Surge seen in international enrollment

Editor’s note: The Brazil initiative referenced in this story will be highlighted in a separate story planned for the Nov. 29 issue of Western News.

The University has seen double-digit growth in international student enrollment as well as a large boost in the number of WMU students studying abroad. International student enrollment grew by 12 percent this fall compared to 2011-12, resulting in 1,575 students from 95 countries studying on campus. Meanwhile, the largest number of WMU students in a decade—388—are studying abroad.

Most of the increase in international student enrollment stems from growing enrollment in WMU’s Center for English Language and Culture for International Students, the University’s intensive English language learning program, and efforts to expand overseas partnerships. CELCIS enrollment grew nearly 60 percent to 254 full-time students in fall 2012, up from 159 students last year. Historically, more than 90 percent of those who graduate from the center's programs become degree-seeking students at WMU.

In addition, CELCIS continues to expand its scope, developing customized programs for WMU partner institutions such as Ritsumeikan University in Japan and Kyung Hee University in South Korea. It customized programs for nine partners last year, enrolling 121 students. In 2010-11, 74 students were enrolled from six partners.

International enrollment increases are a reflection of national trends identified in an annual report released Nov. 12 by the Institute of International Education with support from the U.S. Department of State’s Bureau of Educational and Cultural Affairs. The latest IIE report, “Open Doors 2012,” focuses on data collected for the 2011-12 and 2010-11 academic years.

It shows that the number of international students at U.S. colleges and universities increased by 6 percent to a record high of 764,495 in 2011-12 while the number of U.S. students studying abroad increased by 1 percent to a record total of 273,996 in 2010-11.

Bassam Hank, interim vice provost of the Haenicke Institute for Global Education, says students coming from five countries have been pivotal to WMU’s increase in international enrollment this fall. The University welcomed 71 new students from China (269 total), 60 from Saudi Arabia (333 total), 41 from Japan (93 total), 26 from Brazil (31 total) and 16 from Iraq (23 total).

Hank anticipates increasing enrollment of students from Brazil will continue through WMU’s participation as one of 14 U.S. higher education institutions recently selected to participate in IIE’s 2013 Brazil initiative, part of IIE’s International Academic Partnership Program.

International enrollment also will benefit from scholarship programs offered through

Office for Sustainability shows off its new home

A grand opening for the Office for Sustainability’s new home Nov. 8 drew more than 100 campus and community members to the old University Bookstore building at the corner of Howard Street and West Michigan Avenue.

The event featured a project showcase, formal remarks by WMU officials and students, and a catered reception that was created in part with locally sourced food.

Harold Glasser, executive director for campus sustainability, told the crowd that WMU has made tremendous strides toward building a campus culture of sustainability, but has only begun the journey. That sentiment was echoed by President John M. Dunn, who said the University and local community have collectively made a huge difference.

“We’ve moved to a new state, a new expectation, but the bar is going to continue to...go up and up because the expectation is for all of us to be good stewards of our environment, to be responsive, to be thoughtful and to think in multiple directions about other things that we can do.”

The new home for the sustainability office incorporates materials from other campus locations, including the old Sangren Hall and upholstery shop. Where new materials or products were needed, an effort was made to obtain them locally.

The building has been renovated to stimulate and advance collaboration. It features work, meeting, conference, breakout and retreat spaces. It also is beginning to house existing campus sustainability initiatives such as the Farm Store and the Bike Stable, a bicycle repair cooperative. Also, a new electric car charging station has been located in the parking lot, bringing WMU’s nationally recognized electric vehicle charging infrastructure to 21 stations.
Open enrollment period under way for health benefits, FSAs

The open enrollment period for health care benefits and flexible spending accounts began Nov. 12 and will continue through 5 p.m. Friday, Dec. 7.

Open enrollment for health care benefits is available for WMU retirees, beneficiaries eligible for non-bargaining employees, and employees who are members of the American Association of University Professors; American Federation of State, County and Municipal Employees; Michigan State Employees Association; and Police Officers Association. Employees; Michigan State Employees Association; and Police Officers Association.

Employees who wish to participate in an FSA in 2013 must enroll or re-enroll during this year’s open enrollment period. FSAs offer an opportunity to use pre-tax dollars to pay for dependent-care expenses or qualified medical expenses that are not covered by health care benefits. Current as well as new participants must submit an FSA enrollment form to Human Resources by the deadline.

That form is part of the BASIC Flex booklet and is available online at wmich.edu/hr/enrollment or in print from the Human Resources office, 1300 Sander Administration Building.

PROF LAUNDED FOR CLASSROOM INNOVATION

Ann Veeck, marketing, received the 2012 Marketing Management Association Teaching Innovation Award. The national award recognizes innovative approaches to teaching and opportunities in higher education.

Veeck was selected from among three finalists during the association’s 2012 Fall Educators’ Conference for her social media analysis tools to effectively monitor social media: A Social Media Marketing Research Project.” All three finalists presented their innovations at the conference, which was held Sept. 20-21 in Minneapolis.

Veeck, who has been a WMU faculty member since 1999, received the award for developing techniques for incorporating social media analysis into undergraduate market research classes. She points out that students are expert at using social media for their personal use, but need to develop professional skills to effectively analyze consumer feedback via social websites.

SOCIOLIGIST CITED FOR TEACHING PRERORESS

Ronald Kramer, sociology, received the Larry T. Reynolds Award for Outstanding Teaching of Sociology at the annual meeting of the Michigan Sociological Association Oct. 27 at Calvin College in Grand Rapids.

The award honors Kramer for more than 30 years of teaching sociology and criminology at WMU. A faculty member since 1978, he received the WMU Alumni Association Teaching Excellence Award in 1981 and co-chairs the Interdisciplinary Humanities Study Group on Climate Change in the University Center for the Humanities.

Kramer is an active scholar who focuses his research on corporate and state crime, crime prevention and control strategies, and the sociological history of the sport of baseball.

ADMINISTRATOR RECEIVES NATIONAL AWARD

Mark Delorey, director of student financial aid and scholarships, has received the 2012 Distinguished Service & Leadership Award from the National Association for the Education of Homeless Children and Youth.

Delorey, one of the principals in developing WMU’s Serita Scholars program for former foster care youth, was presented with the accolade Oct. 28 during the organization’s annual conference in Albuquerque, N.M. This is the first time the award has gone to a higher education professional.

Delorey was lauded in a series of nomination letters from around the country for serving as a liaison between the world of collegiate financial aid officers and advocates for homeless youth. Since 2010, he has collaborated with homeless youth to provide the students they work with access to and opportunities in higher education.

WMU HONORS VETERANS—With the traditional Nov. 11 date for Veterans Day falling on Sunday this year, WMU and its Army ROTC and military sciences department scheduled a round of activities that began Nov. 8 and will end with a salute to veterans during the Nov. 17 football game. The activities included a Veterans Day Dining-in event (pictured) to give thanks and show appreciation to local veterans as well as a Universitywide moment of silence and a Veterans Day Celebration and 5K Run. In addition, veterans were honored during the Nov. 9 hockey game. (Photo by Mike Lankard)

University to induct 72 long-term employees into 25 Year Club

A total of 72 people who began their service to WMU in 1987 will be inducted into the 25 Year Club during a gala honoring longtime employees who have built their careers at WMU. With the new class set for Tuesday, Nov. 27.

The 2012 inductees are: Valerie Armstrong, building custodial and support services; Roger T. Arndt, Extended University Programs; Teri Danithan, Logistical Services; Elaine Gaudio, public safety; Nancy E. Crestinger, provost’s office; Sandra L. Custer, Sincere Health Center; Robert F. D’Amelio, intercollegiate athletics; James R. Daniels, emergency management; Timothy M. Holysz, landscape services; Jeffrey A. Stone, intercollegiate athletics; Matthew J. Tomacik, information technology; Bruce J. Uchimura, music; Camela S. Vossen, emergency management; Linda C. Walker, Extended University Programs; Selena D. Walker, building custodial and support services; and Allen Zagarell, anthropology.

Obituaries

John E. Sandberg, emeritus in education and former dean of what is now the College of Education and Human Development, died Oct. 24. He was 83.

Sandberg came to WMU as dean in 1971 and served in that role until 1983. He retired at the end of 1985 after 14 years of service, and for a time, remained active in teacher evaluation research at the university.

Robert E. Shamu, emeritus in physics and former chair, died Oct. 26. He was 79.

Shamu retired in 2004 after more than 37 years of service. Memorial gifts may be made to the physics department, Hospice Care of Southwest Michigan, or the WMU Foundation, for the Robert E. Shamu Physics Memorial Fund. Visit langelands.com to make a memorial guestbook entry.
Nov. 16 event to conclude United Way campaign

Members of the WMU community are invited to join President John M. Dunn as he marks the end of the campus United Way campaign.

The celebration will take place from 4 to 6 p.m. Friday, Nov. 16, in the lobby of the Fetzer Center and in conjunction with the Friday With Friends mixer. Dunn will acknowledge campaign organizers and contributors, light refreshments will be served, and Buster Bronco will make an appearance.

Faculty and staff members who contribute any amount to the campaign will be entered into the grand-prize drawing. Prizes include:
- a pair of seats in the President’s Box for the last home football game;
- a $100 gift certificate for Millennium Restaurant Group (Martell’s, Epic Bistro, The Union, Fieldstone Grill); and
- two tickets to the Gold Company’s annual performance at Miller Auditorium on Feb. 9.

Although this year’s campaign will officially end Nov. 16, the president’s office will continue to collect donations of any amount. Employees and retirees who have not already turned in their pledge cards are encouraged to do so now. For information on making a gift, contact wmu-united-way@wmich.edu.

Community reacts well to mixing of chemistry, dance

Two chemistry professors traded in their laboratory coats for ballroom attire to participate in a Culture and Chemistry program Nov. 9 at the Kalamazoo Institute of Arts. James Gusinski and Elke Schoffers performed showcase dances with their partners and also taught a Salsa lesson during the program, which carried the theme “Elements of Dance.”

The program was organized by the Kalamazoo chapter of the American Chemical Society and drew 179 people, including 63 local chemists, students from WMU and Kalamazoo College, local ballroom dancers and spectators.

The event is the first in what organizers hope will be a series of Culture and Chemistry programs that bring the public together with local chemists and students to have fun, forge ties and learn about the connections between chemistry and culture.

Visit wmich.edu/acs for more information and pictures from the event.

On Campus with Shari Glaser

Family members are more engaged than ever in students’ college experiences, and the fine line between providing information and encouraging independence is handled by WMU’s Office of Parent and Family Programs.

Director Shari Glaser is no stranger to the issues many families and students face when preparing for college. She has a daughter studying music and theatre at WMU and a son, a high school senior, who plans to attend WMU in the fall and study engineering.

“In this day and age, parents and family members are an integral part of the college experience,” she says. “They’ve been incredibly involved in the education of their students up to this point. College students still need their families, but the parental role changes to one of coach and mentor.”

Glaser is the point of contact with the University for family members who have questions or concerns. She is also responsible for educating families about the differences between preparing high school students and parenting college students.

The annual WMU Family Weekend event, the “WMU Parent and Family Guide” and email updates sent through the “WMU Family Connection” are tools the office uses to keep family members informed.

Glaser is also an off-campus administrator for the Children’s Place Learning Center on campus.

“For those of us who have 17- and 18-year-olds, you know you just don’t ride off into the sunset the day they are out the door. The transition from high school to college for both students and families is not instantaneous, but rather a process,” she says. “Our goal is to help parents and families prepare their children during the high school years to be more independent in college.”

Glaser joined the University in 1994 in catering, then worked in the Office of the President and moved into her current role when the Office of Parent and Family Programs opened at the end of 2006.

She is married to Greg Rosine, vice president of government affairs and university relations. The two live in Kalamazoo, enjoy sailing and are both certified sailors.

Glaser also is a runner, participating in nine marathons so far, and likes to knit. A student herself at WMU, she will receive her master’s degree in communication in April.

Upturn in international enrollment

For the Open Doors International Scholars Program, the government of Iraq, Harik says, that country has earmarked funds to send 10,000 students abroad between 2008 and 2018. He also reports that a new dual-degree agreement with Anadolu University in Eskiehir, Turkey, will bring AU undergraduates majoring in civil and industrial engineering to WMU for two years, allowing them to earn a degree from both AU and WMU.

New study abroad opportunities for WMU students in Argentina and 20 short-term, faculty-led courses have helped boost study abroad enrollment this year by 88 students compared to 2010-11.

The top five countries attracting WMU students followed national trends: Czech Republic (78), Germany (56), United Kingdom (52), Spain (51) and China (33).

WMU’s exchange programs with institutions in Germany, Japan, France and the Netherlands continue to be popular with students. Twenty faculty-led programs are planned for the 2013 summer I and summer II sessions.

The University awarded nearly $500,000 in student scholarships for study abroad last year, with $400,000 coming from WMU sources. The President’s Grant for Study Abroad and the Hasenclever Institute’s Scholarship for Study Abroad have been particularly influential in spurring the growth in study abroad enrollment.

For the Open Doors International Scholars Program, the University has 10 study-abroad programs for 2013, including one with Anadolu University in Eskiehir, Turkey.

Upturn in international enrollment
