reno-

New ‘twinning program’ launched this month for students at Hong Kong Baptist University

WMU has established a new cooperative program with a university in Hong Kong.

The arrangement, known internationally as a “twinning program,” will enable students to complete the first two years of their WMU degree in the School of Continuing Education at Hong Kong Baptist University, then transfer to WMU to finish the remaining two years of their studies in Kalamazoo.

Courses in business administration, computer science and communication are being offered over four semesters running

United Way donations reach nearly three-fourths of goal

As of Oct. 30, a total of \$112,085 had been collected in the campus United Way campaign. That’s 73.7 percent of this year’s goal of \$152,000. Although the campaign officially ended Oct. 31, donations will continue to be accepted.

from October 1995 to May 1997. Classes began in Hong Kong Oct. 23 and 79 students are enrolled in this first cohort.

“The WMU-HKBU program is modeled on WMU’s successful twinning program offered in partnership with Sunway College in Kuala Lumpur, Malaysia,” said Howard J. Dooley, international affairs.

That program, established in 1987, currently enrolls 750 Malaysian students in its various phases.

“The Hong Kong program follows WMU admission procedures, course syllabi, teaching methods, examinations and other student assessment methods to ensure a comparable quality of education,” Dooley said.

Students admitted to the WMU-HKBU program are assured places at WMU for their final years provided they meet the required academic standards. Normally, students will complete about 60 credit hours or 20 courses in Hong Kong, then take the remaining 60 or more credit hours needed to finish their bachelor’s degree at WMU.

HKBU, founded as Hong Kong Baptist College in 1956, is a publicly-funded institution located in Kowloon Tong on the peninsula jutting into Hong Kong harbor. The university offers undergraduate studies in 37 major areas leading to bachelor of arts, bachelor of business administration, bachelor of science, bachelor of social science and bachelor of social work degrees. It also offers graduate programs leading to master of arts, master of business administration, master of science, master of philosophy and doctor of philosophy degrees.

HKBU enrolls 4,000 students in its full-time programs and 40,000 in its part-time programs. The WMU-HKBU program will admit students in two annual intakes. Enrollment is expected to exceed 100 in the second and subsequent cohorts.

WMU’s second twinning program in Asia was developed by and will be administered by WMU’s Office of International Affairs. Betty Chang, a WMU alumna who is an associate dean at HKBU, was instrumental in bringing the project to fruition.

Telecommunications regulation is lecture topic

Is regulation really in the public’s best interest when it comes to industries like telecommunications? That question will be explored in a lecture Wednesday, Nov. 8, on campus.

Thomas W. Hazlett, the former chief economist at the Federal Communications Commission, will speak on “Is ‘Public Interest’ Regulation in the Public Interest?” at 3:30 p.m. in 3760 Knauss Hall.

The free talk is part of the Department of Economics’ 32nd annual guest seminar series titled “Telecommunications: Have Regulators Dialed the Wrong Number?”

Hazlett currently is an associate professor of agricultural economics and director of the Program on Telecommunications Policy in the Institute of Governmental Affairs at the University of Cali-

formia at Davis. His scholarly research on the economics of the cable television industry and his insightful commentary on telecommunications policy in the Wall Street Journal are widely known.

Hazlett is expected to discuss how politicians and those who regulate such industries as telecommunications often justify their intervention by claiming that it is in the public’s best interest. Many economists, including Hazlett, argue that the regulations tend to benefit organized groups, such as the producers of telecommunications services, at the expense of unorganized groups like consumers.

In addition to discussing the telecommunications industry in general, Hazlett will use this type of analysis to examine regulatory policy in the cable television industry in particular.

Expert on market options and futures to speak

An expert on options, futures and financial engineering will speak at WMU Thursday, Nov. 9, as part of the Visiting Scholars and Artists Program.

Stephen Figlewski, professor and the

Yamaichi Faculty Fellow in Finance in the Leonard N. Stern School of Business at New York University, will discuss “Derivatives: The Villain, an Easy Mark, in the Credit Markets Upheaval?” at 7 p.m. in the Brown Auditorium of Schneider Hall.

He is expected to cover the basics of options and futures hedging, as well as the role hedging plays in financial markets. He also will discuss specific examples highlighted in the media, such as the recent cases involving Metallgesellschaft AG of Germany and its U.S. subsidiary MG Corp., Proctor and Gamble and Orange County, Calif.

A former market maker in stock index options at the New York Stock Exchange and in futures at the New York Futures Exchange, Figlewski is the author of numerous articles on such topics as futures and options as well as two books.

Figlewski’s visit is being coordinated by the Department of Finance and Commercial Law.

STATE OF THE UNIVERSITY

As part of its continuing coverage of President Haenicke’s Oct. 17 “State of the University” address, the Western News is running a series of charts the president used to illustrate his talk.

Trustees Chormann and Boldi recognized

Two members of the Board of Trustees have earned recognition in their respective fields.

Richard F. Chormann, who joined the board earlier this year, has been selected as chairman and chief executive officer of the Kalamazoo-based First of America Bank Corp. He will assume that position in May 1996. An FOA employee since 1958 when he worked part-time while attending WMU, Chormann has served as the corporation's president and chief operating officer since 1985.

Lana L. Boldi, chairperson of the board, recently was presented with the prestigious Douglas A. Fraser UAW International Union Community Service Award for 1995. The award is given to a person who has devoted time, effort and expertise to outstanding community involvement. Boldi was nominated by agencies she has served.

A member of the Board of Trustees since 1989, Boldi is an international representative and education/Community Action Program coordinator for Region I-D of the United Auto Workers based in Grand Rapids.

She has been active in numerous community service organizations, including serving on the boards of the Michigan League for Human Services and the Heart of West Michigan United Way. She is a past vice president of the Michigan Children's Trust Fund and has chaired the Labor Participation Committee of the Kent County United Way several times.

Writing guide is available

Copies of the second edition of "Writing for and about Western Michigan University" are available at no charge to faculty and staff.

The writing guide, which addresses many of the most commonly asked questions about style and several of the most common errors, was originally published in 1991. Nearly double the number of entries are included in the new edition.

Faculty and staff can obtain a copy of the publication by sending their name and campus address via e-mail to thomas.myers@wmich.edu or via campus mail to Thomas A. Myers, development.

Board praises Haenicke (Continued from page one)

Trustee Richard Y. St. John of Kalamazoo chaired the board's presidential evaluation committee.

The board's resolution praised Haenicke's performance during 1994-95 which resulted in the "further enhancement of our institution's reputation and standing among its peers" and for continuing to reshape the institution to meet the demands of a major university and "position itself for the next century."

Haenicke was recognized for his leadership in the University's earning of the state's largest percentage appropriations increase, setting the state's lowest tuition increase, leading the institutional efforts to garner a record \$21.1 million in research grants and \$12.3 million in total private

support during the 1994-95 year. The resolution further cited Haenicke's "visionary leadership, support and encouragement"; his "impetus for...varied institutional achievements"; his volunteerism for community service as chairperson of the Greater Kalamazoo United Way campaign; and for "systematically and judiciously" interacting with faculty, staff, students, alumni, friends of the University and others through a variety of means.

He was applauded for his key role in developing international study options for WMU students, the establishment of a plan to achieve gender equity in intercollegiate athletics and leading a University delegation to establish institutional linkages to Asia.

Jabbing, jousting and jostling their way to Homecoming memories

These students were busy last weekend creating memories they can recall as returning alumni during future Homecoming weekends. 'Rockin the Rec,' the newest ingredient to the University's Homecoming celebration, offered students a chance to compete in such events as the Gladiator Joust (top) and the Velcro Obstacle Course during Friday afternoon festivities in the Student Recreation Center. With classes canceled for the day, students had an opportunity to participate in a variety of activities that began with a "Blizzard of Bucks" game show in the Bernhard Center and concluded with a rock concert and fireworks.

days, 10 a.m.-5 p.m.; closing reception, Friday, Nov. 10, 6-9 p.m.
