Misunderstanding Chihuahua Cheese

Alex Wells

Congratulations! You are now the owner of the world's premier milking system for miniature pets, the AltDairy Miniature Pet Milker™!

Getting Started With the AltDairy Miniature Pet Milker™

1. Remove your AltDairy Miniature Pet Milker™ from its box (be sure to refrain from the use of sharp tools, at the risk of severing the AltDairy Dynamic Milking Arteries™)
2. Attach the state-of-the-art AltDairy Miniature Teat Suctions™ to the AltDairy Dynamic Milking Arteries™. Secure firmly with AltDairy TeatSecure Vise-Grips™ (sold separately).
3. Attach the AltDairy Dynamic Milking Arteries™ to the AltDairy Portable Milking Engine™. Secure firmly with AltDairy TeatSecure Vise-Grips™ (sold separately).
4. Insert fifteen (15) C batteries (not included) to battery compartment on bottom of your AltDairy Miniature Pet Milker™.

Note: Prior to application of the device to your pet please follow these precautions:

- Milking cats: Please apply the AltDairy Claw Concealers™ (sold separately) to the paws to ensure your feline friend doesn't accidentally sever the AltDairy Dynamic Milking Arteries™.
- Milking miniature dogs: AltDairy Enterprises© recommends the use of the AltDairy TeatSecure-Securing Vise-Grips™ (sold separately) to ensure the AltDairy TeatSecure Vise-Grips™ remain fixed in the event of nervous shaking.
- Milking hamsters, ferrets, other rodents: The AltDairy Miniature Pet Milker™ is unsuitable for rodents. Serious and sometimes fatal injuries may occur. AltDairy Enterprises© recommends the purchase of the AltDairy Micro Pet Milker™.

- 
5. Apply the AltDairy Dynamic Milking Arteries™ to your pet's teats. Place AltDairy MAXVolume Milk Receptacle™ (sold separately) beneath pour spout. Press red power button.

Note: The AltDairy Miniature Pet Milker™ will yield a volume of one-fourth (1/4) cup per two hours. For users desiring larger volumes, we recommend waiting at least five (5) hours between milkings to ensure the pet's wellbeing.

Happy Milking!
