WMU Surplus Sales has held its last sale at the Activities Therapy Building. The unit will move into its new location, 4202 S. Westnedge Ave. Among the officials making remarks during the grand opening was Richard Malott, professor of psychology and renowned behavior analysis expert who founded the center in 2008.

KAC is part of the WMU Autism Center for Excellence and has major funding from the Michigan Department of Health and Human Services. WMU’s extensive efforts to offer autism services and train professionals in the field attracted a $4 million award approved by the Michigan Legislature in 2014, and some of that funding supported the renovation of KAC’s new home.

WMU purchased the new facility a year ago. It will allow KAC to serve up to 40 young people ages 2 to 21 as well as to provide parent support services and be a resource on all aspects of autism assessment and treatments.

Just one day earlier, WMU dignitaries joined with Consumers Energy to open its fundamental fiduciary responsibility of activity in motion for the board to fulfill a preliminary timeline during the Sept. 7 meeting of the WMU Board of Trustees.

He noted that Dunn’s announcement put allowed that group to develop such a profile, of what they thought the next president should look like. A similar treatment for the new Presidential Search Advisory Committee in mid-September will allow that group to develop such a profile, as well.
WMU employees, dependents get tuition discount at Cooley

With first-year law classes being offered for the first time ever this fall, WMU Cooley Law School has introduced a new tuition reduction program for WMU employees and their spouses and children.

This program, which began with the fall 2016 semester, will lead to reduced tuition for qualified individuals who want to study law. Individuals who meet WMU Cooley’s admissions requirements and enroll there may qualify for a 25 percent tuition reduction if they are: an actively employed, full-time, benefits eligible WMU faculty or staff member; the current spouse of an eligible WMU employee; or the biological child, legally adopted child or step-child of an eligible WMU employee.

The offer will cover 25 percent of tuition for 90 credit hours toward a J.D. degree and/or 24 credits toward an LLM degree. All other fees and costs will be charged at standard rates. If an eligible individual receives a scholarship for study at WMU Cooley, the benefit is reduced to 50 percent of the amount remaining after the scholarship is applied. WMU Cooley has numerous scholarship opportunities for students.

More information regarding law classes in Kalamazoo can be found at WMU Cooley’s site at cooley.edu/prospective/first1swmu.html. Direct questions about admissions or tuition to WMU Cooley at admissions@cooley.edu or (517) 571-5140, ext. 5500.

WMU Cooley is offering 15 first-year credits over fall and spring semesters on the WMU campus during the 2016-17 academic year. Students can take their first credits in Kalamazoo and then transfer to the WMU Cooley campus of their choice to continue.

Around campus and beyond

Study abroad is focus of fair

The 2016 Study Abroad Fair will be from 11 a.m. to 3 p.m. Wednesday, Sept. 28, on the Sangren Mall plaza and offer free pizza and give-aways. Attendees can meet with WMU students who have studied abroad as well as with coordinating professors to learn about completing internships with overseas companies and numerous academic and language-intensive programs.

For more information, contact Korey Force, WMU study abroad outreach specialist, at korey.force@wmich.edu or (269) 387-5890.

Honored military veteran to speak

Wounded U.S. Army veteran and former Notre Dame basketball player Danielle Green will speak about resilience during a free public event at 5 p.m. Monday, Oct. 3, in 2000 Schneider Hall.

Green lost her left arm and hand when she was wounded by a rocket-propelled grenade while she was serving with the U.S. Army in Iraq May 2004.

A Purple Heart award recipient, she also was lauded as the winner of the Pat Tillman Award at the Excellence in Sports Performance Yearly Award, known as ESPyS, in July 2015.

Her talk, “The Resilience Factor,” is sponsored by WMU’s Foundation Scholars, Kalamazoo Promise Scholars and Seita Scholars programs. For more information about the event, contact Ron Dillard at ronald.d.dillard@wmich.edu or (269) 387-6326.

Military literature subject of events

Iraq veteran Benjamin Busch will host workshops at 6:30 p.m. two more Wednesdays this fall for military veterans and their families. Workshop participants read and discuss military literature from “Homer” and “The Iliad” through contemporary times.

Participants will meet again Oct. 12 and Nov. 9 in 1245 Schneider Hall. Register by emailing margaret.venstein@wmich.edu.

performance

The New Deal. It was published in May by the Cambridge University Press and is part of the Cambridge Studies in Gender and Politics.

Corder and co-author Christina Wobblefelt from the University of Notre Dame examine a question that has eluded scholars for almost 100 years: How did the first female voters cast their ballots? Their book employs new data and novel methods, and improves understanding of the largest expansion of the American electorate during a transformative period of American history.

Emerita named outstanding alumna

Sandra Edwards, emerita in occupational therapy, has been honored as the 2016 Outstanding Alumna by the Department of Occupational Therapy at the University of Florida. The award is given annually to an outstanding alumna selected by the chair and faculty in that school’s OT department.

A letter announcing her award said Edwards was nominated for the prestigious honor based on her “excellence in professional practice and exceptional leadership in the advancement of the public health and health professions.”

During her 32-year career at WMU, Edwards earned an international and national reputation for her clinical research primarily in the area of pediatrics and interdisciplinary health care. She retired in 2006. The same year, faculty members, students and friends established the Sandra J. Edwards Scholarship. She and her husband, Al Garcia, contributed to the fund in 2009, making it the Sandra J. Edwards Endowed Scholarship for occupational therapy students.

Geographer starts GLOBE partnership

Todd Ellis, geography and Mallinson Institute, has brought to southwest Michigan work that he has been doing with the GLOBE program, a 21-year-old international citizen and school science program.

GLOBE—Glob al Learning and Observations to Benefit the Environment—features participants from more than 110 countries collecting environmental observations and sharing their scientific investigations with other schools around the world.

Ellis has been a GLOBE partner for eight years and recently established a GLOBE partnership at WMU. He partnered with the Kalamazoo Nature Center in August to host their first GLOBE Training in the area at the Heronwood Field Station outside of Kalamazoo.

The workshop was funded by a WMU Faculty Research and Creative Activities Award and is the first workshop hosted by Ellis in Michigan.
Campuswide award winners to be feted at Fall Convocation

Editor's note: Four campuswide award programs will be celebrated during the Fall Convocation Friday, Sept. 30. This issue honors winners from two of those programs. The other winners were noted in the Sept. 8 issue.

Distinguished Teaching Award

This honor is bestowed on faculty members who are exceptional educators and mentors, and demonstrate outstanding dedication in their work. Jennifer Machiorlatti is a professor of communication and director of undergraduate communication programs. A faculty member since 2004, Machiorlatti teaches in the areas of media and cultural studies, video and media production, media writing, film studies, communication and social justice, and intercultural communication.

Nominators described her as an accomplished filmmaker who is an unusually skilled and creative teacher with an outstanding work ethic. They also praised her for providing a welcoming classroom environment. In addition, nominators were almost unanimous in lauding Machiorlatti for her commitment to student success, and they stressed that she is a mentor and role model as well as an excellent teacher.

Lisa Paulius is a professor of physics who joined the WMU faculty in 1993 and focuses her research on vortex dynamics in high temperature superconductors. Both faculty colleagues as well as students cited her for going the extra mile to help students learn, particularly by trying a variety of teaching methods and adopting innovations.

Nearly all of those nominating her reported that Paulius’ teaching innovations and methods, combined with her passion for physics and teaching, were instrumental in their classroom success. They also consistently praised her for providing steadfast patience and support. Women students especially noted that Paulius served as a mentor during their time at WMU and that she continued to provide encouragement as they moved on to graduate school and careers.

Emerging Scholar Award

This honor is bestowed on faculty members who are in the first decade of their WMU careers and are among the rising stars in U.S. higher education. It acknowledges the contributions of those who have achieved national recognition and demonstrated outstanding promise to achieve renown in their continuing work.

Jessaca Spybrook is an associate professor of educational leadership, research and technology. Spybrook has been a WMU faculty member since 2008. Nominators cited her for her roles as an education researcher, journal editorial board member and reviewer, grant program reviewer, consultant for research projects, and workshop presenter.

They also noted that she is a productive and influential scholar whose work has impacted both education research and public policy analysis, as well as has garnered significant international and professional recognition. Her scholarly contributions are counted among those of the nation’s top applied statisticians and intervention researchers. Spybrook has served as the principal investigator or co-PI for research projects totaling about $3 million.

Broncos4Broncos campaign benefited students big time

The fiscal year 2016 Broncos4Broncos faculty-staff campaign ended at 30 percent, with donations totaling $487,538 to more than 259 designations. This was a 3 percent increase in participation from the past fiscal year and a 22 percent increase in dollars donated. “It just goes to show the dedication of Western’s faculty and staff to helping our students,” says Karen Pinkham, campaign coordinator in development and alumni relations. “No matter the size, every gift to Western Michigan University makes an impact.” Fiscal year 2016 gifts supported academic programs, international study opportunities, leadership and volunteer services, internships, and most of all, financial aid for WMU students. A highlighted area this year was the Invisible Need Project, which includes a student food pantry, emergency fund and health-emergency fund.

Donations to the emergency fund may be made anytime by purchasing a special T-shirt for game day. This year’s slogan is “Good as Gold.” To donate or learn more, visit mywm.com/invisibleneed.

The 2017 campaign is running July 1 through June 30, 2017. All gifts are tax-deductible and 100 percent goes to the designated area. Visit mywm.com/employee giving for details. Direct questions to Pinkham at karen.pinkham@wmich.edu or (269) 387-8700.

Obituaries

Bert Carr, a former vehicle mechanic in Facilities Management, died June 10. He was 90. Carr joined the staff in 1979 and retired in 1999 after 11 years of service.

James Croteau, professor of counselor education and counseling psychology, died suddenly after falling ill while cycling Sept. 18. He was 59. Funeral arrangements are pending and will be announced at wmich.edu/news/obituaries when they become available.

Arthur T. Howson, assistant professor emeritus of education and professional development, died Aug. 15. He was 85. Howson joined the faculty in 1967 and retired in 1991 after nearly 24 years of service.

Thomas L. Swihart, a former equipment operator in landscape services, died Aug. 24. He was 67. Swihart joined the staff in 1986 and retired in 2010 after 24 years of service.
Two more facilities open amid fanfare

Consumers' array of solar panels installed on the Parkview Campus.

We'll use the opportunity provided by our partnership with Consumers Energy for education and research, said WMU President John M. Dunn during the opening ceremony. It will help turn the attention of communities like this one to the potential of solar power.

The 1-megawatt solar power plant at Parkview is Consumers' second large-scale solar project in Michigan and the first actually located on a college campus. A 3-megawatt plant opened in April on property owned by Grand Valley State University.

Continued from page 1

A national search firm will then be engaged and a website developed to keep the community apprised of progress in the search. The goal is to have a new leader identified by the end of the academic year.

Along with Johnston, the following people, and their key WMU affiliations, make up the 2016-17 Presidential Search Advisory Committee: James B. Bolger, trustee and search committee vice chair; Mary A. Asmonga-Knapp, trustee; Susan F. Ayers, Faculty Senate; Kathy Beutregard, intercollegiate athletics; Gary Bischof, family and consumer sciences; Jody Blyinsky, institutional effectiveness; Damon Chambers, Graduate Student Association; J. Kevin Corder, political science; Satish Deshpande, Haworth College of Business; Thomas Edmonds, retired faculty member; The Fishchmann, Western Student Association; Harold Glasser, sustainability office; Hal Jenson, WMU Homer Stryker M.D. School of Medicine; Jennifer Lentner, WMU Alumni Association; Dennis Moore, American Federation of State, County and Municipal Employees; Lisa Minnick; American Association of University Professors; Shannon Rininger, Professional Support Staff Organization; Kathler Schuemann, Board of Trustees; Timothy Terrentine, development and alumni relations; Martha Warfield, diversity and inclusion; and Evelyn Winfield-Thomas, institutional equity.

On Campus with La Shaunda Webb

Online classes as well as hybrid classes, those which combine face-to-face instruction with some Web-based learning, are growing trends in higher education and increasingly popular at WMU.

La Shaunda Webb, instructional designer for Extended University Programs, coaches instructors at the University on how to build their online courses and make the transition from traditional class settings. She works individually with faculty to create the best experience for students, and her involvement level is as varied as the types of requests she gets.

I work with instructors to help them structure the redesign of their courses, use online e-resources and tools they can use to build engaging activities for students, Webb says.

There's the whole gamut of experience that professors bring with them when developing their courses. But there is a growing interest and need by people who want to enhance the classroom experience.

Webb joined the WMU staff in November 2013 as an instructional technology coach and moved into her current role almost a year later. Typically, she says, the month before and two weeks into each semester are her busiest times. She adds that demand for her services has increased from faculty on and off campus because in addition to online instruction, there's a growing interest in using elearning in classes.

Gifts to WMU during 2015-16 top $70 million

The 2015-16 fiscal year that concluded June 30 saw gifts to WMU surpass $70 million, the WMU Board of Trustees learned at its Sept. 7 meeting.

The year-end gift report to the board reflected a total of $70,302,260 in gifts, pledges and deferred commitments made during the year by 16,825 unique donors. The gift total is the second largest the University has recorded in the past 15 years.

Detailed information on gifts received showed donors were focused during the year on units across the campus. In addition to a number of gifts made to each of the University's seven degree-granting colleges, major gifts were recorded to the WMU Homer Stryker M.D. School of Medicine, WMU's Osher Lifelong Learning Institute and the Division of Intercollegiate Athletics.

Meanwhile, trustees learned that the grant total for the 2015-16 fiscal year was just over $23.5 million and grants are off to a brisk start for the 2016-17 fiscal year, which began July 1.
