Two more facilities open amid fanfare

Members of the University and local communities celebrated the formal opening of the new home for WMU’s Kalamazoo Autism Center Sept. 17 and the recently completed Consumers Energy solar garden Sept. 16.

A treatment center for young people diagnosed on the autism spectrum, KAC is now located in a renovated building at 4202 S. Westnedge Ave. Among the officials making remarks during the grand opening was Richard Malott, professor of psychology and renowned behavior analysis expert who founded the center in 2008.

KAC is part of the WMU Autism Center for Excellence and has major funding from the Michigan Department of Health and Human Services. WMU’s extensive efforts to offer autism services and train professionals in the field attracted a $4 million award approved by the Michigan Legislature in 2014, and some of that funding supported the renovation of KAC’s new home.

WMU purchased the new facility a year ago. It will allow KAC to serve up to 40 young people ages 2 to 21 as well as to provide parent support services and be a resource on all aspects of autism assessment and treatments.

Just one day earlier, WMU dignitaries joined with Consumers Energy to open a new solar garden at the school’s Activities Therapy Building.

Plan now to attend events at this year’s homecoming

Get your football tickets then scope out the tailgates and other exciting events taking place during the 2016 homecoming weekend festivities.

A variety of events, some requiring reservations, are listed at wmich.edu/homecoming.

Consider starting your celebration by attending the Distinguished Alumni Award Reception Friday, Oct. 7, and participating in the 18th annual Homecoming Campus Classic race, walk and fun run Saturday, Oct. 8.

Trustee Johnston lays out process for presidential search

A list of leaders who represent the wide range of constituencies served by WMU was developed to put together the search committee. A recent board retreat allowed trustees to develop a profile of what they thought the next president should look like. A similar retreat for the new Presidential Search Advisory Committee in mid-September will allowed that group to develop such a profile, as well.

WMU Alert test set for today

At 2:30 p.m. Thursday, Sept. 22, a campuswide test of the WMU Alert system will include email notification to the email addresses of all members of the campus community, as well as text and phone messages to those who have previously opted in to the WMU Alert system.

The addition of campus email to the alert system is the result of updated regulations the Department of Education released in the 2016 edition of its Handbook for Campus Safety and Security Reporting. One requirement is that even when an institution has an opt-in notification system, it must ensure the campus community receives emergency notifications and timely security alerts through a method that all can access.

Since all current students and employees have WMU email addresses, emergency notifications and timely warnings will also be sent as email messages to those accounts. Anyone who registered through WMU Alert by Sept. 20 for a test message, phone call or both will receive such a test message in addition to email notification. Members of the campus community can sign up for WMU Alert through GoWMU.

Applications open for research post

Qualified internal candidates are encouraged to apply for the position of associate director for research. Review of applications will begin Monday, Sept. 26. The full posting may be viewed at wmich.edu/hr/jobs.

Wayfinding comments being sought

A public presentation made to the campus community by campus wayfinding consultants Cloud Geshan is available for viewing at spaces.high tallest.com/receive/CvHTG.

The design firm made a presentation Sept. 12 on the work it has been doing for the University. Comments on the proposed changes are welcomed through Wednesday, Sept. 28, and should be directed to Christopher Pyzik in Facilities Management at chris.pyzik@wmich.edu.

Time to show homecoming spirit

University offices are encouraged to show off their homecoming spirit by participating in a banner-making competition. The department or office with the best banner will receive up to 10 Invisible Need “Gold” T-shirts. The banners, which are provided, will be displayed on campus and must be complete by Friday, Sept. 30. To sign up, email salp-event@wmich.edu.

Surplus Sales moving off campus

WMU Surplus Sales has held its last sale at the Activities Therapy Building. The unit will move into its new location, 635 W. Ransom St., during the month of October. For sale hours, visit wmich.edu/logisticalservices/surplus.

Above right: WMU’s Richard Malott, psychology, addresses the crowd at the opening of the Kalamazoo Autism Center. Above: Malott, far right, and State Sen. Margaret O’Brien, fourth from left, participated in the Kalamazoo Autism Center ribbon cutting along with WMU dignitaries, from left, Kelly Kohler, KAC clinical director; Stephanie Peterson, psychology chair; James Gilchrist, vice president for budget and personnel; and chief information officer; and Dean Carol Koretsky, arts and sciences. A Purple Heart award recipient, she also was lauded as the winner of the Pat Tillman Award at the Excellence in Sports Performance Yearly Award, known as ESPYS, in July 2015.

Her talk, “The Resilience Factor,” is sponsored by WMU’s Foundation Scholars, Kalamazoo Promise Scholars and Seita Scholars programs. For more information about the event, contact Ron Dillard at ronald.d.dillard@wmich.edu or (269) 387-6326.

The offer will cover 50 percent of tuition for 90 credit hours toward a J.D. degree and/or 24 credits toward an LLM degree. All other fees and costs will be charged at standard rates. If an eligible individual receives a scholarship for study at WMU Cooley, the benefit is reduced to 50 percent of the amount remaining after the scholarship is applied. WMU Cooley has numerous scholarship opportunities for students.

More information regarding law classes in Kalamazoo can be found at WMU Cooley’s site at cooley.edu/prospective/first15wmu.html. Direct questions about admissions or tuition to WMU Cooley at admissions@cooley.edu or (517) 571-5140, ext. 5500.

WMU Cooley is offering 15 first-year credits over fall and spring semesters on the WMU campus during the 2016-17 academic year. Students can take their first credits in Kalamazoo and then transfer to the WMU Cooley campus of their choice to continue.

For rent—Fully furnished home in the Winchell neighborhood available January to June 2017. One-half mile from campus on dead-end street near nature preserve, great elementary school and shops. Totals 1,600 square feet and includes three bedrooms, 1.5 bathrooms, sunroom/office, and basement laundry, playroom and storage. Neighbors are fabulous. Cost: $1,000 plus utilities. Contact Jon at jon.davis@wmich.edu or (269) 387-4591.

Current job opportunities at WMU are announced daily on the Human Resources website at wmich.edu/hr/jobs. Please note that applications must be submitted online by the stated deadline. Complete application procedures are included with each posting.
Campuswide award winners to be feted at Fall Convocation

Editor’s note: Four campuswide award programs will be celebrated during the Fall Convocation Friday, Sept. 30. This issue honors winners from two of those programs. The other winners were noted in the Sept. 8 issue.

Distinguished Teaching Award

This honor is bestowed on faculty members who are exceptional educators and mentors, and demonstrate outstanding dedication in their roles.

Jennifer Machiorlatti is a professor of communication and director of undergraduate communication programs. A faculty member since 2004, Machiorlatti teaches in the areas of media and cultural studies, video and media production, media writing, film studies, communication and social justice, and intercultural communication.

Numerous nominators described her as an accomplished filmmaker who is an unusually skilled and creative teacher with an outstanding work ethic. They also praised her for providing a welcoming classroom environment. In addition, nominators were almost unanimous in lauding Machiorlatti for her commitment to student success, and they stressed that she is a mentor and role model as well as an excellent teacher.

Lisa Paulius is a professor of physics who joined the WMU faculty in 1993 and focuses her research on vortex dynamics in high temperature superconductors. Both faculty colleagues as well as students cited her for going the extra mile to help students learn, particularly by trying a variety of teaching methods and adopting innovations.

Nearly all of those nominating her reported that Paulius’ teaching innovations and methods, combined with her passion for physics and teaching, were instrumental in their classroom success. They also consistently praised her for providing steadfast patience and support. Women students especially noted that Paulius served as a mentor during their time at WMU and that she continued to provide encouragement as they moved on to graduate school and careers.

Emerging Scholar Award

This honor is bestowed on faculty members who are in the first decade of their WMU careers and are among the rising stars in U.S. higher education. It acknowledges the contributions of those who have achieved national recognition and demonstrated outstanding promise to achieve renown in their continuing work.

Jessaca Spybrook is an associate professor of educational leadership, research and technology. Spybrook has been a WMU faculty member since 2008. Nominators cited her for her roles as an education researcher, journal editorial board member and reviewer, grant program reviewer, consultant for research projects, and workshop presenter.

They also noted that she is a productive and influential scholar whose work has impacted both education research and public policy analysis, as well as garnered significant international and professional recognition. Her scholarly contributions are counted among those of the nation’s top applied statisticians and intervention researchers. Spybrook has served as the principal investigator or co-PI for research projects totaling about $3 million.

Broncos4Broncos campaign benefited students big time

The fiscal year 2016 Broncos4Broncos faculty-staff campaign ended at 30 percent, with donations totaling $487,358 to more than 295 designations. This was a 3 percent increase in participation from the past fiscal year and a 22 percent increase in dollars donated. “It just goes to show the dedication of Western’s faculty and staff to helping our students,” says Karen Finkham, campaign coordinator in development and alumni relations.

“No matter the size, every gift to Western Michigan University makes an impact.” Fiscal year 2016 gifts supported academic programs, international study opportunities, leadership and volunteer services, internships, and most of all, financial aid for WMU students. A highlighted area this year was the Invisible Need Project, which includes a student food pantry, emergency fund and health-emergency fund.

Donations to the emergency fund may be made anytime by purchasing a special T-shirt for game day. This year’s slogan is “Good as Gold.” To donate or learn more, visit mywm.com/invisibleneed. The 2017 campaign is running July 1 through June 30, 2017. All gifts are tax-deductible and 100 percent go to the designated areas. Visit mywm.com/employeegiving for details. Direct questions to Finkham at karen.finkham@wmich.edu or [269] 387-8700.

Obituaries

Bert Carr, a former vehicle mechanic in Facilities Management, died June 10. He was 90. Carr joined the staff in 1979 and retired in 1990 after 11 years of service.

James Croteau, professor of counselor education and counseling psychology, died suddenly after falling ill while cycling Sept. 18. He was 59.

Funeral arrangements are pending and will be announced at wmich.edu/news/obituaries when they become available.

Arthur T. Howson, assistant professor emeritus of education and professional development, died Aug. 15. He was 85. Howson joined the faculty in 1967 and retired in 1991 after nearly 24 years of service.

Thomas L. Swihart, a former equipment operator in landscape services, died Aug. 24. He was 67. Swihart joined the staff in 1986 and retired in 2010 after 24 years of service.
Gifts to WMU during 2015-16 top $70 million

The 2015-16 fiscal year that concluded June 30 saw gifts to WMU surpass $70 million, the WMU Board of Trustees learned at its Sept. 7 meeting.

The year-end gift report to the board reflected a total of $70,302,260 in gifts, pledges and deferred commitments made during the year by 16,825 unique donors. The gift total is the second largest the University has recorded in the past 15 years.

Detailed information on gifts received showed donors were focused during the year by units across the campus. In addition to a number of gifts made to each of the University’s seven degree-granting colleges, major gifts were recorded to the WMU Homer Stryker M.D. School of Medicine, WMU’s Osher Lifelong Learning Institute and the Division of Intercollegiate Athletics.

Meanwhile, trustees learned that the grant total for the 2015-16 fiscal year was just over $23.5 million and grants are off to a brisk start for the 2016-17 fiscal year, which began July 1.

On Campus with La Shaunda Webb

Online classes as well as hybrid classes, those which combine face-to-face instruction with some Web-based learning, are growing trends in higher education and increasingly popular at WMU.

La Shaunda Webb, instructional designer for Extended University Programs, coaches instructors at the University on how to build their online courses and make the transition from traditional class settings. She works individually with faculty to create the best experience for students, and her involvement level is as varied as the types of requests she gets.

“I work with instructors to help them structure the redesign of their courses, use online resources and tools they can use to build engaging activities for students,” Webb says. “There’s the whole gamut of experience that professors bring with them when they develop their courses. But there is a growing interest and need by people who want to enhance the classroom experience.”

Webb joined the WMU staff in November 2013 as an instructional technology coach and moved into her current role almost a year later. Typically, she says, the month before and two weeks into each semester are her busiest times. She adds that demand for her services has increased from faculty on an off campus because in addition to online instruction, there’s a growing interest in using elearning in classes.

A member of the Educational Technology Committee, Webb helps to research and recommend current and emerging technology that WMU can adopt. She also is a member of the mid-Michigan chapter of the Association of Talent Development, helping organize speakers and planning networking activities for the West Michigan subgroup in Grand Rapids.

Originally from Detroit, Webb earned a bachelor’s degree from the University of Michigan and then taught middle school reading and English to special education students in Houston for nine years before returning to her home state. She earned a master’s degree in human resource development while in Houston, and a master’s degree in business administration from WMU in June.

Now that she’s done taking academic classes at WMU, Webb attends an exercise class and enjoys exploring west Michigan and playing with her dog. She also is very crafty and an avid user of Pinterest.

A DIFFERENT KIND OF COACH

Two more facilities open amid fanfare

Consumers’ large array of solar panels installed on the Parkview Campus.

“We’ll use the opportunity provided by our partnership with Consumers Energy for education and research,” said WMU President John M. Dunn during the opening ceremony. “It will help turn the attention of communities like this one to the potential of solar power.”

The 1-megawatt solar power plant at Parkview is Consumer’s second large-scale solar project in Michigan and the first actually located on a college campus. A 3-megawatt plant opened in April on property owned by Grand Valley State University.

Process for presidential search

A national search firm will then be engaged and a website developed to keep the community apprised of progress in the search. The goal is to have a new leader identified by the end of the academic year.

Along with Johnston, the following people, and their key WMU affiliations, make up the 2016-17 Presidential Search Advisory Committee: James B. Bolger, trustee and search committee vice chair; Mary A. Asmonga-Knapp, trustee; Susan F. Ayers, Faculty Senate; Kathy Beauregard, intercollegiate athletics; Gary Bischof, family and consumer sciences; Jody Brylinsky, institutional effectiveness; Damon Chambers, Graduate Student Association; J. Kevin Corder, political science; Satish Deshpande, Haworth College of Business; Thomas Edmonds, retired faculty member, Thye Fischmann, Western Student Association; Harold Glasser, sustainability office; Hal Jenson, WMU Homer Stryker M.D. School of Medicine; Jennifer Lentner, WMU Alumni Association; Dennis Moore, American Federation of State, County and Municipal Employees; Lisa Minnick, American Association of University Professors; Shannon Rininger, Professional Support Staff Organization; Kahler Schuemann, Board of Trustees; Timothy Terrentine, development and alumni relations; Martha Warfield, diversity and inclusion; and Evelyn Winfield-Thomas, institutional equity.
