CATCH OF THE DAY, FOR
SYMPHONY ORCHESTRA

Angela Lynne Jones, M.M.
Western Michigan University, 1991

In "Catch of the Day," the music is centered by a time-line, a feature of African ritualistic music. West African ritualistic music is often performed by large drum ensembles, each playing a different rhythm. In order to stay together properly, each musician listens to a time-line, or a rhythmic pattern which beats out the basic rhythm and keeps time for the whole group. The time-line also has special significance because it is heard even when it is not actually played. While the time-line is used to define the rhythm, the most important element in ritualistic music is the text, which forms the rhythm for the vocal line.

These principles are used with Western instruments to change the sound, but keep the very essence of the piece African. Two songs from a collection of African transcriptions are incorporated in the work. One, a fishing song called the Sprat-catching song, is the springboard for the whole composition. The second quote is from a ritualistic dance, the Sovu dance of the Yeve religious sect. This quote is used as the first part of the B section of this ternary work.

Several compositional techniques are employed: klangfarbenmelodie, so-called minimalism, invertible counterpoint, and a general metamorphosis of the two excerpted songs.
ACKNOWLEDGEMENTS

I wish to express appreciation to my instructor and committee chairperson, Ramon Zupko, for his guidance and criticism, as well as his perfectionism, which has helped me greatly through the course of my study.

I am also grateful to The Graduate College and the School of Music at Western Michigan University, Kalamazoo, for the Fellowship and Scholarship and other support of my graduate studies. Without this support, earning this degree would not have been possible.

Last, but not least, I would like to thank my family. My parents have been the rock of support that I really need and don't always acknowledge. I am also deeply grateful for my patient fiancé, Curtis, who has encouraged and supported me wholeheartedly throughout this entire undertaking.

INFORMATION TO USERS

This manuscript has been reproduced from the microfilm master. UMI films the text directly from the original or copy submitted. Thus, some thesis and dissertation copies are in typewriter face, while others may be from any type of computer printer.

The quality of this reproduction is dependent upon the quality of the copy submitted. Broken or indistinct print, colored or poor quality illustrations and photographs, print bleedthrough, substandard margins, and improper alignment can adversely affect reproduction.

In the unlikely event that the author did not send UMI a complete manuscript and there are missing pages, these will be noted. Also, if unauthorized copyright material had to be removed, a note will indicate the deletion.

Oversize materials (e.g., maps, drawings, charts) are reproduced by sectioning the original, beginning at the upper left-hand corner and continuing from left to right in equal sections with small overlaps. Each original is also photographed in one exposure and is included in reduced form at the back of the book.

Photographs included in the original manuscript have been reproduced xerographically in this copy. Higher quality 6" x 9" black and white photographic prints are available for any photographs or illustrations appearing in this copy for an additional charge. Contact UMI directly to order.

SOURCE OF EXCERPTED SONGS

INSTRUMENTATION

2 flutes, one piccolo
2 oboes
2 Bb clarinets
1 Bb bass clarinet
2 bassoons
strings

2 Bb Trumpets
2 French Horns in F
2 Trombones
1 Tuba

- Percussion

1 xylophone
bongos
1 marimba
2 wood blocks
3 cowbells (pitched low medium and high)
1 rattle (a big loud one)
1 suspended cymbal
congas (at least two)
1 bass drum
1 snare
timpani
(this should require 5 players)
piano

harp

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
PERFORMANCE NOTES

The rattle and the suspended cymbal share a non-pitched percussion line, as do the bass and snare drums. Whenever one of these instruments is indicated, it has been circled in the score.

Ideally, the cowbells should be pitched at middle C, the F above that, and the C above that. Anywhere near these pitches will be acceptable.

The clarinet, bass clarinet, trumpet and horn parts have all been transposed.

The piccolo part may be played by the second flutist.
